2.3 TEACHING LEARNING PROCESS

KMCT
DENTAL COLLEGE

Recognised Research Centre of Kerala University of Health Sciences
Recognised by Dental Council of India and Govt. of India
KMCT Medical College Campus, Mukkam, Kozhikode-673602
Phone: (0495)2292002, 2292004
E-mail: dental@kmct.edu.in, website: www.kmctdentalcollege.org

2.3.1. QnM Student-centric methods are used for enhancing learning experiences by:

- **Experiential learning**
- **Integrated/interdisciplinary learning**
- **Participatory learning**
- **Problem solving methodologies**
- **Self-directed learning**
- **Patient-centric and Evidence-Based Learning**
- **Learning in the Humanities**
- **Project-based learning**
- **Role play**

KMCT

E-mail: dental@kmct.edu.in, website: www.kmctdentalcollege.org

TO WHOMSOEVER IT MAY CONCERN

This is to certify that student centric methods are used for enhancing learning experiences by:

- Experiential learning
- Integrated/ inter disciplinary learning
- Participatory learning
- Problem solving methodologies
- Self- directed learning
- Patient centric and evidence based learning
- Learning in the humanities
- Project based learning and Role play.

GENERAL INSTRUCTIONS

1. Bring the record book to all practical classes and the record must be kept neat and in good condition.
2. Students should wear aprons with identity cards while working in the laboratories.
3. Exercises should be completed in the specified time period and evaluated by the staff in charge in the record book.
4. Submit the record book for valuation when you come for the practical examination.
5. Marks will be awarded for the records depending on neatness and completion, during the practical examination.
6. Unnecessary wastage of water, gas or any other materials should be avoided.
7. Containers of materials / chemicals must be kept closed in their proper places when not in use.
8. Excess or waste materials like paper, cotton & plaster powder must be thrown into the waste bins and should not be thrown into the sink. Excess amalgam must be disposed as per instructions.
9. Students should enter the laboratories on time with all the required instruments. Borrowing will not be permitted.
10. Mouth masks and gloves are mandatory while working.
11. Equipments borrowed from the department should be returned before leaving the laboratory.
12. Students should keep the laboratory neat and tidy and should not cause any damage to the furniture, equipments etc.
13. Student is liable to replace or compensate for the equipment that is lost or damaged.
14. Strict discipline should be maintained while working in the laboratory
15. Students are not allowed to wear hand ornaments & watches while working
16. Students should take care of their belonging from theft or loss.

STUDENTS DECLARATION

I have carefully read the above rules and undertake to abide by them.

SIMPLE CAVITY - 36 CLASS 1 OCCLUSAL CAVITY

OUTLINE FORM

Irregular outline in the groove extensions, half the distance into the groove. Mesial and distal outline run parallel to the proximal contour and 4mm away from the outer contour preserving the marginal ridge

DIMENSIONS

Pulpal depth = 4mm from the marginal ridge
Pulpal width = 4mm at the triangular ridge

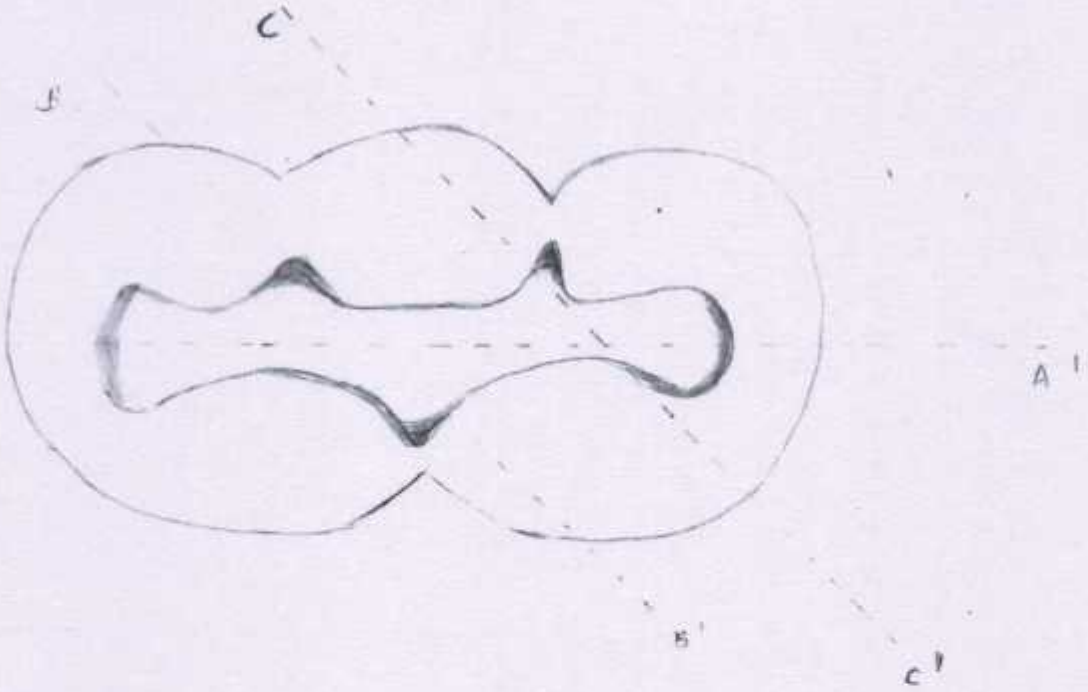

FEATURES

* Outline circumvents the cusp in smooth forming curves
* No sharp junctions
* Mesial and distal walls parallel to outer contour of the tooth and 4mm away
* Pulpal floor flat
* Smooth walls and floor
* Line angles and point angles well defined and rounded
* Taper to mesial and distal walls and walls at groove extensions
* Inverse taper in the buccal and lingual walls at the triangular ridges of the cusp
* Cavosurface angles form a 90 degree butt joint

SIMPLE CAVITY 3b CLASS I BUCCAL PIT CAVITY

OUTLINE FORM

Oval

LOCATION

Occlusal $\frac{2}{3}^{rd}$ buccal surface involving the buccal groove

LOCALISATION

centre of cavity lie at the junction of occlusal and middle $\frac{1}{3}^{rd}$ of the buccal surface

DIMENSION

Occluso-gingivally = 4 mm
Mesio-distally = 3 mm
Axial depth = 3 mm

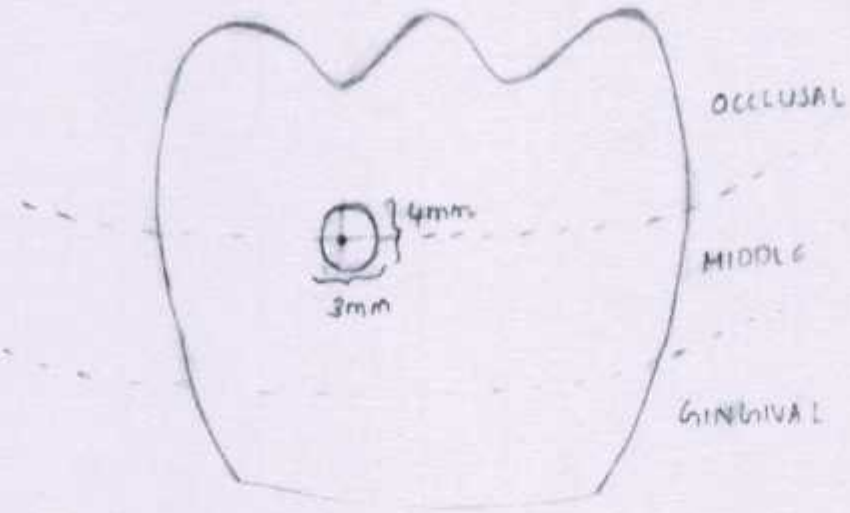

FEATURES

* Axial wall is flat and follows the buccal contour
* Walls are smooth and lie perpendicular to axial wall or follow the enamel cod junction
* Line angle is well defined
* 90 degree cavosurface angle

CLASS I MESIAL DISTAL PIT IN MAXILLARY MOLAR

OUTLINE FORM

Mesial cavity - kidney shaped
Distal cavity - heart shaped

DIMENSIONS

4mm from the marginal ridge
width - 4mm at the triangular ridge

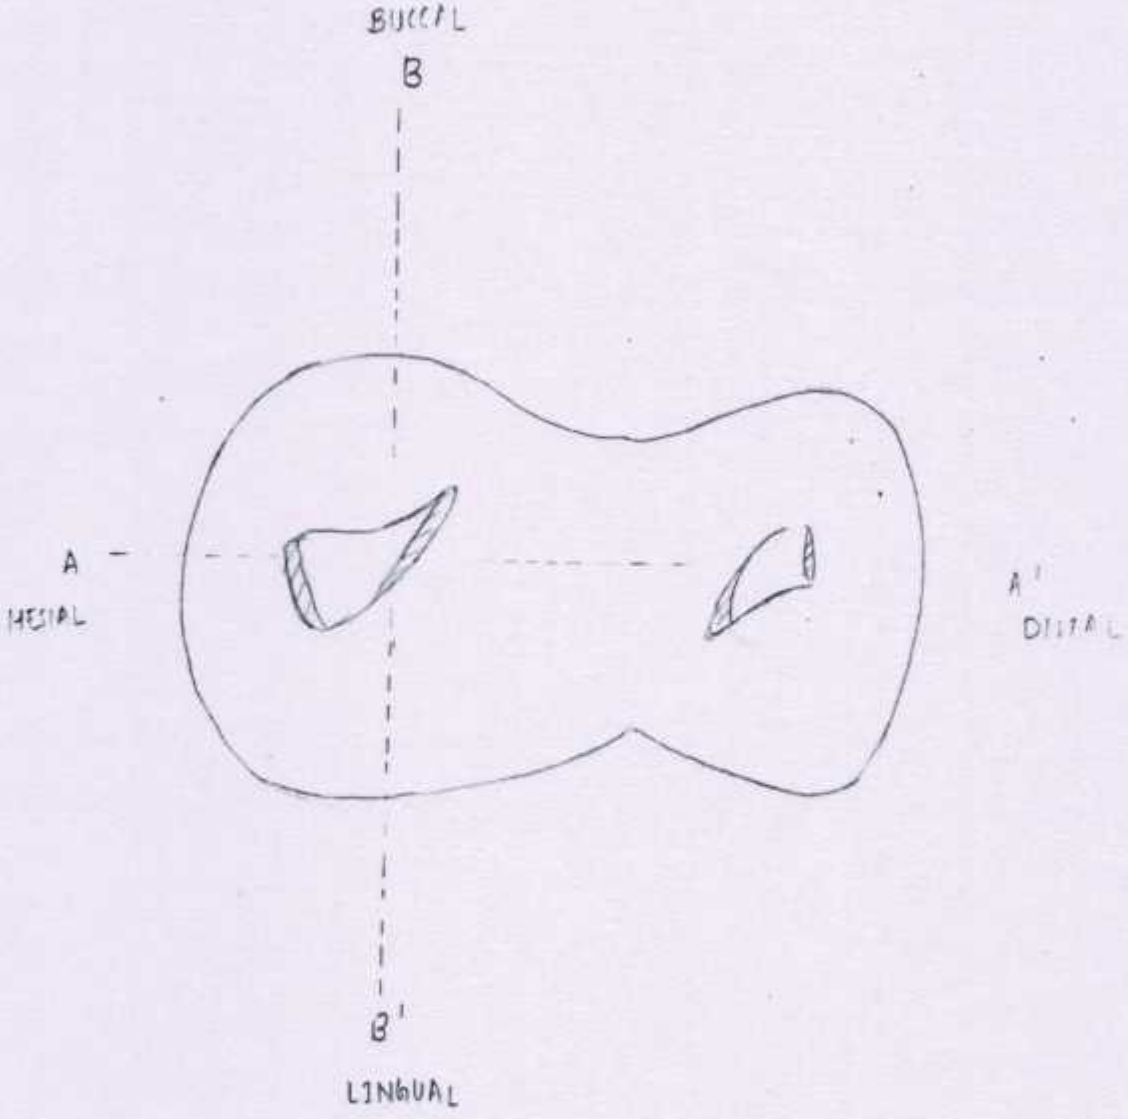

FEATURES

* Mesial and distal walls are parallel to the outer contour of the tooth and 4mm away
* Mesial and distal walls adjacent to the oblique ridge run parallel to the ridge
* Groove extensions upto half the distance into the groove from the central groove
* Taper to mesial and distal walls and the walls parallel to the oblique ridge
* Inverse taper to buccal and lingual walls at triangular ridge
* Walls - Smooth, rounded and well defined

SIMPLE CAVITY IN CLASS V IN LOCAL CAVITY

OUTLINE FORM

Trapezoidal with rounded corners

LOCATION

Central $\frac{1}{3}^{rd}$ of buccal surface

LOCALISATION

Occlusal wall lie at the junction of middle and cervical third

DIMENSIONS

* Occlusal wall length = 10 mm
* Cervical wall length = 8 mm
* Occlusal cervical width = 5 mm
* Axial wall depth = 4 mm

FEATURES

Axial wall parallel to the outer contour of the tooth external wall and lie perpendicular to the axial wall and point angle are rounded. Line angles well defined but rounded

RETENTIVE GROOVES :

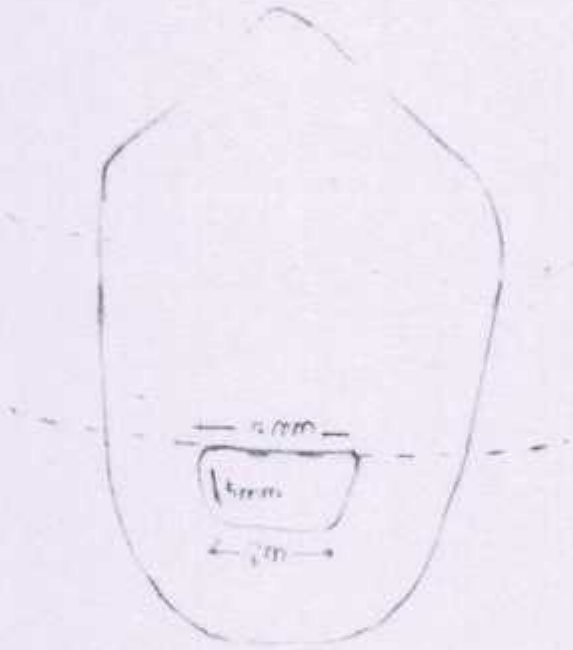

LOCATION - Axio gingival and axio occlusal line angle

DIRECTION - Bisecting the line angles

COMPOUND CAVITY 36 CLASS II MESIO OCCLUSAL CAVITY

PROXIMAL BOX

OUTLINE FORM - Inverted truncated cone shape with base located gingivally and apex towards the marginal ridge

DIMENSIONS

* Gingival seat depth (occluso-gingival depth) = 1.2 mm from the marginal ridge
* Gingival seat axial width = 3 mm
* Gingival seat bucco lingual width = 12 mm

FEATURES

Occlusal cavity should mesially develop a flare such that

a) The proximal contact with the adjount tooth is broken (0.2 mm of buccal and lingual contact; 0.5 mm of gingival contact in natural teeth)

b) The occlusal outline should meet at 90 degree to an imaginary tangent drawn on the outer proximal surface forming a "butt joint"

The buccal and lingual walls of the proximal box should be parallel to the middle one third of the buccal and lingual surface

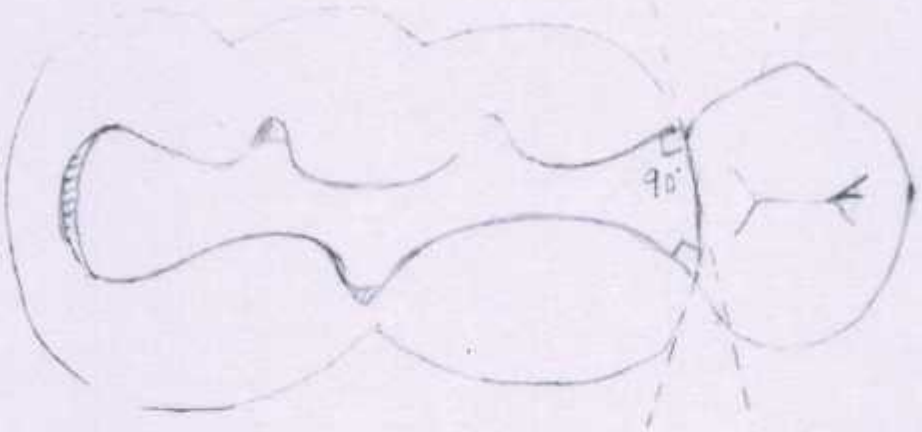

Gingival seat should be flat and perpendicular to long axis of the tooth

Bucco gingival and linguo-gingival line angles are rounded in the form of an arc

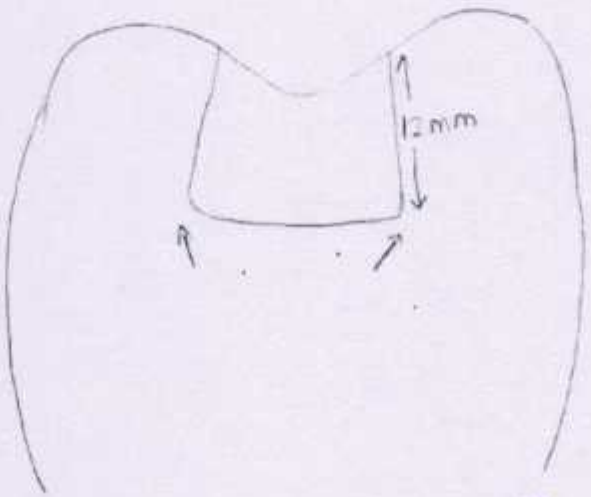

Axial wall should be

1) Tapered occluso gingivally and parallel to the DE
2) Bucco lingually convex and parallel to the outer contour

DENTAL COLLEGE P.O. Manassery Pin 673 ... Malappuram Dist. Kerala
DR. MANOJ KUMAR. K.P
K.M.C.T. Dental College
Manassery, Mukkam

Mesial flare to break the contact should form a butt joint to an imaginary tangent drawn from the outer proximal surface to ensure parallel form

KMCT DENTAL COLLEGE
P.O. Manassery
Pin. 673 602
Mukkam, Calicut Dt
Kerala - S. India
CALICUT
DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Manassery, Mukkam

3) Axiopulpal line angle is rounded

4) Gingival cavosurface bevel of 20 degrees

RETENTIVE GROOVE

LOCATION : Axiobuccal and axiolingual line angles

EXTENT : Axio buccal pulpal point angle to axiobucco gingival point angle, Similarly on the linguo axial line angle

TRANSLATION : Bisecting the line angle

DEPTH : 2 mm

NOTE

Factors controlling the flare in a class II amalgam preparation

a) The contact with adjacent tooth - contact should be broken

b) obtain a cavosurface bull point to an imaginary tangent drawn to outer proximal surface

c) The enamel wall must follow the enamel rod direction

Cavosurface bull point is given for amalgam preparation to improve the resistance form in the tooth and the restoration.

In tooth, it removes unsupported tooth structure and the enamel margin follows the enamel rod direction.

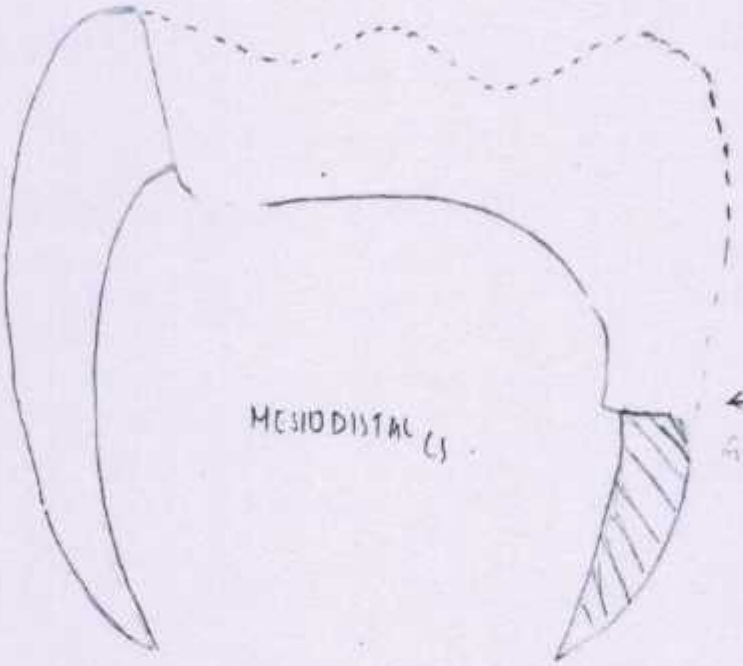

In restoration - the resistance form is got by obtaining adequate bulk to resist masticatory forces. Tensile strength of amalgam is low and so tends to fracture if bulk is less

20 degrees gingival cavosurface bevel is given to

a) follow the enamel rod direction

b) Remove unsupported enamel

COMPOUND CAVITY-14 CLASS II MESIO OCCLUSAL CAVITY WITH REVERSE CURVE

OCCLUSAL CAVITY :

Outline form dumb bell shaped with ends somewhat triangular features similar to exercise 1

DIMENSIONS :

Proximal box dimension

* Gingival seat depth from marginal ridge = 12 mm
* Gingival seat width axially form gingival cavosurface = 3 mm

Features same given in exercise 5

REVERSE CURVE

Definition :- It is a deviation or smooth 's' shaped curve extending from the isthmus to proximal contour.

INDICATION :-

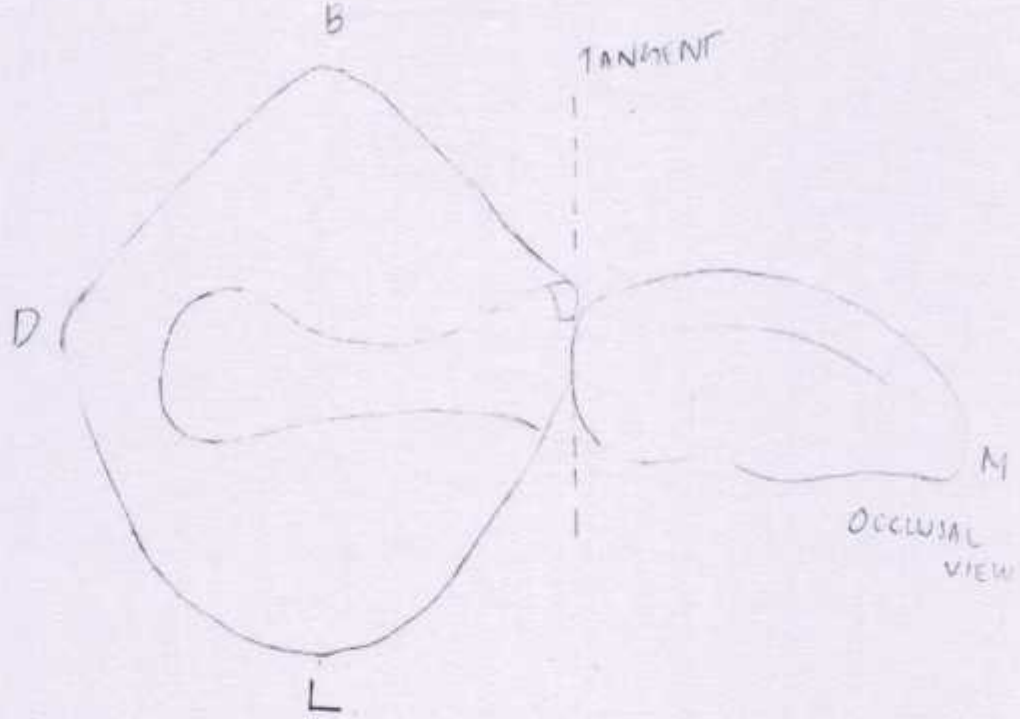

* Broad contact
* Extensive caries
* Rotated tooth

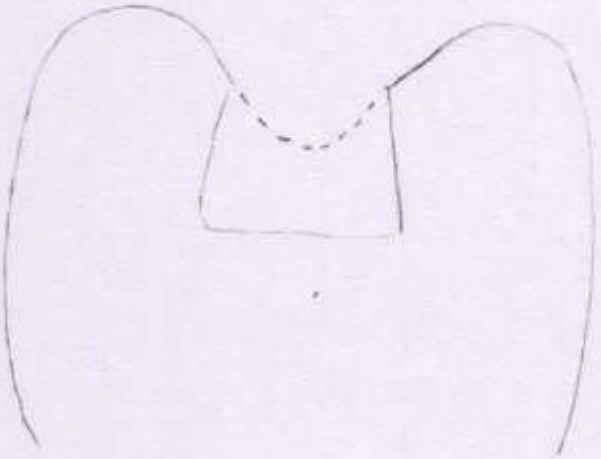

ADVANTAGES

* obtain a butt joint
* Maintain a narrow isthmus
* Conserves the cusp
* Maintain resistance form the tooth

COMPOUND CAVITY IN CLASS III MESIO CAVITY (LINGUAL APPROACH)

LOCATION :

Middle third of the mesial surface cervical to the contact point

DIMENSION :

Labial wall incisocervical length - 10 mm
Lingually - 6 mm
Axial depth - 4 mm

FEATURES :

* The labial wall is placed in the labial embrassure
* The labial wall parallel to the incisal $\frac{2}{3}^{rd}$ contour of the labial surface of the tooth
* Incisal wall lie cervical to the contact point (do not break incisal contact)
* Gingival wall is kept supragingivally
* Axial wall follow the proximal contour
* labioincisal and labiogingival line angles are rounded

RETENTIVE GROOVE

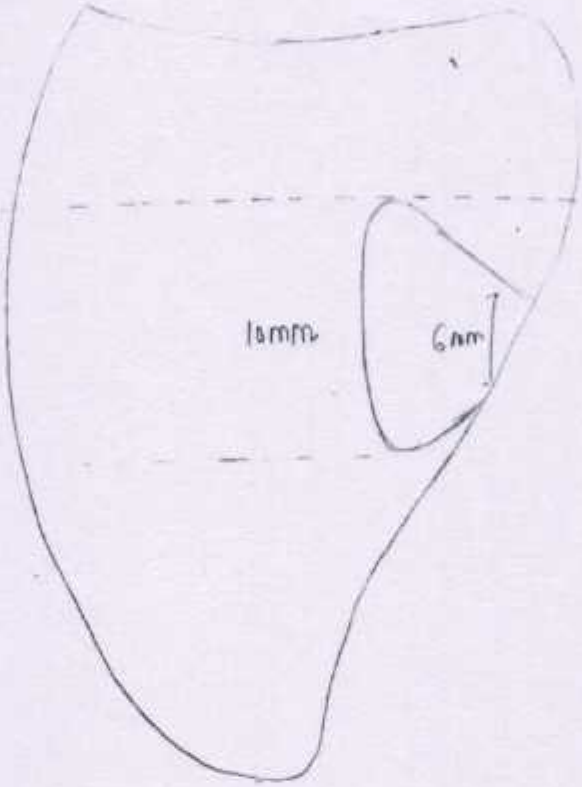

LOCATION : Axioincisal & axiogingival line angles.

EXTEND : Within the dentin 5 mm [illegible] the contour of

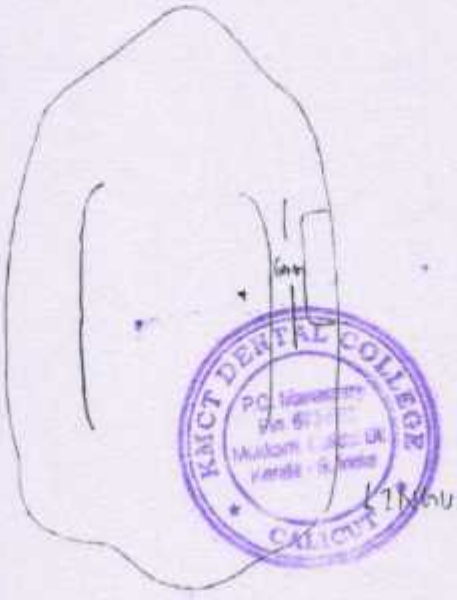

DIRECTION : Paralleling the line angle

CLASS III MESIAL CAVITY (LINGUAL APPROACH)

MESIAL VIEW

LINGUAL VIEW

THE MESIAL RIDGE IS BROKEN TO APPROACH THE MESIAL SURFACE

KMCT DENTAL COLLEGE
CALICUT
DR. MONOJ KUMAR K.P
KMCT Dental College
Manassery, Mukkam

COMPOUND CAVITY 36 CLASS II MESIO DISTO OCCLUSAL CAVITY (MOD)

OUTLINE FORM

Irregular outline with groove extensions half the distance into the groove, mesial and distal outline run parallel to the proximal contour and 1 mm away from the outer contour, preserving the marginal ridges

PROXIMAL BOX

OUTLINE FORM

Inverted truncated cone shaped with base located gingivally and apex towards the marginal ridge

DIMENSIONS

Gingival seat depth [occlusal gingival depth] = 12mm from the marginal ridge

Gingival seat axial width = 3 mm

Gingival seat buccolingual width = 12 mm

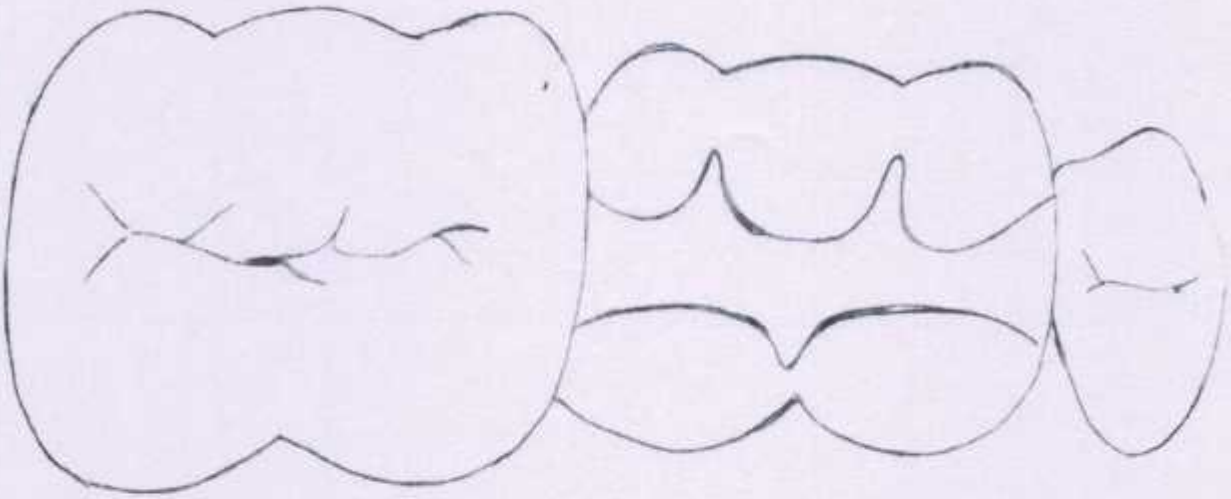

FEATURES

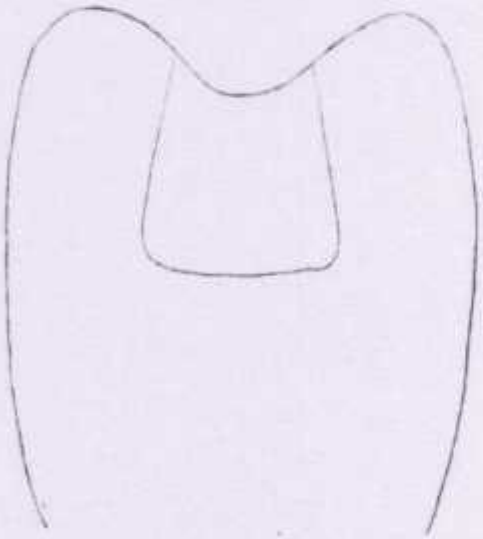

- Occlusal cavity should mesially develop a flare such that

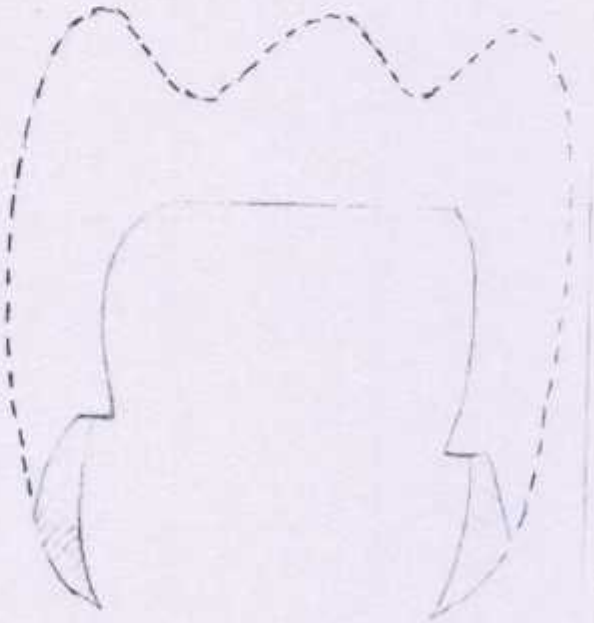

a) The proximal tooth with the adjacent tooth is broken [0.2 mm of buccal and lingual contact; 0.5 mm of gingival contact in molar teeth]

b) Occlusal outline should meet at 90 degree to an imaginary plane drawn on the outer proximal surface forming a butt joint

DENTAL COLLEGE P.O. Manassery Pin 673 ... DR. ANOOJ KUMAR K.P Principal

Principal
KMCT Dental College
Manassery, Mukkam

- Buccal and lingual walls of the proximal box should be parallel to the middle $\frac{1}{3}^{rd}$ of the buccal and lingual surface
- Gingival seat should be flat and perpendicular to long axis of the tooth
- Buccogingival and linguogingival line angle are rounded in the form of an arc
- Axial wall should be
  a) Tapered occluso gingivally and parallel to the DEJ
  b) Bucco lingually convex and parallel to the outer contour
  c) Axio pulpal line angle is rounded
- Gingival cavo surface bevel of 20°
- Retentive groove
  * location - axio buccal and axio lingual line angles
  * Extent - Axio buccal pulpal point angle to axio buccal gingival point angle Similarly on the linguo axial line angle
  * Transition - bisecting the line angle
  * Depth - 2mm

NOTE:

- Factors controlling the flare in a class II amalgam preparation are
  a) The contact with adjacent tooth contact should be broken
  b) obtain a cavosurface bell joint by an imaginary tangent drawn to outer proximal surface
  c) Enamel wall must follow the [illegible] direction

K.M.C.T DENTAL COLLEGE P.O. Manassery Pin 673 602 Mukkam (Kerala) S. India
DR. MANOJ KUMAR. K.P Principal KMCT Dental College Mukkam, Kerala

• Cavosurface bell joint is given for amalgam preparation to improve the resistance form in the tooth and the restoration

• In tooth it removes unsupported tooth structure and the enamel margin follows the enamel rod and direction

• In restoration - the resistance form is got by obtaining adequate bulk to resist masticatory forces, tensile strength of amalgam is low and so tends to fracture of bulk is less

• 20 degree gingival cavosurface bevel is given

a) to follow the enamel rod direction

b) Remove unsupported enamel

36 CLASS I INLAY CAVITY

OUTLINE FORM

External occlusal cavosurface outline
outline form similar to amalgam preparation

DIMENSIONS

- Pulpal floor depth = 5mm from marginal ridge
- Internal buccolingual width = 5mm at the triangular ridge
- External buccolingual width = 6mm at the triangular ridge

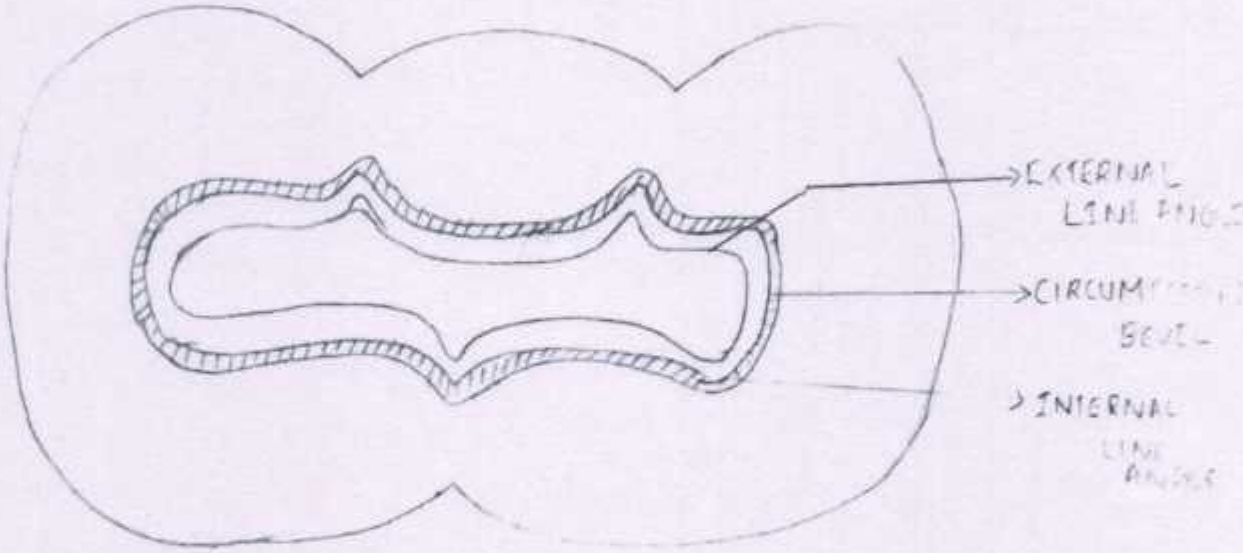

FEATURES

- [illegible] marginal wall: taper away from the long axis of the tooth by [illegible] degrees
- [illegible] gingival - occlusal bevel to obtain 40° in metal, gingival bevel to obtain 30° in metal

CALICUT

COMPOUND CAVITY - 36 CLASS II MESIO OCCLUSAL INLAY CAVITY

OUTLINE FORM

Irregular outline with groove extension half of the distance into the groove from the central groove.

Mesial and distal outline run parallel to the proximal contour and turn away from the outer contour preserving the marginal ridge.

FEATURES

OCCLUSAL CAVITY

① The cavity walls taper occlusaly.

② Primary flare of 45° to the axial wall is given in buccal and lingual walls followed with a 2° flare towards the cavosurface margin.

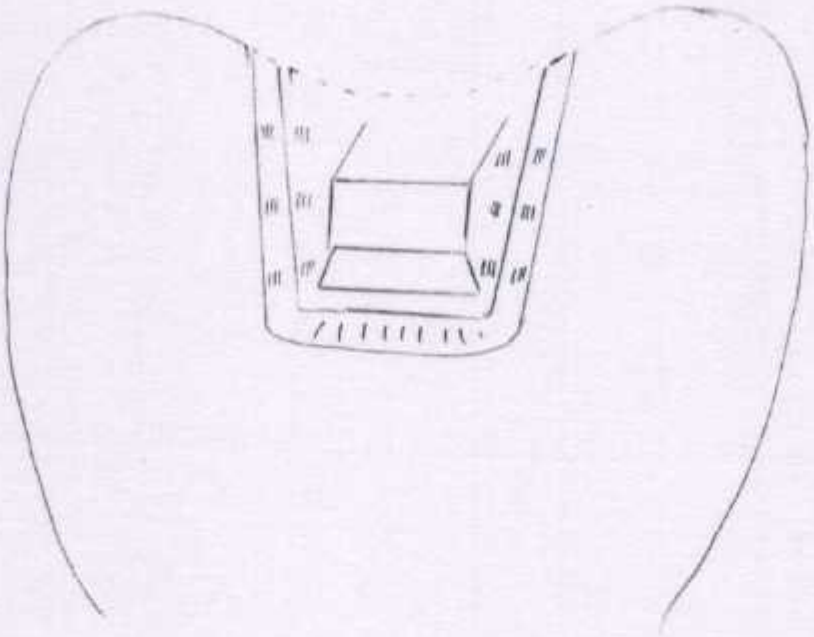

③ Flat gingiva

④ Gingival cavosurface bevel is given

ASSIGNMENT

1) Define Operative Dentistry ?

Operative Dentistry is the art and science of the diagnosis treatment and prognosis of the defects of teeth and that do not require full coverage restoration for correction. Such treatment should result in the restoration of proper tooth form functions aesthetics while maintaining the physiological integrity of tooth in harmonious relations with adjacent hard and soft tissue all of which enhance proper health and welfare of patient

2) Define tooth preparation ?

Tooth preparation is the mechanical alteration of a defective, injured or diseased tooth to receive a restorative material that establishes a healthy state for the tooth including aesthetics, correction where indicated normal forms and functions

3) Define internal wall, external wall line example ?

Internal wall : It is prepared surface that doesn't extend to external tooth surface

Eg: axial wall, Pulpal wall

External wall : It is prepared surface that extend to the external walls.

Define axial wall, pulpal wall, isthumus and cavosurface margin

• Axial wall is an internal wall of prepared cavity that lies parallel to the long axis of the tooth

KMCT DENTAL COLLEGE
P.O. Manassery
Pin 673 602
Mukkam Kozhikode Dt.
Kerala - S. India
CALICUT
DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Mukkam

- Pulpal wall is the internal wall of prepared cavity that is perpendicular to the long axis of the tooth and is occlusal to the pulp
- Isthumus is a narrow space between the occlusal and proximal portion of the cavity (class II)

5) Classify cavities depending on the number of surfaces involved.

1) Simple cavity : Caries occuring only in one surface
2) Compound cavity : Caries involving two surface
3) complex cavity : Caries involving 3 or more tooth surface

6) Classify the dental caries according to GV Black

CLASS I

- Caries on occlusal surface of premolars and molars
- On occlusal 1/3rd of the facial and lingual of molars
- On lingual surface of maxillary incisors

CLASS II

- on the proximal surface of posterior teeth

CLASS III

- Caries on the proximal surface of anterior tooth that do not involve the incisal stage

CLASS IV

- Caries on the proximal surface of the anterior tooth that do involve incisal stage

KMCT DENTAL COLLEGE P.O. Manassery CALICUT
DR. MANOJ KUMAR. K.P Principal KMCT Dental College Manassery, Kozhikode

CLASS V

• Caries in the gingival third of facial or lingual surface of all teeth

CLASS VI

• caries on the incisal edge of anterior teeth or occlusal cusp height of posterior teeth.

7) Enumerate the steps in GV Black's cavity preparation

It involves 2 stages:

STAGE I ⟹ Initial tooth preparation steps

Step-I : outline form and initial depth
Step II : Primary resistance form
Step III : Primary retention form
Step IV : Convenience form

STAGE II ⟹ Final tooth preparation steps

Step V : Removal of any remaining infected dentin or restorative material
Step VI : Pulp protection
Step VII : Procedures for finishing external walls
Step VIII : Final procedures - cleaning, inspecting, desensitizing

5) Define outline form and enumerate the factors and rules governing the outline form

Outline form means placing the cavity margins in the positions they will occupy in the final tooth preparation

DR. MENOJ KUMAR. K.P
for Periodontics
PD Monastery

Enamel walls and margins

Factors:

- Extend of lesion, defect or faulty restoration
- Aesthetics
- occlusal relationships
- Adjacent tooth contour
- Designed cavosurface marginal contouration of proposal restoration

Rules Governing Outline form :-

- Extend the cavity margins into the sound tooth structures involving all caries and friable tooth or old restoration. Margin should be placed in a position to afford good finishing outline should be a smooth and flowing centre
- Avoid margins on extreme eminences like cusp heights and edge grooves
- Extend of outline form should provide convenience form while preserving cuspal and marginal strength.
- Faciolingual extend should be minimized to $\frac{1}{4}^{th}$ of intercuspal distance occlusally.
- Depth of cavity must be 0.2 mm dentin for pit and fissure caries and 0.2-0.8 mm for smooth surface cavity
- In proximal cavities, the margins should clear the contact to the adjacent tooth by 0.5 mm.

KMCT DENTAL COLLEGE
P.G. Monastery
DR. [illegible] KUMAR. K.P
Principal
KMCT College
Mukkam

...re primary resistance form and enumerate the methods employed to obtain the same in an amalgam restoration

Form : It is defined as the shape and form of the preparation walls that best enables the restoration and the tooth to withstand without fracture, masticatory forces delivered principally along the axis of the tooth

Principles :

1) obtain a box form
2) Flat floor that uses perpendicular to the forces of mastication
3) Restrict the restoration extension to external walls to prevent undermining of cusps and ridges [can be extension to minimum of 1/4th of intercuspal distance]
4) Rounding or covering of internal line and point angles
5) Cap weakened cusp and envelope or include weakened tooth within the restoration
6) Provide sufficient thickness or bulk to the restorative material
7) Bond the material to the tooth structure when appropriate
8) Reverse's curve : 90 cavosurface bull point and 20 gingival cavosurface bevel
9) Taper to the mesial and distal axis walls in class I and all the gingival extension

EMCT DENTAL COLLEGE P.O. Manassery Pin 673 602 Mukkam, Calicut Dt Kerala - S. India CALICUT

DR. MANOJ KUMAR. K.P Principal KMCT Dental College Mukkam

10) Define the retention form and enumerate the methods of retention of cavity for silver amalgum.

Definition : It is the shape and form of the conventional preparation that resists displacement and removal of the restoration by tapping or lifting forces

Features :

a) Primary Retention form

i) occlusal convergence
ii) Irregular outline form
iii) occlusal dove tail
iv) Box form with well defined bud rounded line and point angles
v) Smooth and flat walls and floors

b) Secondary Retention form

i) Retentive grooves or lobes
ii) Retentive pins
iii) slots
iv) Caves
v) Adhesive system for bonded amalgum

11) Define convenience form and mention its features in an amalgum preparations ?

CONVENIENCE FORM

It will be the shape and form of preparation that form adequate accessibility, visibility and ease of operation in preparing and restoring the tooth

DR. MANOJ KUMAR. K.P

Features

- Extensive walls to gain adequate access to deeper portions of the cavity
- Placing the proximal contact with adjacent tooth in a class II cavity provide convenience for matrix placement.

2 Name the line angles and point angles of class I and class II cavity within suitable diagrams.

A line angle is a junction of two plane surfaces of different orientation along a line

A point angle is the junction of plane surface of three line angles of different orientation and it's name is from it's involved surfaces or line angles

LINE ANGLES

- Mesio buccal line angle
- Mesio lingual line angle
- Disto buccal line angle
- Disto lingual line angle
- Buccopulpal line angle
- Linguopulpal line angle
- Mesio pulpal line angle
- Distopulpal line angle

POINT ANGLES

- Mesio bucco-pulpal point angle
- Mesio lingual-pulpal point angle
- Disto buccopulpal point angle
- Disto linguo pulpal point angle

line angle & point angle in class I

For class I there are 4 line angles and 4 point angles

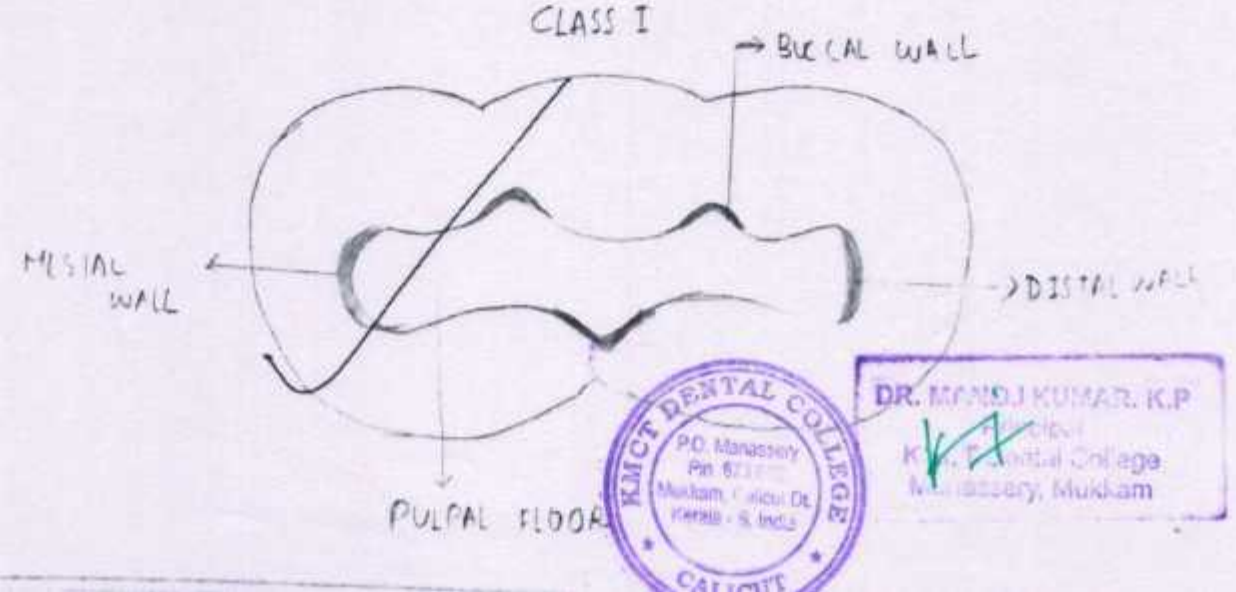

KMCT DENTAL COLLEGE
P.O. Manassery
Kerala - S. India
DR. MANOJ KUMAR. K.P

LINE ANGLES	POINT ANGLES
- Disto facial line angle	- Distofacio pulpal point angle
- Facio palatal line angle	- Axio facio pulpal point angle
- Axio-facial line angle	- Axio facio gingival point angle
- Linguogingival line angle	- Axio linguo pulpal point angle
- Axiogingival line angle	- Axiolinguo gingival point angles
- Axiopulpal line angle	- Distolinguo pulpal point angle
- Axio lingual line angle	
- Disto lingual line angle	
- Distopulpal line angle	

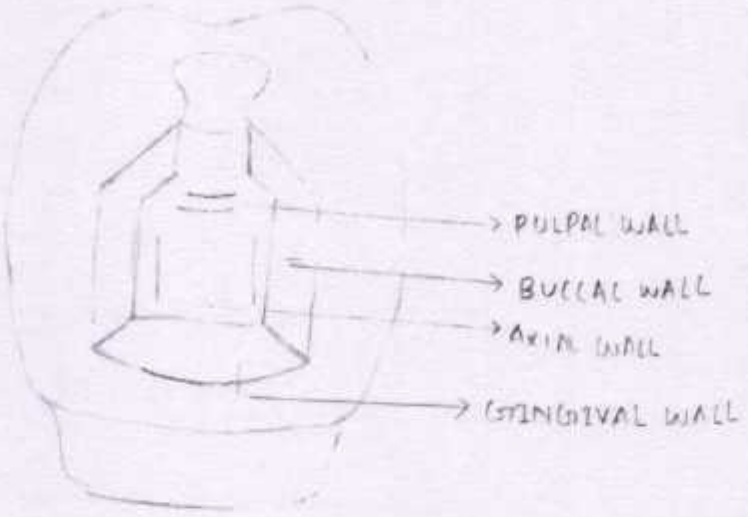

13 What are the features of strongest enamel margin ?

It is formed by the full length enamel rods and is supported on the preparation side by progressive shorter rods on which extend to dentin the cavosurface angle will be greater than 90°.

14 Draw a labelled diagram of class I and class II cavity ?

KMCT DENTAL COLLEGE
P.O. Manassery
Mukkam
DR. MANOJ KUMAR. K.P
K.M.C.T. Dental College
Manassery, Mukkam

15) Define the procedure for finishing of preparation walls ?

Finishing of preparation wall is the further development when indicated of a specific cavosurface design degree of smoothness or roughness that produce the maximum effectiveness of the restorative material being used.

16) what are the objectives for finishing of external walls ?

- To create a best marginal seal between restoration and the tooth
- To obtain smooth marginal junction
- To provide maximum strength to the tooth and restoration

17) what are the principles to be considered during this steps ?

- The cavity walls should follow the enamel and rod direction
- The cavity walls should be placed in the second dentin
- The wall should be smooth
- The cavosurface margin should be 90° except at the gingival cavosurface of the proximal box of a [illegible] preparation where a bevel is given

KMCT DENTAL COLLEGE
P.O. Manassery
Kerala S. India
DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College

18) What is circumferential tie ? what is it's significance ?

It is the peripheral anatomy of class preperation. The margin should be prepared to create a favourable relationship between the casting and luting cement as the weak link in an indirect restoration is the cement lute The features in an intracoronal preparation is in the form of bevel expected away from the preperation.

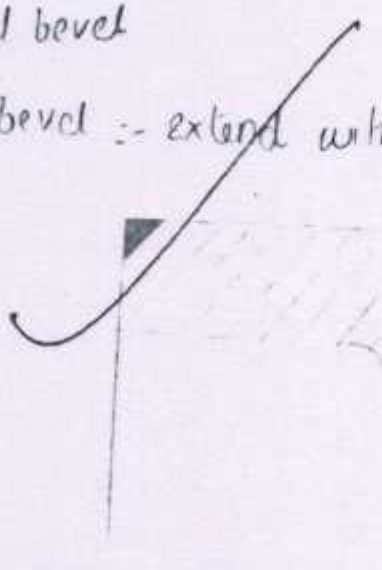

19) what are the principles of tooth preperation for an indirect restoration ?

- Obtaining a single path of insertion and removal (line of draw)
- Concept of taper (2°-5°)
- Circumferential tie

20) What are the different types of bevel ?

* Depending on location :-
  - Gingival bevel
  - Occlusal bevel

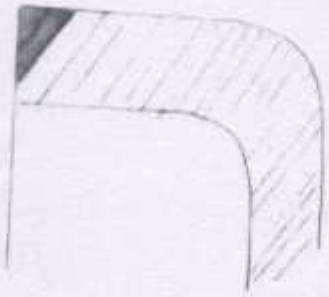

a) Pulpal bevel :- extend within the enamel only

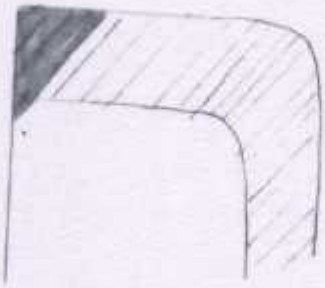

KMCT DENTAL COLLEGE
P.O. Manassery
Pin. 673602
Mukkam, Calicut Dt.
Kerala - S. India
CALICUT

DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Manassery, Mukkam

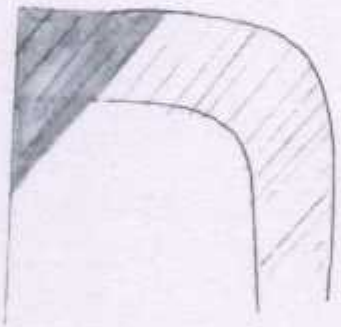

b) Short bevel : Involve the whole enamel length

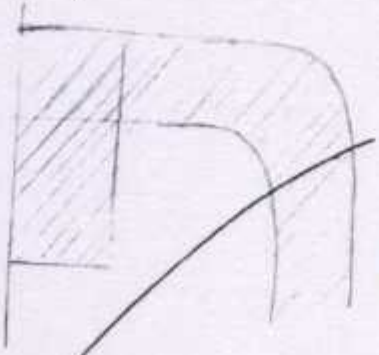

c) Long bevel : Involve all of the enamel wall and partly into dentin

d) Full bevel : Includes all of the dentinal and enamel wall or floor.

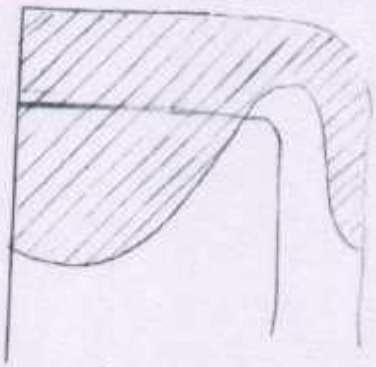

e) Halo ground bevel : when the bevel which usually in the form of a flat plate is prepared in a concave form

f) Contour bevel : when a bevel is [illegible] opposite to an axial cavity wall on the facial or lingual surface of the tooth

KMCT DENTAL COLLEGE
P.O. Manassery
Pin 673 602
Mukkam, Calicut Dt.
Kerala - S. India
CALICUT

DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Manassery, Kozhikode

21) What are the functions of a bevel ?

- Create a strong marginal configuration
- provide retention
- provide an acute angle in the marginal metal which can be burnished protect the cement line
- May be extended to improve surface defects without removing excess tooth material

22) Write the difference between Silver amalgam preparation and cast preparation

SILVER AMALGAM PREPARATION	CAST RESTORATION
• outline form is narrow as there is no involvement and the walls converge occlusally	• outline form is wide as there is more surface involvement and the cavity walls diverge occlusally
• The cavity which is kept at $\frac{1}{4}^{th}$ of intercuspal distance	• The width of the cavity may be increased upto $\frac{1}{3}^{rd}$ of the intercuspal distance
• The occlusal cavosurface angle is 90° to establish a butt joint with amalgam	• The occlusal cavosurface angle is 135° to 145° to achieve a lap sliding fit with the inlay

KIMS DENTAL COLLEGE PO Manassery Mukkam Calicut Dt. Kerala CALICUT
DR. MANOJKUMAR K.P KIMS Dental College Manassery, Mukkam

• Burs used are No 245 and No : 330	• Burs used are No: 271 and No 169
• Gingival bevel is in the range of 15° to 20°	• Gingival bevel is steeper and is in the range of 25° to 35° This help to minimise the cement line
• Undercuts in the preparation improve retention of the restoration	• No undercuts should be present in the preparation
• Proximally, minimum clearance is provided not more than 0.5 mm from the adjacent tooth	• Proximally more clearance may be accepted
• Ideally gingival seat should be located supragingivally	• Subgingival extension of the gingival seat is acceptable
• Secondary retention is provided by grooves, slots, pins and amalgam pins	• Secondary retention is provided by grooves, slots, internal bevel, skirts, collars and reverse bevel
• Proximal walls are only provided with a primary flare	• The proximal margins show primary and secondary flare
• Internal line angles are rounded	• Internal line angles are well defined
• Reverse curve may be present in proximal outline	• Reverse curve is not provided in the proximal outline
• Beveling is done by only on the gingival cavosurface margin to remove unsupported enamel	• Bevels are done at the occlusal and gingival cavosurface margins to [illegible]

ASSIGNMENT

1 Name the parts of hand cutting instruments and explain instrument formula with example

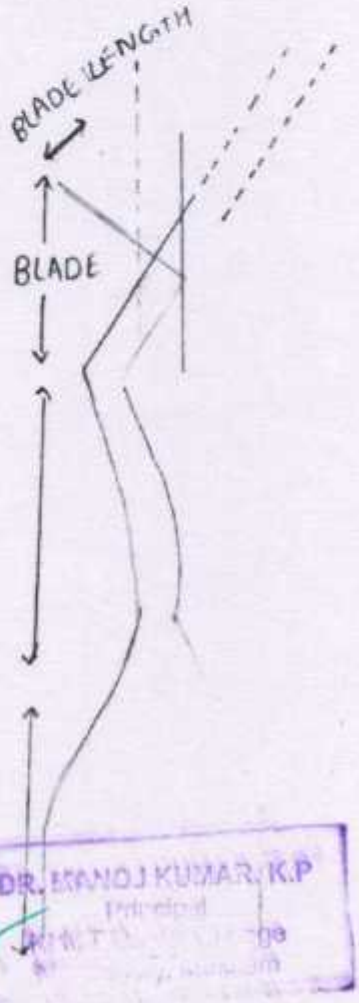

Most hand cutting instruments are composed of three parts

1) Handle or shaft
2) Shank
3) Blade

Cutting instruments have formula describing the dimensions and angles of the working end These are placed on the handle using a code of three or four members separated by dashes or spaces

FIRST NUMBER : The first number indicates the width of the blade or primary cutting edges in tenths of a millimeter

SECOND NUMBER : The second number of a four number code indicates the primary cutting edge angles measured from the parallel to the long axis of the instrument, handle in clockwise centigrade

THIRD NUMBER : (second number in three number code) represents the length of the blade on millimeter that is from shank to the cutting edge

FOURTH NUMBER : (third number in three number code) represents the angle which the blade forms with the long axis of the handle or plane of instrument.

3 List the difference between Gingival Marginal Trimmer and Enamel Hatchet

ENAMEL HATCHET	GINGIVAL MARGINAL TRIMMER
* It have a straight blade which makes it a single plane instrument	* The blade curved, which make it a double plane instruments and enhances lateral scrapping motion
* The cutting edge is in plane parallel to the long axis of the handle	* The cutting edge of the GMT is not at 90° to the axis of the blade.
* It is available as right and left type	* Right, left, mesial and distal blunted types are available
* used for cleaving enamel and planning the distal walls so as to have sharp outline of the preparations	* used for planning of gingival cavosurface margin that is removal of unsupported enamel and to bond axiopulpal line angle in the class II

7. List the difference between monoangle chisel and hoes

DENTAL COLLEGE CALICUT
DR. MANOJ KUMAR. K.P
Principal

MONOANGLE CHISEL	HOES
* The primary cutting edge is in a plane perpendicular to long axis of shaft	* Dental hoe resembles a garden hoe
* By definition chisel is an instrument where the blade makes upto 125° angle with the planes of the instruments	* By definition it's any instrument where the blade makes more than 12.5° angle with the plane of an instruments
* They are used to push or pull for anterior proximal restorations, smoothening proximal walls	* Usually the blades make 45-90° angle to the long axis of handle * It's shank can have one or more angles

6) List the difference between hoe and ordinary hatchet

HOE	ORDINARY HATCHET
* Resembles miniature garden hoe	* Ordinary hatchet excavator is a bevelled instrument
* Blade makes more than 12.5° angle with the plane of instrument	* Blade is disordered in the same plane or that as long axis of the handle
* The blade usually makes 45-90° angle to the long axis of handle	* used for preparing and sharpening line angles and anterior tooth
* Shank can have one or more angles

6 Mention the various devices and materials used for sharpening hand instruments

1. Stationary sharpening stones
2. Mechanical sharpeners
3. Handpiece sharpening stones

STATIONERY SHARPENING STONES

- The most frequently used sharpening equipment consists of a block or [illegible] of abrasive material called a 'stone'
- The stone is supported on a firm surface and the instrument is [illegible] and held by hand while being stroked against the stone surface
- Stationary stones are often called 'oilstones' because of the common practice of applying a coating of oil to them as an aid to the sharpening process
- Sharpening stones are available in a variety of grits, shapes and materials

* Grits	* Shapes	* Materials
i) Coarse	i) Flat	i) Arkansas stone
ii) Medium	ii) Grooved	ii) Silicon carbide
iii) Fine	iii) cylindrical	iii) Aluminium oxide
	iv) Tapered	iv) Diamond

MECHANICAL SHARPENERS

- Rx honing machine

HAND PIECE SHARPENING STONES

- Mounted silicon carbide stones
- Mounted aluminium oxide stones

KMCT DENTAL COLLEGE P.O. Manassery Pin. 673 [illegible] Mukkam, Calicut Dt. Kerala, S. India CALICUT

DR. MANOJ KUMAR. K.P Principal KMCT Dental College

2) classify rotary instrument according to speed and write their uses :

The rotational speed of an instrument is measured in revolution per minute (rpm) Rotary speeds in dentistry is classified as follows

1) ACCORDING TO STURDEVANT

- Low or slow speeds (< 12,000 rpm)
- Medium or intermediate speeds (12,000 - 200000 rpm)
- High or ultra high speed (> 200,000 rpm)

2) ACCORDING TO HARZOUK

- Ultra low speed 300 - 3000 rpm
- Low speed 3000 - 6000 rpm
- Medium high speed 20,000 - 45000 rpm
- High speed 45 000 - 100 000 rpm
- Ultra high speed > 100 000 rpm

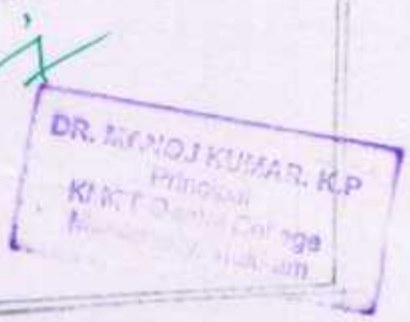

The low speed range is used for :

- cleaning teeth
- occasional caries excavation
- finishing and polishing procedures

The high speed range is used for

- Tooth preparation
- old restoration removal

8 What are the advantages and disadvantages of high speed

ADVANTAGES	DISADVANTAGES
• Diamond and carbide cutting instruments remove tooth structure faster with less pressure vibration and heat generation • The number of rotary cutting instruments needed is reduced because smaller sizes are more universal in application • The operator has better control and greater ease of operation • Instruments last longer • Patients are generally less apprehensive because annoying vibrations and operating time are decreased • Several teeth in the same arch can and should be treated at the same appointment	• More heat production • Not fit for larger preparation • preparation can cause operator fatigue

KMCT DENTAL COLLEGE
P.O. Manassery
Pin 673
Kerala - S. India
CALICUT

7. Write the disadvantages of slow speed

- Ineffective cutting
- Time consuming
- Operator fatigue
- Produce patient discomfort

DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College

Enumerate the steps of tooth preparation

Tooth preparation is divided into two stages

STAGE 1

INITIAL TOOTH PREPARATION STAGES

1.) Outline form and initial depth
2) Primary resistance form
3) Primary retention form
4) convenience form

FINAL TOOTH PREPARATION STAGES

5) Removal of any remaining infected dentin and old restorative material
6) Pulp protection
7) Secondary resistance and retention forms
8) Procedures for finishing external walls
9) Final procedures of cleansing, inspecting and sealing

II FUNCTIONS OF BASE

- Bases are used to provide thermal protection for the pulp and to supplement mechanical support for the restoration by distributing local stresses from the restoration onto the underlying dentinal surface
- To withstand the force of condensation of restoration material
- Shock absorber

KMC DENTAL COLLEGE PO Manassery Pin 673 Mukkam Kerala - S. India CALICUT
DR. MANOJ KUMAR K.P

- To substitute dentin in deep cavities

  Eg: zinc phosphate cement under Amalgam restoration

- To serve as an intermediate bonding material between the tooth and composite restoration

  Eg: GIC in sandwich techniques

- To prevent the ingress of bacteria and their noxious products into dentinal tubules through microleakage

12 Enumerate the functions of a liner?

i) To serve as a physical barrier to ingress of bacteria/bacterial products

ii) To produce therapeutic effect such as antibacterial, anticariogenic or pulpal anodyne effect (to relieve pulpal pain)

iii) To provide a barrier for protection of the pulp from residual reactants diffusing out of a restoration

iv) To prevent oral fluids that may penetrate leaky restoration from reaching the pulp through dentin

v) To contribute to some initial identical and thermal insulation when used under metallic restorations

13 What are the actions of calcium hydroxide

- Calcium hydroxide has excellent pulpal compatibility and stimulate reparative dentin formation.

- Reduction in the inflammation due to antibacterial effect of the ions responsible for the mineralisation of dentin bridge

- Calcium ion responsible for reducing the

KMCT DENTAL COLLEGE P.O. Manassery Mukkam, Calicut Dt. Kerala - S. India CALICUT

DR. PRAVIN KUMAR K.P

serum flow and thus by create a conductive atmosphere for mineralisation

- Hydroxyl ions for cement neutralise the acids produced by the osteoblasts and create a optimum pH for pyrophosphatase activity necessary for mineralisation.

What are the actions of Zinc Oxide Eugenol ?

- soothing action on pulpal tissues.
- eugenol has topical anaesthetic properties. Therefore termed as obtundent material
- provides excellent thermal insulation when used as a base
- Good short term sealing
- Good thermal insulators.

What are the factors affecting the selection of a pulp protecting agent ?

- It should provide thermal protection against temperature changes
- Electrical protection against galvanic shock
- Mechanical protection during various restorative procedures
- chemical protection from toxic components
- Protection from microleakage interface between tooth and restoration
- It should be biologically and chemically compatible
- It should not discolour either the restoration or the tooth
- It should maintain the dentin thickness between floor of both pulpal chamber and the pulpal chamber is one of the most important

GOVT DENTAL COLLEGE CALICUT PO Malaparamba Kerala - S. India
DR. HARIKUMAR, K.P Principal

16 Classify matrices

I) Depending upon their method of retention

a) Mechanical retained :

Eg: Ivory matrix retainers No:1 and Tofflemire universal dental matrix band retainer.

b) Self retained

Eg: copper or stainless steel bands, auto matrices

II) Depending upon its preparation

a) Mechanical matrix :

Eg Ivory matrix retainers No·1 and 8

b) Anatomic / custom made matrix

Eg: Compound supported

III) On the basis of transparency :

a) Transparent matrices

Eg - celluphale, celluloid.

b) Non transparent matrices

Eg Stainless steel

IV) Depending upon the tooth preparation for which they are used

TYPE OF PREPARATION	MATRICES AND RETAINERS
- Class II tooth preparation	• Ivory number 1 • Nyhomes retainers

DENTAL COLLEGE PO Mission Pin 673 Malappuram, Kerala - S. India

DR. MANOJ KUMAR. K.P Principal

TYPE OF PREPARATION	MATRICES AND RETAINERS
- class II mesio occlusal distal tooth preparation	• Ivory matrix number 8 • Tofflemire matrix • Steels sloved and self adjusting matrix • Anatomical matrix band • Retainerless matrix
- Class III tooth preparation	• S shaped matrix band • Cellophane matrix strips • Ugly strips
- class IV tooth preparation	• plastic strips • Aluminium foil • Transparent acetate • Anatomic matrix

Enumerate the ideal requirements and dimensions of matrix ?

Requirement of a matrix band :

i) RIGIDITY : The matrix band should be rigid enough so as to withstand the pressures of condensation applied during restoration placement and maintain its shape during hardening.

ii) ADAPTABILITY : The matrix band should be able to match to almost any size and shape of tooth

iii) EASY TO USE : The band should be simple in design so that it does not cause any difficulty to the patient or hinder the operator during

DR. SANTHOSH KUMAR. K.P
Principal
Govt. Dental College
Kozhikode, Kerala

restoration of the tooth.

4) It should be able to displace the gingiva and rubber dam for ease in working

5) NON REACTIVE : It should be inert to tissues and the restorative material

6) HEIGHT AND CONTOUR :- The matrix band should not extend more than 2mm beyond the occlusogingival height of the crown of tooth this facilitates vision and speed up working. The matrix band helps in the formation of a physiologic proximal contact relationship

7) APPLICATION :- The matrix band should be such that it can be applied and removed easily

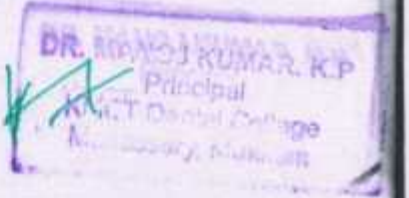

8) STERILISATION :

It should be inexpensive

DIMENSIONS OF A MATRIX BAND

- Material range in width from 5.35mm (1/4") to 9.25 mm (3/8") for permanent teeth and 3.775 mm (1/8") to 7.9375 mm (5/16") for deciduous teeth
- Thickness may range between 0.381 mm (0.0015") to 0.0508 mm (0.002")
- Matrix band should extend 2mm above the marginal ridge height and 1mm below gingival margin of the preparation.

What are the functions of wedges ?

wedges are used to

i) Prevent gingival overhangs of restorations

ii) Separate teeth to compensate for the thickness of the matrix band

iii) Stabilize the matrix band and retainer

iv) Retract the rubber dam from gingival margin to control bleeding and moisture

v) Helps in depressing rubber dam in interproximal area

vi) Helps in retracting and depressing the interproximal gingival area thus helping in minimising trauma to soft tissue.

vii) Provides close adaptability in cervical portion of proximal restoration thereby achieving correct contour and shape of cervical areas.

19) Write the methods of wedging with diagrams ?

1. Double wedging

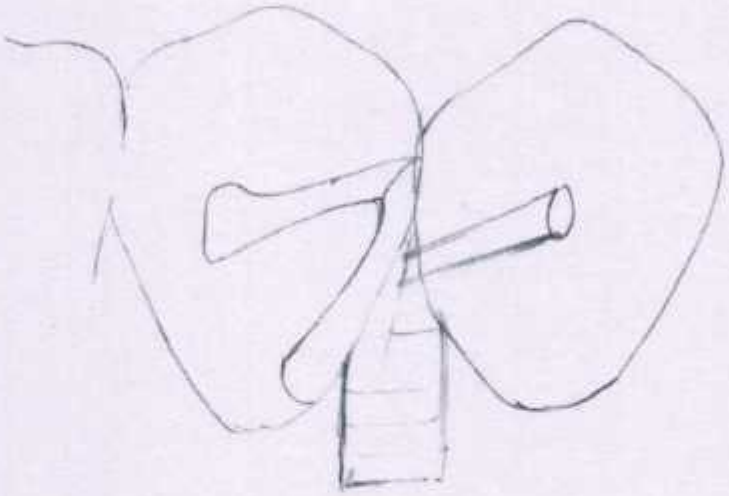

- Two wedges are used in one is inserted from buccal embrasure and another is inserted from lingual embrasure
- This technique is indicated in following cases.
  - Spacing between adjacent teeth when single wedging is not sufficient
  - wedging of proximal box in buccolingual dimension

→ COMPOUND FOR SUPPORTING WEDGES

KMCT DENTAL COLLEGE
P.O. Manassery
Mukkam, Kerala - S. India
CALICUT
DR. VINOJ KUMAR. K.P
Principal
KMCT Dental College

2) Wedge wedging
- In this technique, two wedges are used
- one wedge is inserted from lingual embrasure and another is inserted between the wedge and matrix band at right angle to first wedge
- primarily indicated while treating mesial aspect of maxillary first premolar.
- These are indicated in upper first pumolar because of presence of plate in root near the gingival area

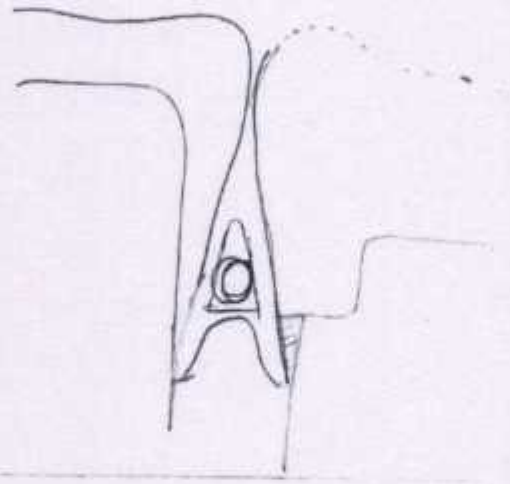

3) Piggy back wedging
- In this technique two wedges are used
- one (large) wedge is inserted & used normaly, while the other smaller wedge (piggy back) is inserted above the larger one
- It is indicated in cases of shallow proximal box with gingival recession.
- This technique provides closer adaptation and contour of the matrix band

K.M.C.T. DENTAL COLLEGE
P.O. Manassery
Pin 673 602
Mukkam, Calicut Dt.
Kerala - S. India
CALICUT
DR. MANOJ KUMAR. K.P
Principal
K.M.C.T. Dental College

4) Triangular v/s round wedge

- The round tooth pick wedge is usually the wedge of choice with conservative proximal boxes, however because its wedging action is more occlusal
- Triangular wedge is recommended for
  * preparation with a deep gingival margin
  * with the tofflemire mesio-occluso-distal matrix band
  * when the gingival margin is deep (cervically), the base of the triangular wedge more readily engages the tooth gingival to the margin without causing excessive soft tissue displacement

20) classify separators ?

A) Principles used in rapid separator :-

I) Transition principle :-

a) Ferrie double blow separator

b) Non interfering true separator

II wedge principle :

a) Elliot separator

b) wedges

B) Based on the method of separation

a) slow separation → Seperation should not exued more than 2.5 mm

Separators used are

KMCT DENTAL COLLEGE
PO Mimmary
Kozhikode, Calicut Dt
Kerala - 6, India
CALICUT

DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College

Separating wire
orthodontic appliances
wood or rubber
Methods for achieving slow separation

(1) separating rubber ring bands
(2) Rubber dam shut
(3) Ligature wire / copper wire
(4) Gutta percha stick
(5) Oversized temporary crown
(6) Fixed orthodontic prosthesis

21) what are the objectives and methods of condensation ?

Objectives :-

- Being excess material on the surface of restoration
- Reduces the number and sizes of voides in restoration
- Prepare the surface of restoration for carving adapt analysis to the prepared wall and floor

Methods of condensation :

- A smaller condensation is used while filling the preparation larger or

Each portion is thoroughly condensing prior to the placement to the next investment

- Each condensing stroke should overlap the previous in condensing stroke to ensure that the entire mass is well condensed.
- The preparation should be overpacked more using heavy pressure ensures the cavosurface margin are completely covered with well amalgam. Final condensation covers cavosurface margin should be perpendicular to the internal enamel and adjacent to the margin

CALICUT DENTAL COLLEGE
DR. MINOJ KUMAR K.P

22) what are the types of burnishing and menhon it's objective

Types

1) Pre cave burnishing :- obtain a rough anatomy of tooth, remove voids its a form of condensahon to improve the benefits of condensahon It provides a dense analogues of the margin of occlusal preparation restored with high copper amalgam and initiali carving

2) Post cave burnishing :- Due to improve smoothness and produce a shiny appearance

Objectives

- Adapt the amalgam well to cavosurface margin
- As a continuahon of condensahon to reduce voids
- To bring out excess mercury to the surface
- To produce smooth and shiny surface of restoration

23) what are the types and causes for failure seen in amalgam restoration

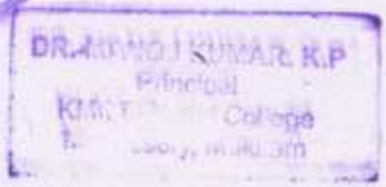

Types :

Fracture lines
Marginal ditching
Proximal overhang
Poor anatomic contour
Marginal ridge incompatibility
Improper proximal contour
Recurrent caries
Voids
Poor occlusal contact

Causes

- Poor case selection
- Defective tooth preparation
- Defective amalgam manipulation

- Defective matrix adaptation
- Post restorative failures

24) what are the principles and sequence of carving of amalgam?

- with care, sharp discoid-cleoid corners of suitable sizes are recommended for carving which may begin immediately after condensation
- The larger end of the discoid-cleoid instrument is used first followed by the smaller instrument in region not accessible to the large instrument. alternatively the Hollen back carver can be used.
- Deep occlusal grooves should not be carved slightly deeper than proximal marginal ridges.

25) what are the objectives of cavosurface bevel in composites?

- Increases the micromechanical bonding between tooth surface
- Reduces polymerization shrinkage
- Bevel merges the restoration to tooth surface which enhances the aesthetics

26) what are the difference between affected and infected dentin

INFECTED DENTIN	AFFECTED DENTIN
• It is a superficial layer of demineralised dentin	• It is a deeper layer
• cannot be remineralized	• Can be remineralized
• lacks sensation	• It is sensitive

KMCT DENTAL COLLEGE P.O. Manassery Mukkam, Kerala
DR. ANOOP KUMAR. K.P Principal KMCT Dental College

INFECTED DENTIN	AFFECTED DENTIN
• Intertubular layer is demineralized with regularly scattered crystals • Collagen fibers are broken down appear as only indistinct cross bands • It can be stained with 0.2% propylene glycol 10% acid red solution 0.5% basic solution	• Intertubular layer is only partly demineralized. • Distinct cross bands are present • It cannot be stained with any solution

26) Explain direct and indirect pulp caping ?

Indirect pulp caping

It is the procedure performed in a tooth with deep carious lesions adjacent to the pulp

- In this procedure all infected carious dentin is removed except soft undiscoloured carious dentin which lies adjacent to the pulp.
- Caries near the pulp is left in place to avoid pulp exposure and preparation is covered with biocompatible material.

Indications

1) Deep carious lesions near the pulp tissues but not involving it
2) No mobility of tooth
3) No history of spontaneous tooth ache
4) No tenderness to percussion
5) No radiographic evidence of pulp pathology

KMCT DENTAL COLLEGE
P.O. Manassery
Pin 673 602
Mukkam, Calicut Dt.
Kerala - S. India
CALICUT

DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Manassery, Mukkam

Contraindication

- Presence of pulp exposure
- Radiographic evidence of pulp pathology
- History of spontaneous toothache
- Tooth sensitive to percussion
- Mobility present

Clinical technique

- Band the teeth if tooth is grossly decayed
- Anasthetize the tooth
- Apply rubber dam to isolate the tooth
- Remove soft caries either with spoon excavator or round bur.
- A thin layer of dentin and some amount of caries is left to avoid exposure
- Place calcium hydroxide paste on the exposed dentin
- Cover the calcium hydroxide with zinc oxide eugenol base
- If restoration is to be given for a longer time, then amalgam restoration should be given
- Tooth should be evaluated after 6-8 weeks.
- After 2 to 3 months remove the cement and evaluate the tooth preparation If due to remineralization or formation of secondary dentin, the soft dentin has become hard then remove any residual soft debris and finally give protective cement base and place the permanent restorative material

The success of indirect pulp capping.

- Age of the patient
- Size of the patient
- Restorative procedure
- Evidence of pulp vitality

ANNAI DENTAL COLLEGE
P.O. Manassery
Pin 673 602
Mukkam, Calicut Dt.
Kerala - S. India
CALICUT
DR. MANOJ KUMAR. K.P
Principal
K.M.C.T Dental College
Manassery, Mukkam

Direct pulp capping

Direct pulp capping procedure involves the placement of biocompatible material over the size of pulp exposure to maintain vitality and promote healing.

Indications

- Small mechanical exposure of pulp during
  - Tooth preparation
  - Traumatic injury
- No or minimal bleeding at the exposure site

Contraindications

- Wide pulp exposure
- Radiographic evidence of pulp pathology
- History of spontaneous pain
- Presence of bleeding at exposure site

Clinical procedure :

- Administer local anaesthesia
- Isolate the tooth with rubber dam.
- When vital and healthy pulp is exposed, check the fresh bleeding at exposure site
- clean the area with distilled water or saline solution and then dry it with a cotton pellet
- Apply calcium hydroxide over the exposed area
- Use interim restoration such as zinc oxide eugenol for 6 to 8 week.

DR. AJAYOJ KUMAR. K.P
Principal
KMCT Dental College

Success depends on

- Age of the patient
- Type of exposure
- Size of the exposure
- History of pain

---

27) Define pulpotomy write the material used for pulpotomy procedure

Surgical removal of the entire coronal pulp leaving vital tissues in the canals followed by placement of a medicament or dressing over the remaining pulp stump in an attempt to promote healing and retention of the vital tissue

Materials used :

- Electro
- Laser
- formocresol
- glutaraldehyde
- Ferrous sulphate
- Calcium hydroxide

28) Name different methods of moisture control

- Direct methods
  - → cotton dam
  - → Absorbent materials (cotton rolls and cellulose wafers)
  - → low volume evacuator
  - → High volume evacuator
  - → Air way syringe
  - → Thermal shield

GENERAL INSTRUCTIONS

1. Bring this record book to all practical classes and the record must be kept neat and in good condition.
2. Credit will be given to the records kept neat and submitted in time.
3. Students should wear apron with identity cards while working in the laboratories.
4. After doing the practical's, record your observations and results in the book. Write a relevant inference to the experiment.
5. Submit the record book complete with observations, discussions, diagrams and calculations for valuation when you come to the next practical examinations.
6. Marks will be awarded for the records during practical examinations.
7. Unnecessary wastage of water, gas or any other materials should be avoided.
8. Containers of materials / chemicals must be kept closed in their proper places when not in use.
9. Excess or waste materials must be thrown into the waste bins and should not be thrown into the sink.
10. Students should enter the laboratories with ail the required instruments. Borrowing will not be permitted.
11. Equipment's borrowed from the departments should be returned before leaving the laboratory.
12. Students should keep the laboratory neat and tidy and should not cause any damage to the furniture, equipment's etc.
13. Student is liable to replace or compensate for the equipment that is lost or damaged.
14. Strict discipline should be maintained while working in the laboratory

STUDENTS DECLARATION

I have carefully read the above rules and undertake to abide by them.

A field visit to MILMA Dairy Plant, Peringalom, was organized for Final year part I and third year students. The field visit was organized by the Department of Public Health Dentistry in collaboration with MILMA Dairy Cooperative Society. This visit was organized in order to help the students understand the process of milk purification as a first step in prevention of Milk borne diseases. A total of 80 students both Part I and Third year students participated for the field visit over two days on 22nd and 23rd December 2021 from 10 am to 1 pm. Dr DhanyaMuralidharan and Dr Arun Paul, faculty from Department of Public Health Dentistry accompanied the students on the two days. They were given detailed explanation of milk purification by the MILMA officers and had first-hand experience of the processing and purification unit within in the Dairy plant. In addition they were also shown the ice cream and curd processing unit too. The Production manager also gave a talk and enlightened the students on the historical back ground of MILMA Dairy development. The visit concluded at 1 pm. Students gave valuable feed-back about their field visit to MILMA Dairy plant. A field visit study report was submitted by the students who participated.

PALLIATIVE CARE INTERNSHIP PROGRAMME AT INSTITUTE OF PALLIATIVE MEDICINE, KOZHIKODE- November 28th 2021

A special program for interns **'Palliative Care Internship Program'** was initiated by the **Dept**of **Public Health Dentistry**, KMCT Dental College. The program was initiated in collaboration with **Institute of Palliative Medicine, Kozhikode**, a WHO recognized center providing palliative care. The program intended to provide the interns an opportunity to get exposure and training in Community based palliative care. On 28th November 2021 the fresh batch of 75 Interns during their clinical posting in Dept of Public Health Dentistry, were posted for a period of one week at Institute of Palliative Medicine, Kozhikode, on rotation. The program included discussions, O.P and I.P care for patients, Home visits with palliative care team, Volunteer services, News breaking and other interactive sessions designed to help students understand their role in alleviating the difficulties of terminally ill and chronically debilitated persons. A total of 13 students completed their postings at IPM as on 31st December 2021.

Children and adults with impairments and special needs are more vulnerable to health issues, require additional assistance, and rely on others to attain and maintain good health. One of their most critical health demands is a clean mouth, which will be influenced by your capacity to provide the appropriate support. Many parents/caregivers of people with special needs, on the other hand, lack sufficient knowledge or understanding of special care dentistry and homecare regimens for these people, putting them at greater risk of poor oral health outcomes. An informative session on oral hygiene awareness was taken by Dr. Marium Raheema (Professor, Dept of Pedodontics & Preventive Dentistry). The team included a staff, PG, Interns, Final year Part I students and demonstrated oral hygiene and brushing techniques to the caretakers & inmates of the institution. A total of 5 caretakers and 12 inmates were benefitted by the informative session.

NSS SPECIAL CAMP AT GOVT TRIBAL LP SCHOOL, KOOMBARA AND HIRA PUBLIC SCHOOL on 27th to 29th 2019

SPECIAL DAY NSS CAMPING: Special Camping forms an integral part of National Service Scheme. It has special appeal to the youth as it provides unique opportunities to the students for group living, collective experience sharing and constant interaction with community.

The volunteers participated enthusiastically in the camp under the supervision of Dr Arun Paul (Programme officer), Dr Ashiq (senior lecturer) and Dr Anjana (Tutor) and Dr Priyadarshini (Tutor)

NSS KMCT Dental college, NSS unit conducted special camp for the period of 2018-19 from February 7th to 10th 2019 and later on December 27th to 29th 2019.

The special camp was split into two sessions as one session of 4 days at Government Tribal LP school, Koombara, Koodaranji panchayath and another session of 3 days at HIRA public school, Mukkam.

A group of energetic 47 volunteers enthusiastically participated in the special camp. The location Koodaranji was selected because the many wards in the panchayath was affected by the 2018 landslides, many homes were devastated and lost the agricultural lands which were the sole mode of income for those families.

Everyone is susceptible to common oral disorders. For children and adults with unique health care needs, however, these typical oral disorders can be considerably more challenging. Children and adults with special needs are more likely to experience oral problems. Oral health concerns tend to worsen if dental care is postponed. In the long run, it is not uncommon for these people to require extensive dental care as a result of their poor oral hygiene. A session on oral health awareness was taken by Dr. Rohit Mohan (Senior Lecturer, Dept of Oral Pathology & Microbiology). The team included a 1 staff and 6 PG's, Interns, Final year Part I students and demonstrated measures to improve oral hygiene to the caretakers & inmates of the institution. A total of 7 caretakers and 22 inmates were benefitted by the interactive session.

PALLIATIVE CARE INTERNSHIP PROGRAMME AT INSTITUTE OF PALLIATIVE MEDICINE, KOZHIKODE- August 2nd 2019

A special program for interns **'Palliative Care Internship Program'** was initiated by the **Dept**of **Public Health Dentistry**, KMCT Dental College. The program was initiated in collaboration with **Institute of Palliative Medicine, Kozhikode**, a WHO recognized center providing palliative care. The program intended to provide the interns an opportunity to get exposure and training in Community based palliative care. On August 2nd 2019 the fresh batch of 67 Interns during their clinical posting in Dept of Public Health Dentistry, were posted for a period of one week at Institute of Palliative Medicine, Kozhikode, on rotation. The program included discussions, O.P and I.P care for patients, Home visits with palliative care team, Volunteer services, News breaking and other interactive sessions designed to help students understand their role in alleviating the difficulties of terminally ill and chronically debilitated persons.

WORLD ENVIRONMENT DAY: 05/06/2019

The National Service Scheme of **KMCT Dental College** together with the **Mukkam Municipality** took the initiative to start a **project to plant 1000 saplings** in various wards of municipality for a period of 1 year. Dr Manoj Kumar KP, Principal KMCT Dental college welcomed the dignitaries, staffs, students, house surgeons, non teaching staffs and patients to the occasion. The programme was inaugurated by Mr George M Thomas ,MLA, he talked about the awareness people should have towards improving the ecosystem. The official function was followed by planting of saplings (Plumeria, Guava) at college campus by Mr George M Thomas, MLA, Municipal chairman, the Principal, NSS programme Officer, Heads of Departments and NSS volunteers. All saplings were fenced and labelled. 100 students and 4 staff participated in the programme.

PERIPHERAL SATELLITE CENTER POSTINGS OF INTERNS FOR COMPREHENSIVE DENTAL CARE FOR COMMUNITY- June 2nd 2019

Each batch of interns during their clinical posting in the Department of Public Health Dentistry are posted in the Satellite centers of Mavoor and Meenchanda of KMCT Dental College. All the interns are posted for a period of 1 to weeks at these centers on rotation. The Satellite center posting is meant to help interns receive additional clinical training and exposure as well as training in provision of comprehensive Dental Care for the community. The focus of this care is for rural community who have limited access to Dental Care. On June 2nd2019 the current batch of 73 interns began their postings at these centers on rotation. They are guided by deputed BDS and MDS faculty from the Department of Public Health Dentistry posted in these centers.

WORLD NO TOBACCO DAY: 31/05/2019

The **Dept. Of Public Health Dentistry** commemorated World No Tobacco Day by organizing a field visit for students and awareness class to the patients at MVR Cancer centre, Vellalasseri, Kozhikode. The function was inaugurated by Mr Raveendran a cancer survivor. The interns of KMCT Dental College gave a public **awareness talk** to the outpatients, bystanders and hospital staff regarding harmful effects of Tobacco, Alcohol and newer substance abuse. The amount of dependence these substances produce on individual, and the financial and social debt a family has to undergo was explained by the students. An initiative was started to make the hospital **Tobacco free zone**. A **No Tobacco pledge** was taken by students, faculty of KMCT Dental College and MVR Cancer center. The NSS students attended lectures by Dr.Dinesh Makuny, H.O.D, Radiation oncology, on insights to radiotherapeutic management of cancer patients. An interactive session by Mr Shameem of Psychosocial oncology department on tobacco cessation counselling was taken. Students were trained for giving counselling to a patient at their clinics. A visit to day care chemotherapy units and radiotherapy units were organised. 52 students and 3 staff participated in the programme.

Dept of Public health Dentistry commemorated 'World oral health day' on March 20 at "Aakashaparavakkal" Pullurumpara rehabilitation centre and old age home for ladies. It is a center for discarded ailing elderly ladies. There are 67 elderly lady inmates staying in the rehabilitation centre. A dental screening camp conducted last year by Department of Public Health Dentistry, revealed high prevalence of Oral diseases among the inmates as well as shortage of basic necessary infrastructure in the institutes.

The Program began with a silent prayer and Dr Dhanya Muralidharan, H.O.D, Department of Public Health Dentistry welcomed the gathering. Vice Principal Dr Nizarosiyo, spoke about importance of World Oral Health Day. The programme was inaugurated by Mr. George M Thomas, MLA by distribution of "**oral health kit**". The inaugural programme was followed by cultural programmes conducted by students including awareness skits, songs and dance. As a generous gesture KMCT Management **donated tables** for the inmates which was handed over by the Panchayath President. Staffs and house surgeons of Public health dentistry department organised a **treatment camp** for the inmates of Aakashaparavakkal. 50 students and 3 staff participated in the programme

TRIBAL DENTAL HEALTH CAMP AT GOVT LP SCHOOL KOOMBARA ON 8TH TO 10TH FEBRUARY 2019

NSS SPECIAL CAMP 2019

SPECIAL DAY NSS CAMPING: Special Camping forms an integral part of National Service Scheme. It has special appeal to the youth as it provides unique opportunities to the students for group living, collective experience sharing and constant interaction with community.

The volunteers participated enthusiastically in the camp under the supervision of Dr Arun Paul (Programme officer), Dr Ashiq (senior lecturer) and Dr Anjana (Tutor) and Dr Priyadarshini (Tutor)

NSS KMCT Dental college, NSS unit conducted special camp for the period of 2018-19 from February 7th to 10th 2019 and later on December 27th to 29th 2019.

The special camp was split into two sessions as one session of 4 days at Government Tribal LP school, Koombara, Koodaranjipanchayath and another session of 3 days at HIRA public school, Mukkam.

A group of energetic 47 volunteers enthusiastically participated in the special camp. The location Koodaranji was selected because the many wards in the panchayath was affected by the 2018 landslides, many homes were devastated and lost the agricultural lands which were the sole mode of income for those families.

Special Need Children & adults are those who have disabilities due to physical, mental or medical problem. They require specialised dental healthcare just as much as they require other medical attention. They require particular dental attention due to their incapacity to practise oral self-care, they may be more vulnerable to or at a higher risk of acquiring dental problems. As a result of these issues, oral and dental disease prevention is a top concern in order to preserve a good oral state. So an informative session on oral hygiene awareness and brushing techniques was taken by Dr. Dhanya Muralidharan (Reader & HoD, Dept of Public Health Dentistry). The team included a 1 staff, and 6 PG's, Interns, Final year Part I students and demonstrated oral hygiene and brushing techniques to the caretakers & inmates of the institution. A total of 5 caretakers and 20 inmates were benefitted by the informative session.

WATER PURIFICATION PROCESS FIELD VISIT FOR UG STUDENTS TO KOOLIMAD WATER PURIFICATION PLANT-November 12th to 14th 2018

In order to get a deeper understanding about the harmful effects of water borne diseases and the role that Potable drinking water plays in maintaining human health, a visit to Koolimad water purification center was organized by **Department of Public Health Dentistry** in association with and permission from Executive Engineer of Kerala Water Authority, Malaparamba, Kozhikode from November 12th to 14th 2018. As part of their academic curriculum, the batch of Final Year part undergraduate students were taken for a field visit to **Koolimad Water Purification Center**to observe the different methods **of Large scale purification** of water. A total of 135 students were taken in KMCT Dental College bus to Koolimad water purification center by 9 am over three days. The students were accompanied by two faculty from Department of Public Health Dentistry. The staff at Koolimad plant received the students and took the team to observe the processof large scale purification of raw water of Chaliyarriver. The students were able to observe the process of **Rapid sand filtration** method which was followed by observation of method of **Chlorination**. The students also had an interactive session with the center staff where their doubts were cleared. The visit concluded by 1 pm.

INTERNATIONAL DAY OF YOGA- June 21st 2018

Yoga is a 5,000-year-old physical, mental and spiritual practice Having its origin in India, Which Aims to transform both body and mind. **On December 11 in 2014, the United Nations General Assembly declared June 21st as the International Day of Yoga.** Yoga is an invaluable gift of India's ancient tradition . It embodies unity of mind and body; thought and action; restraint and fulfillment; harmony between man and nature; a holistic approach to health and well-being. It is not about exercise but to discover the sense of oneness with yourself, the world and the nature.

The National Service Scheme of **KMCT Dental College**organised yoga demonstration session in accordance with International Yoga Day on 21/06/18. The programme started at 9.00 am by a silent prayer. Principal Dr. Manoj Kumar (HOD,Dept OMFS) gave the welcome addressee. Programme officer Dr.Arun Paul introduced the chief instructors Miss Aswathy

The demonstration started by introducing history and importance of yoga to the students. Various yoga postures which are essential for a peaceful mind, good posture, digestion, sleep and anxiety were explained. Various asanas like Tadasana,Vrikshasan,Trikonasana, Paschimottanasana, Sukhasnaetc were demonstrated. Vote of thanks was delivered by NSS volunteer harinarayanan.

PERIPHERAL SATELLITE CENTER POSTINGS OF INTERNS FOR COMPREHENSIVE DENTAL CARE FOR COMMUNITY- June 2nd 2018

Each batch of interns during their clinical posting in the Department of Public Health Dentistry are posted in the Satellite centers of Pullurampara, Mavoor and Meenchanda of KMCT Dental College. All the interns are posted for a period of 1 to weeks at these centers on rotation. The Satellite center posting is meant to help interns receive additional clinical training and exposure as well as training in provision of comprehensive Dental Care for the community. The focus of this care is for rural community who have limited access to Dental Care. On June 2nd 2018 the current batch of 66 interns began their postings at these centers on rotation. They are guided by deputed BDS and MDS faculty from the Department of Public Health Dentistry posted in these centers.

29TH NATIONAL ROAD SAFETY WEEK - April 23-30th

The NSS unit of KMCT Dental College celebrated road safety week by conducting a class on "Road safety measure" for first years, Second years, Faculty and Interns in accordance with the day. **Mr Francis VV, MVI, Koduvally RTO** took the class. The programme commenced by NSS anthem. Dr Nizaro Siyo (Vice principal) delivered the welcome address. Dr Arun Paul (NSS programme officer) introduced the chief guest and addressed the gathering. Mr Francis VV discussed the traffic rules and also those rules which are less aware to the public. He elaborated the do's and donts while driving. Interactive session was arranged where the students and staff asked their doubts. Enthusiastically he cleared all doubts and insisted all youngsters to were seat belts and helmets. A memento was handed over by vice principal as a token of appreciation. Vote of thanks was delivered by Harinarayan. Refreshments for the chief guest and faculties were provided. The programme concluded by National anthem. 90 students and 8 staff participated in the programme

Jail inmates are a group that are vulnerable to various health problems due to habits such as smoking, alcohol, drug abuse, psychosocial problems etc. Research has shown that high prevalence of gum diseases and dental caries exists among prison inmates. This year on occasion of World Oral Health Day, the Department of Public Health Dentistry, KMCT Dental College had decided to focus on providing awareness about Oral health and oral health care to the inmates of Kozhikode, District Jail.

World Oral Health Day celebrations started at 9:30 am on 20th March. The Chief guest- Shri UV Jose -Kozhikode District Collector addressed the gathering and inaugurated the World Oral Health Day program. The Guest of honour -KMCT Group of Institutions Chairman, Dr K Moidu handed over the dental kit for distribution for the inmates to Shri Anil Kumar K-Supdt.

A total of 94 inmates were screened for oral health problems and all necessary treatments were performed using the portable mobile dental unit for inmates and mobile dental van for the staffs of the Jail. An awareness session focusing on common oral health problems was taken by Dr Dhanya Muralidharan, H.O.D, Dept of Public Health Dentistry for the staff and inmates of the jail.The inmates were educated about oral hygiene measures, prevalent oral health problems and this educative session was taken by interns and staff of Department of Public Health Dentistry.

Ayurveda consultation for the inmates was also organized with the help of KMCT Ayurveda College. A total of 4 staff, 13 interns and 5 non-teaching staff of KMCT Dental College participated for the program. 'World Oral Health Day' program concluded by 4 pm.

3. ANTI DRUG AWARENESS CAMPAIGN- MAVOOR-SPECIAL CAMP

Awareness rally on drug addiction was organised by students with the support from Mavoor police department. Movoor SI Mr. Rajith inaugurated the function and spoke about the importance of awareness among the public especially youth towards drug abuse. He congratulated and appreciated the efforts of NSS volunteers in conducting an awareness rally. **A flash mob** was done by the volunteers at Mavoor bus stand which was appreciated by the crowd. Volunteers 43 in number and 4 faculty members distributed the pamphlets to the crowds about the awareness on drug addiction harmful effects.

The **Community Health Centres** (CHCs) which constitute the secondary level of **health** care are designed to provide referral as well as specialist **health** care to the rural population. Students started cleaning the premises of the health centre by cutting the grass and segregating the plastic waste dumped in this area. Patient waiting area had been unused for long time by the creepers and unwanted plants which was uprooted by the volunteers. All tools for the activity were bought and distributed to the students.

On account of Children's day a dental camp was organized on Tuesday, November 14th by KMCT Dental College's Department of Public Health Dentistry in association with Indian Dental Association, Malabar branch, and Bilathikulam-Sri Sathya Sai Seva Samithi at Government UP School, East Nadakkav.

Children's Day program started off at 10 am with inauguration of children's day activities by URC trainer Shri Ajmal. PTA Vice president Shri Raveendran, Headmistress- Shrimati Sheela Rodrigues, Dr Dhanya Muralidharan, Head of Department of Public Health Dentistry and Staff secretary -Shri Pavithran addressed the gathering.

Awareness class on Good Oral hygiene practices, healthy diet and its influence on oral health was conducted for the school children by interns posted in Department of Pedodontics of KMCT Dental College. Entertaining videos on Oral hygiene, diet and dental caries was displayed for the children. A class on common oral health problems affecting children and their management was taken for the parents and teachers of Government UP School, Nadakkav by Dr Dhanya Muralidharan, Head of Department of Public Health Dentistry. Educative session was followed by interactive session where a lot of mis-concepts and doubts regarding oral health care for the children were cleared. Screening for Oral health problems and necessary treatments were provided for all the students, parents and teachers of the school. A total of 111 patients were screened and a total of 57 dental problems were treated by dental interns and dental faculty using the KMCT Dental College mobile dental van. Interns and final year part I students organized games which had oral health messages conveyed for the students of the school. Prizes for the winners of each category were distributed by the Principal of Government UP School, Nadakkav. A total of 13 students and 2 dental faculty participated.

Dental care for people with disabilities necessitates specific knowledge and skills, as well as increased community awareness of good oral hygiene habits. Individuals with particular health requirements are more prone to oral disorders throughout their lives, according to studies. Oral health difficulties can lead to major health problems, which can have a substantial impact on an individual's quality of life. As a result, more emphasis should be placed on improving the oral health of individuals, particularly those with unique medical needs. So an informative session on oral hygiene awareness was taken by Dr. Santhosh V C (Professor, Dept of Periodontics). The team included staff, PG's, Interns, Final year Part I students and demonstrated oral hygiene techniques to the caretakers & inmates of the institution. A total of 6 caretakers and 20 inmates were benefitted by the interactive session.

'National Oral Hygiene Day' was commemorated at **Pratheeksha special school** Mampetta on First August 2017. This year the **Dept of Public Health Dentistry** organized a dental awareness camp for the special children of Pratheeksha Special School. The dental camp began at 9am and was inaugurated by **Municipal chairman** Kunjan master. **Special Children** are susceptible to many oral health problems because of their limited ability to perform oral hygiene measres. And intake of different medications. The final year students and interns gave oral health education and awareness to the children of all classes. Students also used models and posters to deliver the health education information regarding dental caries and good oral hygiene. **Dr Arun Paul**, Dept of Public Health Dentistry and **Dr Binu Purushothaman**, H.O.D, Dept of Orthodontics addressed the care takers and teachers regarding Oral health issues of their wards. 14 students and 3 staff participated. A total of 62 patients were screened and a total of 15 dental problems were treated by the dental interns and dental faculty using the KMCT Dental College mobile dental van. Persons requiring more complex management of dental problems were referred to KMCT Dental College, Manassery and program concluded by 2 pm.

Every year March 20th is celebrated as **'World Oral Health Day'**, This day is also meant to stress on the importance of oral health in safe guarding general health and wellbeing. This year the 'World Oral Health Day' was celebrated at **'Loveshore Special School'** for mentally challenged at Pannicode. The **Department of Public Health Dentistry**, KMCT Dental College in association with **IDA (Malabar branch),** took up the initiative to create awareness about the importance of oral health for general health and well-being for the children, parents and teachers of Loveshore Institute.

The program started at 10:30 am and was inaugurated by the chief guest, Kunnamangalam block Panchayath president, Shrimati Ramya Haridas, Dr Binu Purushothaman (IDA (Malabar branch) president), Dr Dhanya Muralidharan (Head of Department of Public Health Dentistry), Mrs Sujatha Sharma (Administrative officer-KMCT Dental College), Mr.Abdul Muneer- Director of Loveshore institute. The dental kits were distributed by the chief guest, Shrimati Ramya Haridas, and Dr Binu Purushothaman (IDA (Malabar branch) president) and An awareness class on oral care for people with special needs was taken for parents and teachers of children of Loveshore Institute by Dr Dhanya Muralidharan, Head of Department of Public Health Dentistry. Oral care needs of such children were highlighted along with Practical ways to deal with the oral health problems.

A dental exhibition was arranged for the parents, teachers and students of Love Shore special school. Various health education models, posters focusing on oral diseases, development of teeth, prevention of oral diseases such as oral cancer, dental caries, oral hygiene measures, prevention of periodontal disease etc was arranged. Final year part I students provided Oral health education and explanation of the exhibits. Oral screening was done and necessary dental treatments such as oral prophylaxis, restorations were performed and appropriate referrals were done by staff and interns of Department of Public Health Dentistry. A team of 13 dental faculty, Interns, PGs and UG students actively involved in World Oral Health Day programs.

INFECTION CONTROL PROGRAM- 22nd November 2016

In view of an outbreak of Chicken Pox in the college hostel, an awareness session on prevention of communicable diseases for first year and second year BDS Students was organized by the Department of Public Health Dentistry. The program was held on 22nd November 2016 at the fourth floor lecture hall II in KMCT Dental College. Faculty from Dept of Community Medicine of KMCT Dental College delivered the awareness session for the students. The session began at 9:30 am and Dr DhanyaMuralidharan, H.O.D, Dept of Public Health Dentistry gave the introduction. The awareness session involved detailed description of measures that could be taken within the college premises to contain the spread of communicable diseases. A total of 200 students of first year and second year BDS, along with 4 faculty attended the program. The awareness session also included an interactive session for students to clear their doubts. The program concluded by 11:30 am.

Every year May 31st is celebrated as "World No Tobacco Day". This day is celebrated under the initiative of the World Health Organization and its members for the purpose of creating awareness among the public of the harmful effects of tobacco. In line with objectives of the World Health Organization in creating awareness at all levels about harmful effects of tobacco and reducing the consumption of tobacco products among the public especially the younger generation, the Department of Public Health Dentistry, KMCT Dental College, Manassery, celebrated World No Tobacco Day 2016 at Children's Home, Vellimadukunnu, Kozhikode on 4th June 2016. Here the institute serves and supports underprivileged children in the age group of 5 to 18 years, at present the institute houses 130 children.

The program was inaugurated by MLA, Shri Purushan Kadalundi, well-known social activist. The inaugural address was followed by a talk on the evolution of World No Tobacco Day, its significance, World No Tobacco Day theme for 2016 as well as its public health importance which was delivered by Dr Dhanya Muralidharan, Head of Department of Public Health Dentistry, KMCT Dental College. In order to involve the children actively in saying no to tobacco, a drawing competition based on the theme 'Say No To Tobacco' was conducted along with a creative skit was organized for the children by the interns of Department of Public Health Dentistry, KMCT Dental College. The skit depicted the life of college students and the peer pressures and family background, by which teenagers are forced to take up the habit of tobacco use. The children were divided into groups of 10 each, based on their age. The faculty and students of KMCT Dental College, conducted the counselling sessions. The children got an opportunity to discuss and interact directly with the faculty, Post graduate and Undergraduate students and clear their existing views and concepts on Tobacco and its use.

A total of 73 children were screened by the dental interns and dental faculty using the KMCT Dental College mobile dental van. The camp concluded at 1pm. The dental camp was well appreciated by the organizers and camp attendees.

PERIPHERAL SATELLITE CENTER POSTINGS OF INTERNS FOR COMPREHENSIVE DENTAL CARE FOR COMMUNITY- June 2nd 2016

Each batch of interns during their clinical posting in the Department of Public Health Dentistry are posted in the Satellite centers of Pullurampara and Meenchanda of KMCT Dental College. All the interns are posted for a period of 1 to weeks at these centers on rotation. The Satellite center posting is meant to help interns receive additional clinical training and exposure as well as training in provision of comprehensive Dental Care for the community. The focus of this care is for rural community who have limited access to Dental Care. On June 2nd 2016 the current batch of 58 interns began their postings at these centers on rotation. They are guided by deputed BDS and MDS faculty from the Department of Public Health Dentistry posted in these centers.

Detailed program report on total number of Collaborative activities with Institute of Palliative Medicine, Medical College, Kozhikode for research, faculty exchange, student exchange year-wise during the last five years

KMCT Dental college (KMCTDC) is collaborated with Institute of palliative medicine (IPM), Kozhikode since 2018. IPM is the pioneer of palliative care movement in South East Asia and the first World Health Organisation Collaborating Centre for Community Participation in Palliative Care and Long Term Care (WHOCC) in developing countries. IPM is the training, research and outreach arm of Pain and Palliative Care Society(PPCS).

Both Post graduate and Under graduate students are getting advantages of this collaboration by attending their observership postings. Students get exposure to OP, IP and home care programs at IPM. This is an ongoing collaboration activity between KMCTDC and IPM.

In 2020-21, 13 House surgeons went to IPM for their 6 days of rotatory observership posting .

Sr No	Year of Collaboration	Title of the collaborative activity	Name of the Participants	Duration	Nature of activity
1	2020-2021	Student Internship	13 House Surgeons	6 days	Student Observership

In 2019-20, 67 House surgeons went to IPM for their 6 days of rotatory observership posting.

Sr No	Year of Collaboration	Title of the collaborative activity	Name of the Participants	Duration	Nature of activity
1	2019-2020	Student Internship	67 House Surgeons	6 days	Student Observership

In 2018-19, three post graduate students from department of oral medicine & radiology were posted at IPM for attending their 10 days peripheral posting and 52 House surgeons went to IPM for their 6 days of rotatory observership posting. Sample certificates and posting orders as proof for each year are attached at Document support.

KMCT MEDICAL COLLEGE HOSPITAL

(Run by Kunhitharuvai Memorial Charitable Trust)

05/12/2018

Palliative care has opened up new frontiers in medical field emphasising on improving quality of life towards end of life in terminally ill patients. Our hospital plans to start palliative care services here. As a first step towards the goal, a meeting will be held on 7/12/2018 at 10 am in the hospital lecture hall in second floor to plan further proceedings. Dr. Suresh Kumar, Director, Institute of Palliative Medicine, Government Medical College, Calicut has kindly consented to join us and give guidance and support in making it a reality. We request your kind presence for the meeting.

CIRCULAR

KMCT/DC/C/2019/40 Date: 29/07/2019

SUB: Fund Collection for Institute of Palliative Medicine, Kozhikode

Palliative care posting for interns, an initiative of KMCT Dental College and coordinated by Department of Public Health Dentistry, was started last 2018 to sensitize students towards field of Palliative Medicine and care. Each year the students of KMCT Dental College raise funds for helping Institute of Palliative Medicine, Kozhikode.

This year the current batch of interns of KMCT Dental College undergoing their postings at Institute of Palliative Medicine, Kozhikode, are organizing the fund collection beginning on 2nd August 2019.

Requesting all students, teaching faculty and non- teaching staffs to actively contribute and help the cause.

Copy to:

- The Director
- Vice Principal
- All H.O.D's
- Administrative officer
- UG Student's representative
- PG Student's representative

3. Preparation for periodontally weakened tooth.
4. Stability in complete denture.
5. Denture base considerations in RPD.
6. Fibre reinforced composite fixed prosthesis.

LIFNA KHADER

1. Occlusal concepts in complete denture.
2. Indirect retainers.
3. FPD- indications, contra indications, advantages, disadvantages, configurations & failures.
4. Support in complete denture.
5. Improving denture bearing areas for edentulous patients.
6. Laminate veneers.

NIVEDITHA. S. PRASAD

1. Diagnosis & treatment planning in FPD.
2. Preparation of mouth for removable partial dentures.
3. Working casts & dies.
4. Support for distal extension denture bases.
5. Tooth preparation for all ceramic crowns.
6. Immediate complete denture.

SEMINAR TOPICS FOR IIND YEAR PGs

EAKETHA. P. LOKESH

1. Diagnosis and treatment planning in complete denture.
2. Orientation jaw relation.
3. Mandibular major connectors.
4. Classification systems for partially edentulous situation.
5. Fundamentals of occlusion in FPD.
6. Preparation for partial veneer crowns.

FAHIM ASAD.K

1. Diagnosis and treatment planning in FPD.
2. Vertical jaw relation.
3. Special impression procedures for RPD.
4. Maxillary major connectors.
5. Pontics and edentulous ridges.
6. Preparation for all ceramic restorations.

SRUTHY. VISWANATH

1. Diagnosis and treatment planning in RPD.
2. Horizontal jaw relation
3. Surveying.
4. Biomechanics in RPD.
5. Retainers in fixed prosthodontics.
6. Preparation for full veneer crowns.

SEMINAR TOPICS Theories of impression making

SL NO	NAME	SEMINAR TOPICS
1	ABHISHEK S NAIR	DIAGNOSIS AND TREATMENT PLANNING IN COMPLETE DENTURE
2	AISWARYA C	ARTICULATORS
3	AKSHAYADEVI A P	OBJECTIVES OF IMPRESSION MAKING
4	AMAL AJIT	HORIZONTAL JAW RELATION
5	AMAL GEO FRANCIS	ORIENTATION JAW RELATION
6	AMINA HUDA U F	ANTERIOR TEETH SELECTION
7	APARNA A SANTHOSH	POSTERIOR TEETH SELECTION
8	APARNA P M	POST INSERTION COMPLICATIONS IN COMPLETE DENTURE
9	APRNA T F	BALANCED OCCLUSION
10	ARCHANA NARAYAN	TREATING ABUSED TISSUES
11	ASWATHI UMA MAHESH	RELINING OF DENTURES
12	ATHIRA P	IMMEDIATE COMPLETE DENTURE
13	ATHIRA SREENIVAS P	SINGLE COMPLETE DENTURE
14	AYISHA SUHA M N	TOOTH SUPPORTED OVERDENTURES
15	FARISA C T	IMPLANT SUPPORTED COMPLETE DENTURE
16	FARZANA K	RESIDUAL RIDGE RESORPTION
17	FATHIMA V V	IMPROVING THE DENTURE FOUNDATION AREA
18	GOPIKA K S	BIOLOGICAL CONSIDERATION IN MAXILLARY ARCH
19	GOPIKA S	BIOLOGICAL CONSIDERATION IN MANDIBULAR ARCH
20	HADHAINA FARHATH S H	POSTERIOR PALATAL SEAL AREA
21	JABIRA THASNEEM M P	DENTURE INSERTION, POST INSERTION INSTRUCTIONS TO THE PATIENT, RECALL & MAINTENANCE

DR. MANOJ KUMAR. K.P

22	KEZIAH A	TRIAL DENTURES
23	LUBAIBA MANAT	KENNEDY'S CLASSIFICATION OF PARTIALLY EDENTULOUS AREA AND APPLEGATE'S RULES
24	MALAVIKA K U	MAXILLARY MAJOR CONNECTORS
25	MUHAMMED FAAIZA	MANDIBULAR MAJOR CONNECTORS
26	NAMITHA PADMAKUMAR	REST AND REST SEATS
27	NEELIMA MANOJ	DIRECT RETAINERS
28	NIHATHA A	MINOR CONNECTORS
29	PRAJITHA T	PRINCIPLES OF REMOVABLE PARTIAL DENTURE DESIGN
30	RAJANA RAJU	SURVEYORS
31	REEMA SALAM	SURVEYING
32	RESHMA PRASAD	MOUTH PREPARATION OF PARTIALLY EDENTULOUS ARCH
33	SALMATH THEKKIL	SPECIAL IMPRESSION PROCEDURES FOR REMOVABLE PARTIAL DENTURE
34	SANGEETHA G S	GAGGING AND ITS MANAGEMENT
35	SHAFNA PERUVALLYTHODI	DIAGNOSIS AND TREATMENT PLANNING IN REMOVABLE PARTIAL DENTURE
36	SHAHANA SHAJI	BIOMECHANICS IN REMOVABLE PARTIAL DENTURE
37	SHAHIN PARVEEN	PRINCIPLES OF TOOTH PREPARATION
38	SHAHIYA K S	INDICATION, CONTRAINDICATION AND CLASSIFICATION OF FIXED PARTIAL DENTURE
39	SHIFANA	RETAINERS IN FIXED PARTIAL DENTURE
40	SHIFANA M H	PONTICS IN FIXED PARTIAL DENTURE
41	SIBLA P	CONNECTORS IN FIXED PARTIAL DENTURE
42	SREELEKSHMI S	DIAGNOSIS AND TREATMENT PLANNING IN FIXED PARTIAL DENTURE
43	ASIF M DILEEP	FUNDAMENTALS OF OCCLUSION IN FIXED PARTIAL DENTURE
44	JASINA P HALEEDU	GINGIVAL TISSUE MANAGEMENT IN FPD
45	MUHAMMED HAMID K S	REBASING OF DENTURES

IMCH DENTAL COLLEGE CALICUT
DR. MANOJ KUMAR. K.P Principal
DEPT. OF PROSTHODONTICS

46	NIRMAL VARGHESE K	INFECTION CONTROL IN PROSTHODONTICS
47	RIFNA NASER	IMPRESSION TECHNIQUES IN FIXED PARTIAL DENTURE
48	RINSHA RAFEEQUE N	PROVISIONAL RESTORATIONS IN FIXED PARTIAL DENTURE
49	SARANYA SIVADASAN	LUTING CEMENTS IN FIXED PARTIAL DENTURE
50	SHAINAZ SHAMSUDHEEN	RESIN BONDED FIXED PARTIAL DENTURES
51	ZAINUL AMMEN C K	IMPLANT FAILURES
52	AMRUTHA DAS K	RESTORATION OF ENDODONTICALLY TREATED TOOTH
53	ASNA K P	CERAMIC LAMINATE VENEERS
54	MURSHIDA K	TOOTH PREPARATION FOR FULL METAL CROWNS
55	FARSEENA A K	ALL CERAMIC RESTORATIONS
56	MINHA UBAID C	IMPLANT SUPPORTED FIXED PARTIAL DENTURES
57	NISHFEENA M	FAILURES IN FIXED PARTIAL DENTURES
58	RISNA SANA	SEQUALE OF WEARING COMPLETE DENTURES

Staff in charges:

Roll no: 1-15 - Dr. Anu. A. George

16-30 - Dr. Roshy George

31- 44 - Dr. Varsha Rajeev

45- 58 - Dr. Nicholas Mathew

Last date for submission of seminars: **25-10-2018**

Sir,

Sub: Permission for one day academic visit to Koolimad Water Authority Plant-reg

One of the essential components of public health care is provision of safe drinking water and sanitation. Knowledge of the process of purification of water is the primary step in the prevention of water borne diseases. The **Dental Council of India's** academic curriculum for the Final Year Part 1 & 3rd Year undergraduate dental students (81 Nos.) requires them to be made aware of water born diseases and process of water purification. In order to direct the focus of undergraduate students on environmental health, kindly permit them to visit Koolimad Water Authoriy Plant either on 20th or 23rd May 2016.

Thanking you,

KMCT DENTAL COLLEGE

Yours faithfully

Sir,

SUB: Request for permission to postpone visit to Koolimad water purification plant from 12/06/17 to 16/06/17 - reg

With reference to your letter No: D3/106/2016, our final year part I undergraduate BDS students (47) numbers were given permission to visit Koolimad water purification plant on 12/06/17 and we had paid the visiting charge for the same. Due to certain unavoidable circumstances relating to their academic submission to Kerala University of Health Sciences, we were unable to conduct the visit for the students on 12/06/17, hence we request you to kindly give us permission to visit Koolimad water purification plant on 16/06/17 and to consider our entrance fee payment done for 12/06/17 for the visit on 16/06/17.

I am attaching the copies of the permission letter and the payment receipt done for the same. Kindly help us in this regard.

Thanking you,

SUB: Request for permission to visit Koolimad water purification plant for final year part I BDS (Regular and additional) BATCH on 13/11/19, 14/11/19 & 15/11/19

Respected Sir,

As part of the Dental Council of India's academic work requirement for Public Health Dentistry for final year part I, the students are required to visit a water purification plant in order to understand the process of water purification as it is the first step in prevention of water borne diseases. This visit will help the undergraduate students to focus on environmental factors affecting health, hence kindly permit the final year part I students 2019-20 exam going batch (N=100 Students) to visit the Koolimad water purification center on **13/11/19, 14/11/19 & 15/11/19** between 9 am-1 pm.

Hoping for a favourable consideration of our request.

Thanking you,

Your's sincerely,

SUB: Request for permission a two day academic visit to 'MILMA' plant at Kozhikode Dairy Peringolam ON 22ND AND 23RD December 2021 - reg

Respected Sir,

As part of the Dental Council of India's academic work requirement for Public Health Dentistry for final year part I and third year, the students are required to visit a milk purification plant in order to understand the process of milk purification as it is the first step in prevention of Milk borne diseases. This visit will help the undergraduate students to focus on environmental factors affecting health, hence kindly permit the final year part I additional batch (n=48) and third year additional students (n=33 students) July exam going batch (N= 80 Students) to visit the **MILMA' plant at Kozhikode Dairy Peringolam** on **22/12/21 AND 23/12/21** between 9 am-1 pm.

Hoping for a favourable consideration of our request.

Thanking you,

Your's sincerely,

14/12/21

Dr Dhanya Muralidharan

To,
The Senior Manager
'MILMA' (MRCMPU Ltd)
Kozhikode Dairy Peringolam
Kunnamangalam (P.O), Kozhikode-673571

Sir,

SUB: Request for permission a two day academic visit to 'MILMA' plant at Kozhikode Dairy Peringolam on 22/12/21 & 23/12/21 – reg

One of the essential components of public health care is provision of safe drinking water and sanitation. On this context knowledge of the process of milk purification is the primary step in prevention of Milk borne diseases. The Dental Council of India's academic curriculum for final year part I and third year undergraduate dental students (80 in number) requires them to be made aware of milk purification process. In order to help the undergraduate students to focus on environmental factors affecting health, kindly permit them to visit 'MILMA' (MRCMPU Ltd) Kozhikode Dairy-Peringolam- plant on 22/12/21-40 students and 23/12/21-40 students along with two faculty between 9 am to 1 pm. We also assure that the students visiting your facility are free of Covid related symptoms.

Thanking you,

Sub: Request for transport arrangement for Student field visit on 22nd and 23rd December 2021

Respected Sir,

As the Dept of Public Health Dentistry is organizing a field visit to MILMA , Peringalom, Kozhikode for the students of Final year part 1 additional and third year additional batches on 22/12/21 (n=40 students and 2 staff) and 23/12/21 (n=40 students and 2 staff) from 9:30 am to 1 pm. We require transport facility for these two days to take the students and bring them back, hence kindly requesting for some transport arrangement to help us conduct the field visit smoothly.

Kindly help in this regard.

Thanking you,

PROBLEM SOLVING METHODOLOGIES

KMCT DENTAL COLLEGE
DEPARTMENT OF PERIODONTICS
CASE SCENARIO - 1

Personal History

Name: BAIJU, 45/M
Address: MUKKAM
Occupation: MALE NURSE

Chief Complaint

Mobile teeth in upper front area since 2 years.

History of presenting illness

Patient complaints of mobile teeth in upper front teeth since 2 years. The mobility was minimal earlier but increased to the current stage in 6 months' time. Also, there is H/o bleeding gums only while brushing. No H/o pain, swelling or other associated symptoms.

Medical History

No relevant medical history.

Past dental history

Had consulted previously - undergone extractions of few teeth but not replaced the missing teeth; consulted a dentist for mobility, scaling was done in the same appointment and no follow up was done later.

Oral hygiene habits

Type of tooth brush – Medium bristled tooth brush
Dentifrice – fluoridated tooth paste
Frequency of Brushing – twice daily for 3-4 minutes
Brushing technique – Horizontal direction
Frequency of changing tooth brush – once in 3-4 months
Interdental aids- NIL
Tongue cleaning – NIL
Other Chemical oral Hygiene aids used - Nil

Personal Habits

No deleterious or parafunctional habits present.
Diet: Mixed

Treatment plan

① Emergency phase.

→ Incision and drainage of the swelling.

→ Emergency access opening in 16.

→ Tablet - Ibuprofen - 400mg - TID — 5 days (15)

Tab. - Paracetamol — 5 days (5)

② Phase I : Non-surgical phase.

→ Patient education and motivation ✓

→ Diet control. ✓

→ Plaque control : Scaling and root planing, chlorhexidine mouthrinse (Hexidine rinse) ✓

Proper tooth brushing technique, tongue scrapping.

→ Splinting in 17, 11, 12, 13, 21, 23, 33, 31, 32, 41, 42, 43

→ Temporary restoration of access opened tooth in 16.

→ Occlusal adjustments. → Occlusal splint (Attrition) Restoration (Attrition).

• Re-evaluation of results of phase I therapy. ✓

Phase (IV) : Maintenance phase.

Check for pocket depth, any new caries.

③ Phase II : Surgical phase.

→ Periodontal surgery. (Regenerative surgery) ✓

- Pocket reduction / Pocket elimination surgery. ✓
- To increase the width of attached gingiva (Mucogingival surgeries) ✓
- Frenectomy etc ?

→ Root canal therapy. (Pulpectomy).

→ Resective surgery.

Grade II Furcation in 16, 17, 46

- Deep scaling and root planing. ✓
- Tunneling.
- Hemisection
- Odontoplasty.
- Root resection.

→ Antimicrobial therapy

Cap. Moxclav 625mg — 1 day (21)

~~Tab. Paracetamol~~

local examination

inspection

- Multiple Dental caries present in 55, 65
- Deep dental caries present in 84.
- Swelling present in 85. B/L

extral oral → 2×3cm size swelling present superior below 2-3cm below orbit and Antrally 2cm from the lateral nasal wall. posteriorly 2cm from temporal auditory meatus

intra orally → 2×3cm size swelling present near the 85 which erythematous.

palpation

- Tenderness on Digital vestibular palpation in 85
- The swelling is firm in consistency and erythematous.

Tenderness

- P perio. in 85, 84, while tenderness on percussion.

provisional diagnosis

1. Dental caries in 55, 65
2. Grossly decayed tt - 84
3. periapical abscess tt - 85
4. deep dental caries tt - 84.

investigation

IOPA in 85 (well defined Radiolucency present in the apical Regions with discontinuity of lamina dura)

final diagnosis

> periapical abscess in 85

Reversible pulpitis

DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Manassery, Mukkam

Treatment plan

① diet counselling and given to patient

② motivated the patient to avoid sucrose consumption and to avoid thumb sucking

③ pit and fissure sealant application.

④ oral screen. grips for thumbsucking thumb guard given for thumb sucking

Emergency plan phase

> Incision and drainage of abscess in 85

> access opening done 85.

preventive phase.

> pit and fissure sealant application

> oral prophylaxis done.

>

Restorative phase

> Completion of Root canal treatment and stainless crown given.

> Restoration of 55, 65, 84.

Surgical phase.

> extraction of 54.

Maintenance phase

> Space maintainer is given (distal shoe space maintainer) (75)

> Band and loop space maintainer for 54.

> Thumb guard given for thumb sucking

Provisional Diagnosis:- Dentinal caries Irt 64, 65, 24, 36.
Abscess Irt 55.
Bx:

Investigation : Irt 55

Intraoral periapical radiograph taken with respect to 55. There is diffuse radiolucency seen in the apex of the tooth. There is lamina dura not intact. which referred as Abscess

Irt 64/65
Intraoral periapical radiograph taken with repect to 64, 65. There is radiopacity seen on the occlusal aspect of teeth represent Dental caries.

Final Diagnosis : ~~Abscess~~ periapical Abscess
Dental caries.
Mouth breathy habit

Treatment : . Patient evaluation & motivation
. Diet counseling
. Oral prophylaxis
Restoration Irt 64, 36, 24
~~Pulp supply Irt~~
pulp therapy Irt 65
Extraction Irt 55 Bx appliance.
Ortho treatment for the habit breakage.
Space maintainer appliance Irt 74.

Lingual arch.

SHORT CASE RECORD

OP NO: Date: 17/01/2022

Name: Muhammed Ameen Age: 6 Sex: Male

Address: calicut

Chief complaint: patient complaints of Irregularly placed lower front tooth and wants to get it removed.

History of presenting illness:
patient present with malaligned lower front teeth which was noticed four months back. No pain no swelling and no other accociated symptom.

Medical & Dental history:
. patient undergone restoration of teeth 1 year ago
. No Medical history present.

Drug allergy: No drug allergy

Oral Habits: patient brushes twice daily in horizontal motion with tooth brush and fluoridated tooth paste.

CLINICAL FINDINGS

Soft tissue findings:

Lips - competent lips
Labial mucosa and Buccal mucosa
Tongue
Floor of the mouth
Palate
} No abnormality detected.

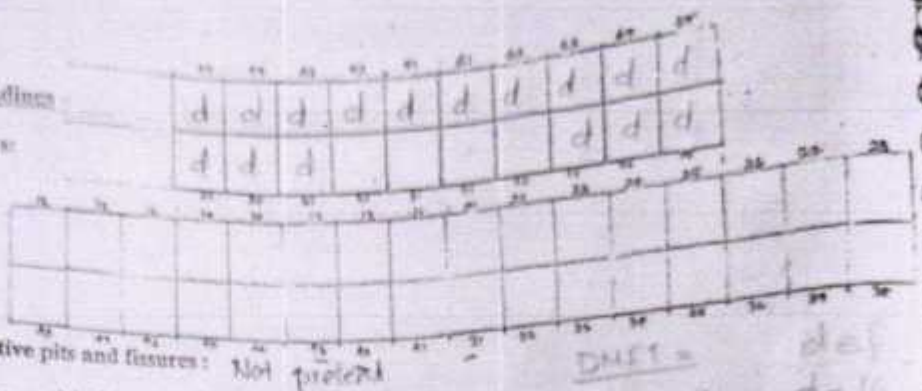

Gingiva
colour - Physiological pigmentation Surface texture - Stippling present
contour - Scalloped and blunt edged Bleeding on probing - Not present.
consistency - firm & resilient

BOPPPS

Lesson Planning

Teaching Support Centre

Bridge In

Instructor...
- gains learner attention
- builds motivation
- establishes relevance

Learners find out...
- what's in it for me?
- why does this matter?
- why should I learn this?

Ideas for Bridging
-Introduce the topic with a funny video or audio clip, or share a relevant story

Outcomes*

* a statement that specifies in a measurable way what the learner will know, value or be able to do by the end of the lesson

Instructor...
- clarifies what the learner will "get out of" the lesson
- streamlines the planning process to focus on the outcomes

Learners find out...
- what will be expected of me?

"Learning is enhanced when students are aware of the mastery expectations for their courses..." (Marsh, 2007)

1 Stem
- Introduce the learning outcome
- Provide a timeline for achieving the outcome

e.g., By the end of this lesson/ module/ course/ program/ [illegible] will be able to...

2 Action Verb
- Identify the ability that will be measured (in relation to knowledge, skill or value)

e.g., illustrate, define, compare, arrange, sketch, create, indicate, coordinate, assess, advise, etc. evaluate...

3 Learning Statement
- Specify what knowledge, skill or value will be demonstrated and how this will be achieved (context)

e.g., By the end of this lesson, learners will be able to identify all 6 components of BOPPPS by reviewing this infographic.

Phone: (0495)2292002, 2292004
E-mail: dental@kmct.edu.in, website: www.kmctdentalcollege.org

Pre-Assessment

Instructor finds out...
- what do learners already know?
- do I need to adjust the depth and pace of learning?
- what are my students interested in?
- which students could act as resources in the class?

Learners...
- recall prior knowledge
- gain confidence by reviewing prior knowledge
- assess own strengths and areas for improvement

Ideas for Pre-Assessments

- Survey, quiz or poll learners at the beginning of the lesson

Participatory Learning

Instructor...
- carefully plans a participatory learning activity that allows students to engage with the learning outcomes
- communicates expectations clearly
- plans level and type of instructor facilitation to maximize student learning

Learners...
- are actively involved in achieving the outcomes of the lesson
- improve understanding and deepen learning by connecting with, testing, exploring, and mentally manipulating ideas

Ideas for Participatory Learning
- Pose a question and ask learners to Think-Pair-Share, or assign a problem or case study for learners to work through

Post-Assessment

Instructor finds out...
- what did the learners learn?
- were the desired outcomes accomplished?
- are there any gaps in understanding?

Learners find out...
- am I getting it?
- what do I need to work on?

Ideas for Post-Assessments
- Ask learners to submit a 1-minute paper in reponse to questions, such as:
- What was the most important thing you learned today?
- What questions remain unanswered?

E-mail: dental@kmct.edu.in, website: www.kmctdentalcollege.org

Summary

Instructor...
- concludes and wraps up learning experience
- provides a sense of closure and completion, or sets up learner for future lessons

Learners...
- appreciate how the lesson ties in with the course, or the bigger picture (their discipline, their experience, etc.)
- reflect on whether outcomes were met
- review material immediately

Ideas for Summarizing
- Recap main points
- Play a clip showing application in the real world

Detailed program report on total number of Collaborative activities with Institute of Palliative Medicine, Medical College, Kozhikode for research, faculty exchange, student exchange year-wise during the last five years

KMCT Dental college (KMCTDC) is collaborated with Institute of palliative medicine (IPM), Kozhikode since 2018. IPM is the pioneer of palliative care movement in South East Asia and the first World Health Organisation Collaborating Centre for Community Participation in Palliative Care and Long Term Care (WHOCC) in developing countries. IPM is the training, research and outreach arm of Pain and Palliative Care Society(PPCS).

Both Post graduate and Under graduate students are getting advantages of this collaboration by attending their observership postings. Students get exposure to OP, IP and home care programs at IPM. This is an ongoing collaboration activity between KMCTDC and IPM.

In 2020-21, 13 House surgeons went to IPM for their 6 days of rotatory observership posting .

Sr No	Year of Collaboration	Title of the collaborative activity	Name of the Participants	Duration	Nature of activity
1	2020-2021	Student Internship	13 House Surgeons	6 days	Student Observership

In 2019-20, 67 House surgeons went to IPM for their 6 days of rotatory observership posting.

Sr No	Year of Collaboration	Title of the collaborative activity	Name of the Participants	Duration	Nature of activity
1	2019-2020	Student Internship	67 House Surgeons	6 days	Student Observership

In 2018-19, three post graduate students from department of oral medicine & radiology were posted at IPM for attending their 10 days peripheral posting and 52 House surgeons went to IPM for their 6 days of rotatory observership posting. Sample certificates and posting orders as proof for each year are attached at Document support.

HIPPOCRATIC OATH

I swear in the name of the Almighty
and before my family, my teachers and my peers
that according to my ability and judgement
I will keep this oath and stipulation.

I reckon all who have taught me this art
equally dear to me as my parents
and in the same spirit and dedication
to impart the knowledge of this art to others.

I will treat without exception all who seek my ministrations,
so long as the treatment of other is not compromised thereby
and will continue with diligence to keep abreast of advances in my profession.

I will follow that method of treatment
which according to my ability and judgement.
I consider for the benefit of my patient
and abstain from whatever is harmful or mischievous.
I will neither prescribe nor administer a lethal dose of medicine to any patient
Even if asked nor counsel any such thing.

I will remember that
there is art to dentistry as well as science
and that warmth, sympathy and understanding
may outweigh the Surgeon's knife or the Chemist's drug.

Whatever in connection with my professional practice
or not in connection with it
I may see or hear in the lives of my patients
which out not to be spoken about.
I will not divulge
reckoning that all such should be kept secret.

I will prevent disease whenever I can for prevention is
preferable to cure and will not be ashamed to say "I know not"
nor will I fail to call in my colleagues or refer when the skills
of another are needed for the benefit of my patient.

While I continue to keep this oath unviolated
may it be granted to me to enjoy life
and the practice of the art and science of dentistry
with the blessing of the Almighty
and be respected by my peers and society
but should I trespass and violate this oath
may be reverse be my lot.

INSTRUCTIONS TO INTERNS

Duties & responsibilities of Intern posted in various departments include:-

i. Attending to the routine O.P in the Department
ii. Carrying out the routine clinical procedures in the department
iii. Carrying out Patient and instrument preparation for clinical procedures.
iv. Carrying out all Clinical procedures including impression making, and pouring casts (i.e., steps including mixing of impression materials & gypsum products, mixing of restorative materials and removal of casts from impressions to be done by the intern without seeking assistance)
v. Fabrication, insertion and follow up of removable orthodontic appliances.
vi. Attending to the causality duties of the institution
vii. Maintenance of log book and records
viii. Carrying out any other duty as instructed by the Head of the Department.
ix. Maintenance of proper dress code and attire.

Note: The entire clinical work done by intern will be under the supervision of faculty members. In the absence of faculty the intern will be under the supervision of Senior/Junior Resident.

Details distribution of minimum expected work to be completed (Department-wise):-

1. Oral Medicine & Radiology

The intern during his/her posting in oral surgery shall perform the following procedures (minimum requirement):

a. Standardized examination of patients - 5 cases
b. Exposure to clinical, pathological laboratory procedures and biopsies/5 cases
c. Cytology
d. Effective training in taking of Radiographs & processing: (Intra-oral) I.O, Full mouth and (Extra oral) E.O
e. Cephalogram - with interpretation - 1
f. Interpretation of X-rays - 25 nos.
g. Orientation to additional investigation techniques like CT scan/MRI/Sialography/USG/Doppler-(optional: where there is scope/facility)

2. Oral and Maxillofacial surgery

A. The intern during his/her posting in oral surgery shall perform the following procedures(minimum requirement):
   1) Extractions - 50 cases
   2) Trans-alveolar extractions - 2 cases
   3) Assisting/observing & other minor surgery - 2 cases

B. The intern shall perform the following on Cancer Patients (preferential)
   1) Maintain file work
   2) Do extractions for radiotherapy cases

DR. MANOJ KUMAR. K.P.
Principal
KMCT Dental College
Manassery, Mukkam

3) Perform biopsies
4) Observe varied cases of oral cancers

C. An intern shall have 15 days posting in emergency services of a dental/general hospital with extended responsibilities in emergency dental care in the wards. During this period he/she shall attend to emergencies under the direct supervision of oral surgeon during any operation. Emergencies to be assisted and observed:

1) Toothache
2) Trigeminal neuralgia
3) Bleeding from mouth due to trauma, post extraction, bleeding disorder or haemophilia
4) Airway obstruction due to fracture mandible and maxilla; dislocation of mandible; syncope or vasovagal attacks; Ludwig's angina; Tooth fracture; post inter maxillary fixation after general Anesthesia.
5) Observes the work in I.C.U. with particular reference to resuscitation procedures.
6) Conducts tutorials on medico-legal aspects including reporting on actual cases coming to causality.

3. Prosthodontics and Crown & Bridge

The interns during their internship posting in Prosthodontics shall perform the following procedures (minimum requirement):

1) Complete denture (upper & lower) (Clinical Procedures & laboratory work)-3 Cases
2) Removable Partial Dentures (Clinical procedures & laboratory work) - 4 Cases
3) Planned (cast) partial denture (designing on model only) - 1 Case
4) Learning use of Face bow and Semi anatomic articulator technique
5) Management of cases but not restricted to the following: anterior crowns, maxillofacial prosthesis, TMD etc. (preferable)
6) Miscellaneous-like Reline/Rebasing/Overdenture/repairs of Denture/immediate complete denture.

4. Periodontics

An intern shall perform the following procedures (minimum requirement):

1)	Prophylaxis	- 40 cases
2)	Assist/observe or perform	
3)	Flap Operation	- 2 cases
4)	Root Planning	- 1 case
5)	Curettage	- 1 case
6)	Gingivectomy	- 1 case
7)	Perio-Endo cases	- 1 case

KMCT DENTAL COLLEGE CALICUT

DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Manassery, Mukkam

5. Conservative Dentistry & Endodontics

To facilitate reinforcement of learning and achievement of basic skills, the interns shall perform at least the following procedures independently or under the guidance of supervisors (minimum requirements):

1) Routine Restoration work - 40 cases
2) Restoration of extensively mutilated teeth - 2 cases
3) Inlay and onlay preparations - 1 case
4) Use of tooth colored restorative materials - 4 cases
5) Treatment of discolored vital and non-vital teeth - 1 case each
6) Management of pulpless, single-rooted teeth without periapical lesion - 1 case
7) Management of acute dentoalveolar infections - 4 cases/as per availability
8) Management of pulpless, single-rooted tooth with perapical lesion - lease
9) Non-surgical management of traumatized teeth during formative period - 1 case

6. Peadiatric and Preventive Dentistry

During their posting in Paediatric Dentistry the intern shall perform (minimum requirement):

1) Topical application of fluorides - 5 cases
2) Oral prophylaxis - 10 cases
3) Restorative procedures of carious deciduous teeth in children - 10 cases
4) Pulpotomy/Pulpectomy - 1 case
5) Management of traumatized permanent anterior teeth (RCT) - 1 case
6) Fabrication and insertion of Preventive/Interceptive orthodontic appliances -2 cases
7) Extractions - 30 cases
8) Minor oral surgical procedures
9) (Surgical exposure of unerupted teeth, mucocoele excision, frenectomy etc- 1 case Management of Dento alveolar fractures - 1 case
10) Management of Special children - 2 cases
11) Comprehensive treatment including case discussion, maintenance of clinical records, primary, secondary & tertiary levels of prevention including diet recording and diet counseling - 1 case

7. Oral Pathology and oral Microbiology including Forensic Odontology

An intern shall perform the following (minimum requirement):

1) History-recording and clinical examination - 5 cases
2) Blood, Urine and Sputum examination - 5 cases
3) Exfoliative Cytology and smears study - 2 cases
4) Biopsy-Laboratory procedure& reporting - 1 case
5) Preparation of ground section - 2

Interns may also be posted in the Forensic Medicine Department of the attached Medical College.

KMCT DENTAL COLLEGE CALICUT

DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Manassery, Mukkam

8. Orthodontics and Dentofacial Orthopaedics

A. An intern shall observe the following procedures during their posting in Orthodontics (minimum requirement):

1) Detailed diagnostic procedures - 5 patients
2) Laboratory techniques including wire-bending for removable appliances. Soldering and processing of myo-functional appliances.
3) Treatment plan options and decisions.
4) Making of bands, bonding procedures and wire insertions.
5) Use of extra oral anchorage and observation of force values
6) Retention
7) Observe handling of patients with oral habits causing malocclusions.

B. An intern shall do the following laboratory work (minimum requirement)

1) Wire bending for removable appliances and space-maintainers including welding and heat treatment procedure - 5 cases
2) Soldering exercises, banding & bonding procedures - 2 cases
3) Cold-cure and heat-cure acrylisation of simple orthodontic Appliances - 5 cases

C. An Intern shall carry out the following clinical work (minimum requirement):

1) Diagnosis and treatment plan including cephalometric analysis
2) Fabrication of removable appliances with different problems
3) Orthodontic impressions and bite-recordings

9. Public Health Dentistry

1. The intern shall conduct health education sessions for individuals and groups on oral health, public health nutrition, behavioural sciences, environmental health, preventive dentistry and oral epidemiology.
2. They shall conduct a short-term epidemiological survey in the community or in the alternate, participate in the planning and methodology
3. They shall arrange effective demonstration of (minimum requirement):
   a. Preventive and interceptive procedures for prevalent dental diseases
   b. Mouth-rinsing and other oral hygiene demonstrations - 5 cases
   c. Tooth brushing techniques - 5 cases
4. Conduction of oral health education programmes at (minimum requirement):
   School setting - 2
   Community setting - 2
   Adult education programs - 2
5. Preparation of Health Education materials
6. Exposure to team concept and National Health care systems
   a. Observation of functioning of health infrastructure.
   b. Observation of functioning of health care team including multipurpose; workers (male and female), health educators and other workers.
   c. Observations of at least one National Health Programme.
   d. Observation of inter linkages of delivery of oral health care with Primary Health Care and visit to a water treatment plant.

Principal
KMCT Dental College
Manassery, Mukkam

Evaluation:-

1. Formative Evaluation:

Day-to-day assessment of each intern during their internship posting should be done. The objective is that all the interns must acquire necessary minimum skills required for carrying out day-to-day professional work competently. This can be achieved by maintaining records and performance data book by each intern. This will not only provide a demonstrable evidence of the processes of training but also more importantly, of the intern's own acquisition of competencies as related to performance. It shall form a part of formative evaluation and shall also constitute a component of final grading of interns.

Cases treated by interns in respective department to be thoroughly observed and grades to be awarded on the same day by the in charge of the Internship Training Programme.

Skill Tests:

Evaluation system shall assess the skills of candidates while performing clinical procedure over the patient during the course of treatment and during the posting in that department. The HOD and senior teachers of the respective department shall grade the skills according to the performance of the intern.

Gradation of each skill should be done as under:-

Clinical Performance	Grade
Excellent	A^+
Very good	A
Good	B^+
Average	B
Poor	C

If a candidate is declared as unsuccessful due to unsatisfactory performance in any of the Department he/she shall be required to repeat the posting in continuation in that Department for a period as deemed fit by Head of the Department in consulation with Dean/Principal.

Only after satisfactory performance of the skill during subsequent evaluation, the intern shall be eligible for award of internship completion certificate.

Issue of Internship completion certificate

An intern will be issued internship completion certificate by the office of the Dean/Principal only on completion of internship training programme satisfactorily.

Introduction

Today we are in the age of adhesive dentistry. The traditional mechanical methods of retaining restorative materials have been replaced by tooth conserving adhesive methods. The development of adhesive approach to restorative dentistry has bought many advantages such as better esthetics, conservation of tooth structure, reduction in micro-leakage. There are more and more uses for dentin-bonding systems now a days.

Dentin bonding is comparatively difficult because of the fact that dentin is a complex tissue and contains plenty of fluids. Because of vast structural and functional variations between the dentin and enamel, the bonding to each is not similar. There are many agents which is helpful for this bonding and hence these agents are called dentin-bonding agents.

Dentin Bonding System

BONDING TO DENTIN

Dentin bonding is comparatively difficult because of the fact that dentin is a complex tissue and contains plenty of fluids. Because of the vast structural and fuctional variations between the dentin and enamel, bonding to each is not similar.

Dentin is a living tissue and is directly connected to the pulp through fluid filled channels that contain odontoblastic processes, the body of which lie in the pulp. Along with the chemical tissue of adhesion biologic concern of pulpal compatibility becomes exceedingly important when dentin is concerned. 37% phosphoric acid when used to etch both enamel and dentin did not lead to pulpal damage.

Treatment Of Dentin For Optimal Bonding

The characteristics of successful bonding of a resin composite to dentin includes micromechanical attachment between resin and demineralized, primed layer of intertubular dentin. This complex refered to as 'hybrid layer', is best achieved by acidic conditioning agents which remove the Smears layer, produce surface demineralization to a depth of

3.0-6.0 μms and expose the dentinal collagen framework. In some cases, smear layer is not removed but rather dissolved or modified to include it within the bonding process. Application of hydrophilic resin primers facilitates subsequent penetration of low viscosity adhesive resins into the microporous collagen scaffold and dentinal tubules. polymerization of this infiltrated resin stabilizes the surface hybrid layer. Meticulous application of these steps lead to a gap free bond.

Role of smear layer in Dentin Bonding

Smear layer is a product of dental instrumentation which covers the normal structural components of dentin by 1-2 μms and penetrates several micrometers into the tubules to form smear plugs. It has two phases, a solid phase made up of cutting debris primarily denatured collagen and mineral, and a liquid phase made up to tortuous fluid filled channels around the cutting debris. Smear layer, may also be a deterrent to the bonding process, since it may serve as a barrier to the penetration of resin to the underlying dentin substrate. Bacteria entrapped in the smear layer can survive and multiply beneath the restoration. A few authors, however, believe it to be a protective barriers against bacterial and toxin penetration.

Reasons for retaining smear layer on the bonding substrate:-

* Retention of smear layer lowers dentin permeability
* prevents decrease in bond strength seen with some bonding systems as deeper dentin is prepared.
* Greatly lowers the effect of pulpal pressure on bond strength.

Recent generation of dentin adhesives involves modification of the smear layer as it is believed to greatly improve the bond strength to dentin. The removal of smear layer and demineralization of dentin matrix may facilitate bonding through a number of mechanisms like:

* The exposed collagen provides reactive groups that can chemically interact with primers
* Amino group may act as a catalyst to polymerization reaction
* Exposed collagen promotes micromechanical bonding to resin by providing a frame work.

It is quite probable that all the three mechanisms operate simultaneously to improve bonding.

Conditioning of Dentin

It is defined as an alteration of the dentin surface including the smear layer with the objective of producing a substrate capable of micromechanical and possibly chemical bonding to a dentin adhesive. The principal effects of conditioning on dentin can be physical or chemical. Physical effects are the alteration in the thickness and morphology of smear layer and also the dentinal tubules whereas chemical effects are modification of the fraction of organic matter and decalcification of the inorganic portion. conditioning can be performed by chemical, thermal or mechanical means.

A- Chemical conditioning

Both acids and calcium chelators, which rely on removing the smear layer are used as chemical conditioners.

1- Acid conditioners : These are employed with the objective of not only removing the smear layer but also demineralizing superficial dentin to expose a microporous collagen scaffold into which the resin will penetrate. On intertubular dentin, the exposed collagen fibers are often additionally covered by an amorphous layer which is of variable thickness and has microporosities, having been ascribed to combined effect of denaturation and collapse of residual smear layer collagen. This collagen smear layer may reduce the permeability of

underlying dentin to resin monomers, and is insoluble in acids At the tubule orifices, peritubular dentin is often completely dissolved to form a funnel shape structure and expose collagen fibrils which are often additional retentive sites at the tubule wall. After conditioning, maintainence of a moist dentin surface is recommended, following the wet bonding technique to prevent collapse of unsupported collagen and promote wetting and infiltration of subsequently applied resin. 37% phosphoric acid is routinely used. 10% phosphoric acid appears to provide better bond strength than the higher concentrations. Dentin bonding agents (eg: Tenure, Mirage bond) that use nitric acid conditioners are highly adhesive and provide good tubule seals. 10% citric acid combined with 3% ferric chloride is used as a smear layer remover and etchant Another combination etchent is 10% citric acid and 20% Calcium chloride This combinations decalcifies dentin to lesser depth & tubules do not open into funnel shape.

ii - Chelators : Contrary to the strong acid etchants, chelators remove the smear layer without decalcification or significant physical changes on the underlying dentin substrate. Also no funnel shaped changes are evident, instead, a chelate is formed. The best known chelator conditioner is Ethylene diaminotetra acetic acid (EDTA) adjusted to a PH of 7.4

Certain bonding systems do not remove smear layer but rather utilize it as a legitimate bonding substrate These systems are utilised by so called self etching / self priming agents which are acidic monomer and can enlarge the channels

KMCT DENTAL COLLEGE
DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Manassery, Mukkam

and also remove mineral deposits from within the tubules, thereby promoting resin permeation. With this type of bonding there are less chances of incomplete resin penetration because both etching and priming occur simultaneously. Since, the self etching/self priming solution is not rinsed from the surface, the demineralized smear layer is incorporated into the bonding interface.

B- Thermal conditioning

Lasers are being used to condition dentin. The commonly used layers are CO_2 and Nd:YAG Lasers. It is speculated that lasers cause recrystallization of dentin resulting in a fungi form appearance that contributes to increased micro-retention or possible chemical adhesion of a restorative material to the tooth structure. The carbonized black spot that results after lasing is easily washed off with water.

C- Mechanical Conditioning

Micro-abrasion is used to mechanically condition the dentin.

PRIMING

It is the second step in bonding procedure. The primers are the agents that contain monomers with hydrophilic properties, which have an affinity for the exposed collagen fibrils and hydrophobic properties for co-polymerization with

KMCT DENTAL COLLEGE CALICUT
DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Manassery, Mukkam

adhesive resin. These monomers, usually HEMA and 4-META are dissolved in solutions of acetone or ethanol, which because of their volatile characteristics can displace water from the dentinal surface and the moist collagen network. The primer promotes resin diffusion into the moist, demineralised dentin with the aim of achieving complete resin penetration. Microscopic examination has shown deficiencies in the spread of primer at three levels: (i) incomplete surface coverage
(ii) incomplete interfibrillar penetration
(iii) incomplete penetration to the full depth of demineralized dentin.

In order to achieve the best bond strengths it is essential that the primer spreads uniformly over the surface.

DENTIN BONDING AGENTS

Bonding resin is an unfilled or semifilled resin, which matches the resin of the composite but has a lower viscosity to permit easy flow and penetration. Dental bonding agents are designed to provide a sufficiently strong interface between restorative composites and tooth structure to withstand mechanical forces and shrinkage stress. The success of adhesives is dependent on two types of bonding :-

1- Micromechanical interlocking, chemical bonding with enamel and dentin or both.

2- Copolymerization with the resin matrix of composite materials.

A wide variety of chemicals have been employed, that can produce strong, permanent bond to dentin

K.M.C. DENTAL COLLEGE P.O. Manassery Pin-673 602 Mukkam, Calicut Dt. Kerala, S. India 10 CALICUT
DR. MANOJ KUMAR. K.P Principal KMCT Dental College Manassery, Mukkam

A successful dentin bonding system must Meet several requirements such as :-

(a) Adequate removal or dissolution of the smear layer from enamel and dentin.

(b) Maintenance or reconstitution of the dentin collagen matrix

(c) Good wetting

(d) Efficient monomer diffusion and penetration

(e) polymerization matching tooth structure.

(f) copolymerization with the resin composite matrix.

→ All bonding system consist of three key components :-

(1) conditioning (cleaning)

(2) Priming (wetting, adapting)

(3) Bonding (mechanical adhesion, curing)

MECHANISM OF DENTIN BONDING

Composite resins don't show an intimate microscopic contact with dentin when placed directly into the cavity. Inorder to overcome this, an intervening layer of fluid is used, which fills in the microscopic space, polymerizes and combines with the composite resin and components of dentin.

Chemistry of dentin bonding agent :

M ——— R ——— X

M - Methacrylate group

R - spacer

X - Reactive group capable of bonding to dentin surface

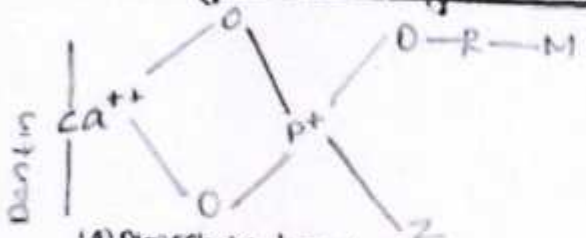

$$CH_2 = \underset{\displaystyle CH_2}{\overset{|}{C}} - \underset{\displaystyle CO-O-R-X}{\overset{|}{}}$$

KMCT DENTAL COLLEGE P.O. Manassery CALICUT

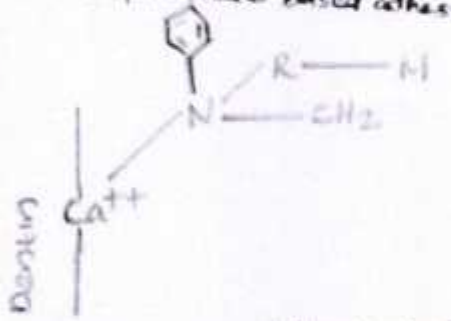

DR. MANOJ KUMAR. K.P Principal KMCT Dental College Manassery, Mukkam

The adhesive molecule is bifunctional, one part of which (X) enters into chemical union with the tooth structure, and the other part (M) co-polymerizes to the resin through the double bond of methacrylate. Adhesion with dentin can occur either to the inorganic or organic components present on the surface of the tooth. The spacer group (R) is responsible for making the molecule large enough to keep the methacrylate groups spatially located for optimal chemical reaction with the composite.

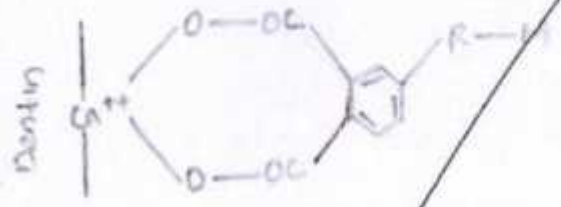

Bonding to Inorganic Portion of Dentin

(a) Phosphate based adhesive

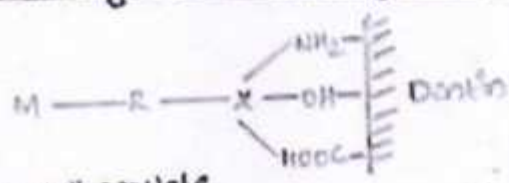

(b) Amino acid (NPG-GMA) based adhesive

(c) Dicarboxylic acid (PAA) based adhesive.

Bonding to the inorganic part of dentin occurs through ionic interaction between positive Ca^{2+} ions on the surface of dentin and negative charges on the group X of the adhesive. Group X can be phosphates, amino acids and amino-alcohols or dicarboxylates.

Bonding to the Organic portion of Dentin

M - Methacrylate
X - isocyanide, carboxylic acid chloride/ anhydride or aldehyde.

Bonding to the organic part involves interaction with amino(NH), amido(-CONH), hydroxyl(-OH) or carboxylate(-COOH) groups present in the collagen of dentin. Removal of hydrogen from any of these groups allows combination with chemicals present in dentin bonding agents.

KMCT DENTAL COLLEGE P.O. Manassery Mukkam, Calicut Dt. Kerala - 673 602 India CALICUT
DR. MANOJ KUMAR. K.P Principal KMCT Dental College Manassery, Mukkam

Evolution of Dentin Bonding Agents

The agents have been divided into 'generations' depending upon the evolution of these agents.

1- First Generation Dentin Bonding Agents

The initial trial was using a surface active comonomer, N-phenyl-glycine-glycidyl methacrylate, which acted as a primer and adhesion promoter between enamel/dentin and resin materials by chelating with surface dentin. since Calcium ions of the tooth substance are a mediator in the bond formation, agents of this type are expected to form stronger bonds to enamel than to dentin.

2- Second Generation Dentin Bonding Agents

Most of the second generation bonding agents were phenyl Phosphorous, phosphorous/chlorophosphorous esters of unfilled resins such as BisGMA or HEMA. The bonding mechanism involved improved wetting of the surface and ionic interaction between the phosphate group and calcium of the tooth. Clearfil was the first agent introduced in this series. It composed of an ethyl alcohol solution containing tertiary amine as the activator. The catalyst liquid was BisGMA monomer containing a phenyl phosphate ester, benzoyl peroxide and methyl methacrylate. The interfacial bond was established through attraction between the negative charges of the oxygen on the phosphorous group and the positively charged Calcium ions in the dentin surface.

KMCT DENTAL COLLEGE P.O. Manassery Pin 673 602 Mukkam Calicut Dt Kerala S. India CALICUT

DR. MANOJ KUMAR. K.P Principal KMCT Dental College Manassery, Mukkam

Drawbacks in the First & Second Generations

* Lack of adequate bond strength that could overcome contraction stresses during polymerization.
* Being hydrophobic in nature, close adaptation to the hydrophilic dentin could not be achieved.
* Bioacompatibility was not appropriate.
* Lack of sufficient knowledge about the presence and nature of smear layer. Moreover, the adhesive bonded to the smear layer rather than the dentin. As a result the bond achieved was limited by cohesive failure in the smear layer or a break at the smear layer – dentin interface

3- Third Generation Dentin Bonding Agents

As further research ensued, it became evident that the smear layer had a negative influence on the performance of adhesive systems. To overcome this, 3rd generation dentin bonding agents were introduced which differed from early materials in that an additional step was employed to either modify or remove the smear layer before the application of the actual adhesive. The extra step comprised of conditioning and priming of dentin but made the procedure more complicated and time consuming. The bond strengths to dentin with these agents were usually higher (4-15 MPa) and more durable thereby reducing microleakage.

The three steps – conditioning, priming and bonding agent may be carried out either separately or the components

KMCT DENTAL COLLEGE P.O. Manassery PIN 673 Mukkam Kerala CALICUT
DR. MANOJ KUMAR. K.P Principal KMCT Dental College Manassery, Mukkam

combined to reduce it to two steps. The conditioner is an acidic solution that removes the smear layer and is rinsed off after application. The acids opens up the dentinal tubules partially and increases their permeability.

First system of third generation, known as the oxalate bonding system or the FNP system utilized a solution of acidic ferric oxalate on the enamel & dentin surface as a conditioner. The ferric ions are absorbed onto the dentin to increase the number of positive ions on the surface. This is followed by the application of an acetone solution of NTG-GMA and then another acetone solution of PMDM. This technique gave bond strengths of about 15 MPa to both enamel and dentin.

Drawbacks in third generation bonding agents:

Clinical studies showed decrease in retention with time. So the main problem was the longevity of the maintenance of the bond. These are technique sensitive and time consuming.

4- Fourth Generation Dentin Bonding Agents

Till now, the strategies for dentin adhesion were based upon the formation of resin tags penetrating into tubules of conditioned dentin, followed by chemical and mechanical bonding to inorganic or organic components of dentin.

Nakabayashi (1982) proposed a concept in which the resin is

KMCT DENTAL COLLEGE P.O. Manassery Pin 67 Mukkam Kerala India CALICUT
DR. MANOJ KUMAR. K.P Principal KMCT Dental College Manassery, Mukkam

impregnated into partially decalcified dentin followed by polymerization creating a resin reinforced layer or the 'hybrid layer' The mineralized tissues of peritubular and intertubular dentin are dissolved by acidic action, the initial surface penetration exposes the collagen fibres.

Advantages of this concept of bonding agents are:

- Reduced technique sensitivity.
- similar bond strengths to enamel & dentin.
- No reduction in bond strength when applied to moist surface or under conditions of high humidity.
- some systems can bond to mineralized tissue as well as metal, amalgam, procelain & indirect composite restorations.

It has been suggested that excessive drying causes collapse of collagen meshwork & prevents complete penetration of the subsequently appled primer & resin. A thin film of water present on the conditioned dentin helps suspend the collagen fibrils and create space between them for penetration All Bond-2 and scotch-bond multi-purpose are the earlier products.

All bond-2 uses an etchant of 35% phosphoric acid on dentin and enamel followed by the application of hydrophilic primer containing 2% NTG GMA in ethanol or acetone. subsequently, an unfilled resin containing Bis GMA and HEMA is applied. Mean bond strength for this system is seen to be 21.4 ± 7.9 Mpa

KMCT DENTAL COLLEGE P.O. Manassery Pin. 673 602 Mukkam, Calicut Dt. Kerala - S. India CALICUT

DR. MANOJ KUMAR. K.P Principal KMCT Dental College Manassery, Mukkam

5- Fifth Generation Dentin Bonding Agents

This class of adhesives are also based on the concept of hybridization, and rely on the wet bonding technique. It differs from its predecessor in that it uses one component resin, i.e. after conditioning of enamel and dentin, the steps of priming and bonding are combined so that bonding is achieved with a one component formula.

Prime and Bond and prime and Bond 2.1 contain PENTA, TEGDMA and an elastomeric UDMA resin in acetone. The system is highly sensitive to even mild dessication of acid conditioned dentin. Bond strengths exceeding 20MPa have been reported with it. Like other PENTA containing adhesives, prime and Bond and prime and bond 2.1 do not necessitate dentin conditioning but require acid conditioning on enamel for optimal enamel bonding. PENTA is a multifunctional molecule and is believed to partially demineralize dentin, facilitating penetration of resins into it.

Advantages of Fifth Generation Bonding System:

* Bond strength is sufficient
* Post-operative sensitivity is rare.
* Some agents have incorporated fluride and elastomeric components to improve marginal integrity.
* Time saving and simple to use
* Elimination of washing out of the acidic gel, therefore elimination of risk of collagen collapse
* Combination of etching and priming steps decreases the working time.

KMCT DENTAL COLLEGE

Pin 673602
Mukkam, Kerala, Dt
17°nn - n India
CALICUT

DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Manassery, Mukkam

Disadvantages :

Solution must be refreshed continously and a residual smear layer remained between the adhesive material and dentin

6 - Sixth Generation Dentin Bonding Agents

To improve upon the bond strength and to make the manipulation easy, this generation of adhesives ~~selector~~ relied on the use of acidic primers (pH 2.5-4.5), eliminating the need for phosphoric acid as etchant. Though manipulation is quite easy with these materials and they show a sufficient bond to conditioned dentin, but bond with enamel has been shown to be less effective. This may be due to the fact that the sixth generation systems are composed of an acidic solution that cannot be kept in place for long and must be refreshed continuously. Moreover these systems have a PH that is not enough to properly etch enamel.

components of self-etching adhesives :

KMCT DENTAL COLLEGE P.O. Manassery Mukkam Kerala - S. India
DR. MANOJ KUMAR. K.P Principal KMCT Dental College Manassery, Mukkam

Sixth generation dentin bonding agents are divided into 2 types:

Type-1 (self etching primer and adhesive)

These are available in light cure or dual cure product. self etching primer and resin adhesives are applied in separate layers.

- Two bottles, Liquid 1 (acidic primer), Liquid 2 (adhesive); acidic primer applied to tooth followed by adhesive.
- unprepared enamel may require etching with phosphoric acid
- Light cured / dual cured formulations
- Solvent is water, eg. Nano Bond, optibond, prompt L-pop.

Type-2 (self-etching adhesive)

Available only in light cure type. The self-etch primer and adhesive is mixed outside and applied.

- Two bottles, containing acid primer and adhesive, a drop of each liquid is mixed and applied to tooth
- unprepared enamel may require etching with phosphoric acid.
- Light cured formulations.
- Solvent is water, eg. Xeno III

Advantages

- They are designed to be used on dry dentin.
- They do not etch very far into dentin beneath smear layers. This avoids removal of smear plugs.

KMCT DENTAL COLLEGE P.O. Manassery Mukkam Kerala - S. India CALICUT
DR. MANOJ KUMAR. K.P Principal KMCT Dental College Manassery, Mukkam

7- seventh Generation Dentin Bonding Agents

Available both as light cure and dual cure type. All three components are combined in a single bottle.

Seventh generation bonding agents (No mixing, self-etch adhesive) are slight modification of type II sixth generation bonding agent.

Features are:

* more acidic (PH < 1)
* Single bottle containing acidic adhesive
* unprepared enamel may require etching with phosphoric acid.
* solvent is water. eg. G-Bond, P-Bond.

Disadvantages:

* Relatively short shelf life.
* Their composition is very hydrophilic. They attract and absorb water leading to leaching of unpolymerized monomers or hydrolytic degradation products through water filled channels called water trees.

8- eight Generation Bonding Agent

A modified version of seventh generation bonding agent is introduced by Voco America as futurabond DC. This is one-step dual cured, non-filled, self etch adhesive available in single use blister packs.

The 'chemical cured' mode makes the product suitable to be used in root canals, avoiding blocking the root ends with cured Bonding agent.

KMCT DENTAL COLLEGE P.O. Manassery Pin 673 Mukkam Calicut Dt Kerala S. India CALICUT

DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Manassery, Mukkam

Advantages:

* can be used with light cure and dual-cure and self-cure composites
* provides high bonding strength
* Moisture tolerant
* contains fluorides
* Nano-fillers help in better cross linking of the bonding resin components.

Since the generations are becoming confusing, a simple classification is presented, which involves as the past & present adhesives.

I- Etch and rinse strategy

(A) Three steps:-
- Acid
- primer
- Bonding agent.

(B) Two steps:-
- Acid
- primers + Bonding

II - self-etch strategy

(A) Two steps:-
- Acid + primer
- Bonding agent

(B) one step:-
- Acid + primer + Bonding agent.

Evolution of dentin bonding Systems

1st generation → Cavity primers with low bond strength.

2nd generation → Dentin-enamel bonding agents with improved bond strength to etched enamel

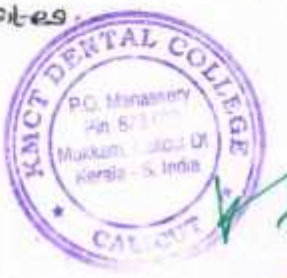

3rd generation → Etching of dentin and partially removal of smear layer.

4th generation → Total-etch technique and formation of the hybrid layer and resin tags.

5th generation → Simplification of clinical procedures: one bottle systems and self-etching primers.

6th generation → One step bonding systems with proper bond to enamel and dentin; Type 1 are compatible with self cured composites and type 2 are not.

7th generation → Single bottle no mix of self-etching adhesive, not compatible with self cured Composites.

Clinical Uses Of Dentin Bonding Systems

1) Bonding of directly placed resin based restorative materials
2) Bonding of indirectly placed restorative materials
3) Bonding of ceramic restorations
4) Bonding of amalgam restorations
5) Bonding of prefabricated and cast posts
6) Bonding Orthodontic brackets
7) Bonding Periodontal splints
8) Repair existing restorations
9) Sealing of pits and fissures of posterior teeth
10) Treatment of cervical sensitive dentine.
11) Reattachment of fractured tooth fragments.
12) Pulp capping
13) Reinforce fragile ~~to~~ roots internally.
14) Seal apical restorations placed during endodontic surgery.

Conclusion

In today's era, numerous improvements in materials and procedures have been made to meet the growing aesthetic demands of the patients. In all the aesthetic restorations a bonding step is involved to ensure durability and reliability. Thus, the ideal bonding system should be biocompatible, bond perfectly to enamel and dentin, have sufficient strength to resist to failure as a result of masticatory forces, have mechanical properties close to those of tooth, and be resistant to degradation in oral environment and easy to use.

4) TOOTH NUMBERING SYSTEM

Tooth numbering provides the dentists with an essential shortcut in clinical record keeping.

Tooth numbering systems are used like shortcuts. They are easier and saves time.

The three common systems:

a) FDI, world dental federation notation
b) Universal numbering system
c) Zsigmondy Palmar notation.

ZSIGMONDY PALMER NOTATION.

- This system was developed by Zsigmondy and modified by palmer so called as Zsigmondy Palmer notation
- In this system, the dentition is divided into quadrants and symbols (brackets) are used to designate in which quadrant the tooth is found.
- Permanent teeth are numbered 1-8 with lowest digit assigned to the teeth closer to the midline.
- The deciduous teeth are indicated by a letter A to E.

⌋ - upper ~~left~~ right quadrant
⌊ - upper ~~right~~ left quadrant
⌈ - lower left quadrant

FDI WORLD DENTAL FEDERATION NOTATION.

- FDI is two digit notation, also known as ISO-3950 notation.
- Each tooth, deciduous and permanent dentition is given two digit number.
- First digit indicates dentition, arch and quadrant In permanent, the dentition is divided into quadrants, which are numbered from 1 to 4 in a clockwise direction starting from upper right quadrant.
- Similarly the deciduous dentition is divided into quadrants which are numbered from 5-8 in a clockwise direction starting from upper right quadrant.

STAGES OF TOOTH DEVELOPMENT

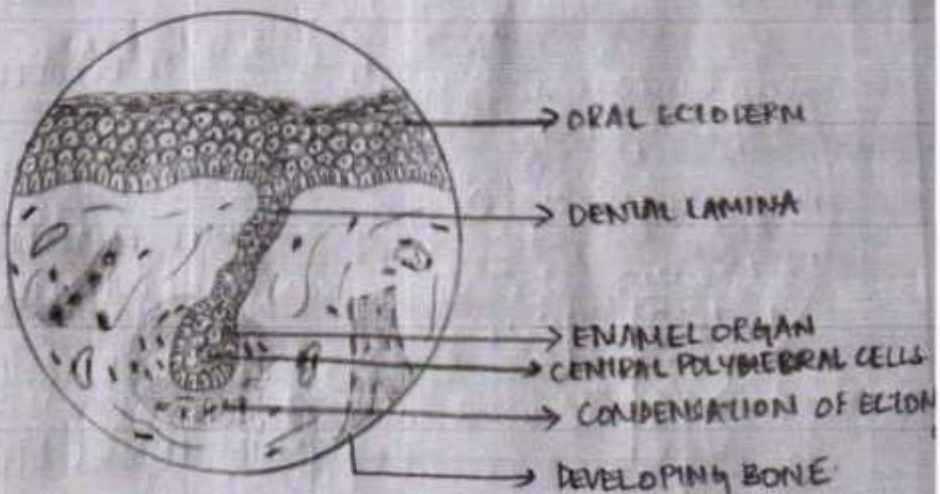

→ Morphological stages :-

i) Bud stage
ii) Cap stage
iii) Bell stage
- Early bell stage
- Advanced bell stage

→ Physiological stages :-

i) Initiation
ii) Proliferation
iii) Morphodifferentiation
iv) Histodifferentiation
v) Apposition.

i) BUD STAGE :-

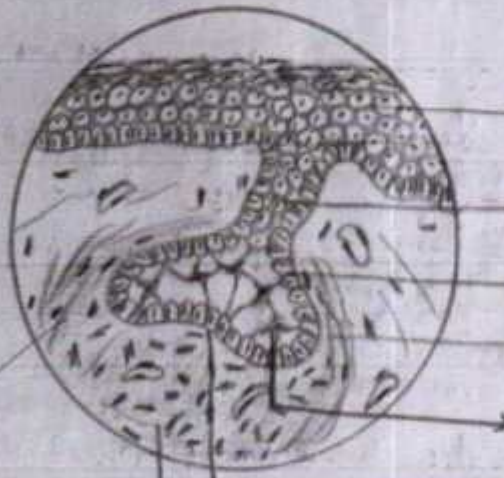

KMCT DENTAL COLLEGE
P.O. Manassery
Pin. 673
Mukkam, Calicut Dt.
Kerala - S. India
CALICUT

DR. MANOJ KUMAR. K.P
KMCT Dental College
Manassery, Mukkam

- Enamel organ is round or ovoid [illegible], hence the stage referred as bud stage
- Enamel is separated from the surrounding connective tissue by a distinct membrane.
- Histologically two types of cells are seen:
  - * Cells lining the periphery of bud - cuboidal
  - * Central cells are polyhedral
- Cuboidal cells are continuous with the basal layer of oral epithelium.
- Ectomesenchymal condensation adjacent to enamel organ forms dental papilla.
- Marginal condensation of ectomesenchymal cells enclosing dental papilla and enamel organ - Dental follicle or sac

2) CAP STAGE :-

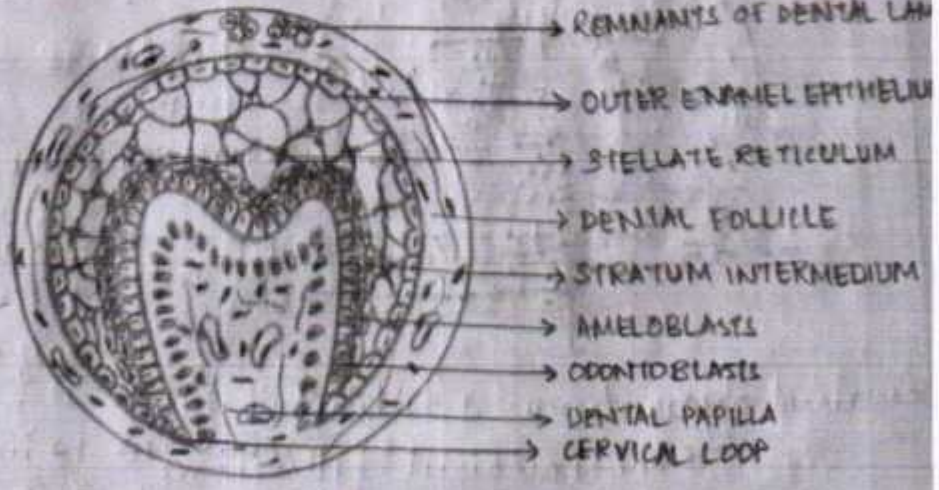

KMCT DENTAL COLLEGE
P.O. Manassery
Mukkam, Kozhikode Dt.
Kerala - S. India
CALICUT
DR. MANOJ KUMAR. K.P
Principal
KMCT Dental College
Manassery, Mukkam

- Enamel organ increases in size and attains the shape of a cap by invagination of the depression of the bud.
- cells undergo change in shape so that three separate cell groups can be identified
- Cap shaped - enamel organ
- 3 layer in enamel organ
  - * Inner enamel epithelium
  - * Stellate reticulum
  - * Outer enamel epithelium.
- Dental papilla with condensation of ectomesenchymal budding capillaries
- dense fibrous dental follicle.

iii) BELL STAGE :-

Early bell stage

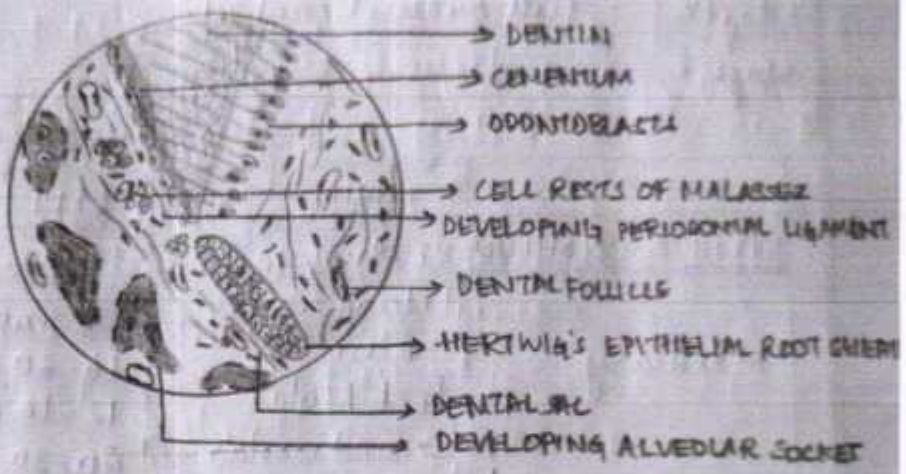

KMCT DENTAL COLLEGE

- Histological differences from early bell stage are:
  - * Hard tissue formation.
  - * Collapsed stellate reticulum and loosing folding of outer enamel epithelium bringing capillaries of dental follicle near to ameloblasts

ROOT FORMATION.

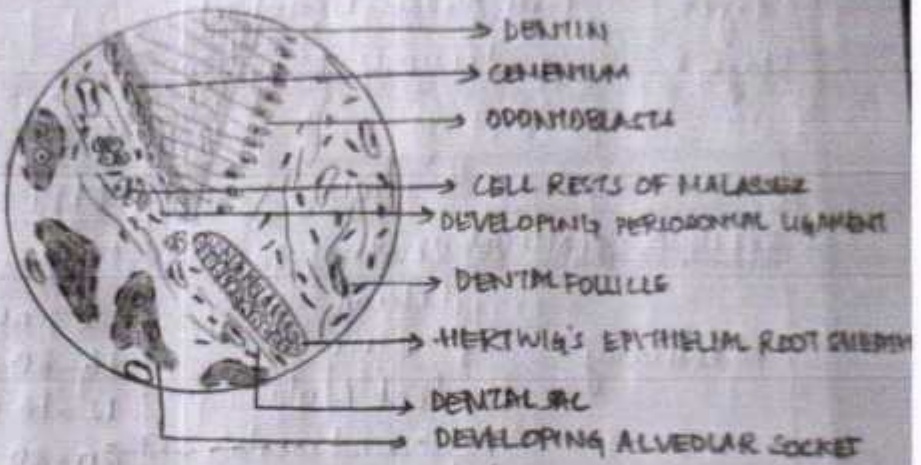

- Proliferation of cervical loop.
- Formation of HERS
- Formation of epithelial diaphragm.
- Proliferation of HERS from coronal proximal ends.
- Odontoblast differentiation under organizing influence of Hertwell's of HERS.
- Radicular dentin formation
- Degeneration of HERS and formation of cell rest of Malassez
- Differentiation of cementoblast from dental follicle.
- Cementum formation
- Orientation of periodontal ligament.

6) ERUPTION SEQUENCE

Given by Nayer and Schour

Stage 1 : Preparatory stage
Stage 2 : Migration of tooth to the oral epithelium.
Stage 3 : Emergence of crown tip to oral cavity
Stage 4 : First occlusal contact
Stage 5 : Full occlusal contact
Stage 6 : Continuous eruption

	TOOTH	ERUPTION
DECIDUOUS DENTITION		
Maxillary	Central incisor	7½ months
	lateral incisor	8 months
	Canine	16-20 months
	First Molar	12-16 months
	Second molar	20-30 months.
Mandibular	Central incisor	6½ months
	lateral incisor	7 months
	Canine	16-20 months
	First molar	12-16 months
	Second molar	20-30 months
PERMANENT DENTITION		
Maxillary	Central incisor	7-8 years
	lateral incisor	8-9 years
	Canine	11-12 year
	First premolar	10-11 years

⇒ **Early eruption :-**

- For temporary teeth it will more often occur when the tooth is superficially positioned under the gingiva.
- It is also observed in case of hyperthyroidism and early puberty.
- Early eruption of single tooth is most frequent and is caused by local etiological and premature loss of temporary teeth which is itself most often caused by dental decay.
- The cause of early eruption ~~an~~ and late eruption can be related to :- Genetic origin
  - Malformation
  - Systemic problems
  - Endocrine disorders
  - Injections
  - Metabolic disorders.

⇒ **Delayed eruption :-**

- Late eruption is less frequent in permanent dentition than deciduous dentition and most late eruption do have significant clinical effect.
- Eruption is considered to be late when it occurs more than 6 months beyond the average age limit of the eruption for temporary teeth and more than 1 year for permanent teeth.

8) STERILISATION IN DENTAL OFFICE

⇒ Sterilisation :-

It is a process by which an article, surface or medium is made free from all, microorganisms either in vegitative or spore form

⇒ Agents for sterilisation :-

→ Physical agents

- Sunlight : spontaneous sterilization under natural
- Drying : unreliable, is of theoretical interest
- Dry heat : Flaming, incineration, hot air
- Moist heat : Pasteurization, boiling, steam under pressure
- ~~Moist heat : Pasteurization, boiling~~
- Radiation : α, γ, cosmic and UV radiation.

→ Chemical agents

- Alcohol : Ethyl, Isopropyl, trichlorobutanol.
- Aldehyde : Formaldehyde, glutaraldehyde.
- Halogens : Iodophores, Hypochlorites
- Phenols : Hexachlorophenes, chlorhexidine.
- Surface active agents : Cetrimide, Cetavalon
- Gases : Ethylene oxide, β-Propriolactone.

⇒ Sterilization disinfection in dental office:

→ Dry heat oven
- Extraction forceps and elevator
- Hand scales
- Filling instruments
- Tray and tumbler
- Mouth mirror
- Impression trays.
- RCT material

→ Autoclave
- Handpieces
- Ultrasonic
- Towels.
- Sutures
- Cotton and Gauze
- Gloves.

→ Chemical solution
- Surgical burs
- Diamond burs
- Light use tips.

→ Formaldehyde
- Plastic cheek retractor.
- Acrylic obturator.
- Splints.

→ **Autoclave:**

Temperature : 121°c (250°F)

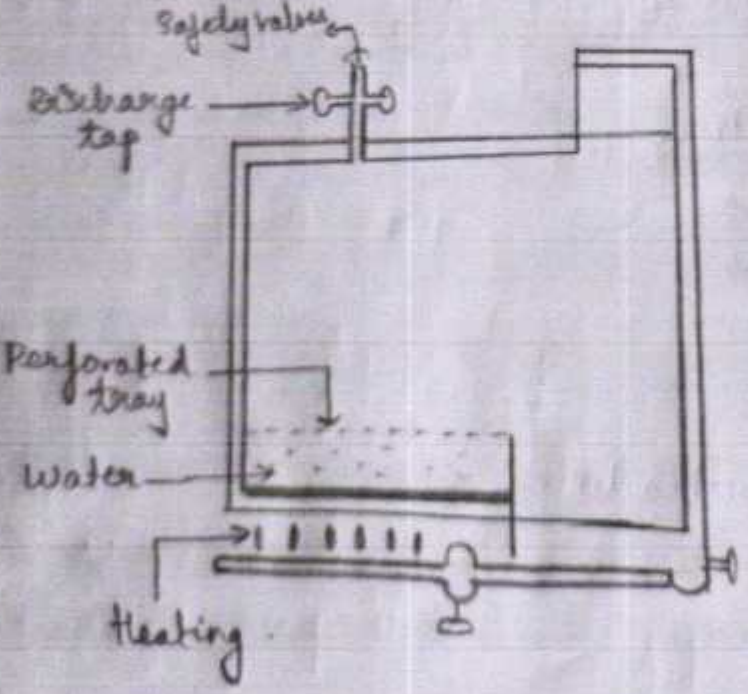

Pressure : 15 lpa

Exposure time : 15 - 30 min

20 c - 12 min

Advantages : Good penetration
Non-toxic
Time efficient

Precautions : Non-stainless steel stains corrode
May damage rubber and plastic
Do not use closed containers.

KMCT DENTAL COLLEGE
P.O. Mimassery
Mukkam, Kozhikode Dt.
Kerala - S. India

⇒ Unsaturated Chemicals :-

Temperature : 184°C

Pressure : 216 kPa

Exposure time : 20 min.

Advantages : No corrosion
Time efficient

Precautions : Do not use closed containers.
Must use special solutions.
Use hazardous chemicals.

AMALGAM

→ Classification

I) According to content
- * Copper amalgam
- * Silver amalgam
- * Preamalgamated alloys
- * Amalgam with noble metals.

II) According to no of alloy metals.
- * Binary
- * Ternary
- * Quarternary.

III) According to whether the powder consists of unmixed/admixed alloy
- * Admixed alloy
- * Single composed alloy

IV) According to shape of powder particles
- * Spherical shape
- * lathe cut
- * Combination of spherical & lathe cut.

V) According to powder particle size
- * Microcut
- * Fine cut
- * Coarse cut.

KMCT DENTAL COLLEGE

The amalgamation reaction

$$Ag_2Sn + Hg \longrightarrow Ag_2Hg_3 + Sn_{7-8}Hg + Ag_3Sn$$
(γ) (γ_1) (γ_2) (γ) (unreacted)

- The γ phase is the strongest phase. The set amalgam will be stronger if more γ is retained.
- Though γ is the strongest phase, these consumed γ particles contribute to the strength of amalgam only when they are bound to the matrix

High copper admixed alloys

The reaction occurs in two steps, the first step is similar to that shown in conventional low copper alloys.

$$Ag_3Sn + Hg \longrightarrow Ag_2Hg_3 + Sn_{7-8}Hg + Ag_3Sn$$
(γ) (γ_1) (γ) (unreacted)

The second step of the reaction is as follows:

$$Sn_{7-8}Hg + Ag\text{-}Cu \longrightarrow Cu_6Sn_5 + Ag_2Hg_3 + Ag_3Sn$$
(γ_2) (Eutectic)

High Copper single compositioned alloy

Ag-Sn-Cu alloy particles + Hg $\longrightarrow$ $Ag_2Hg_3 + Cu_6Sn_5 +$ Unconsumed alloy powder.

10) GLASS IONOMER CEMENT (GIC)

- By Wilson and Kent
- GIC is a combination of the powder of silicate cements with the liquid of polycarboxylates, hence the name "aluminosilicate polycarboxylate" (ASPA).
- Other names:
  Polyalkenoates
  Dentin substitute
  Man made dentin.
- Has chemical coadhesion to teeth.

→ Types:

Type I - Luting and bonding cements
Type II - Restorative cement
Type III - Liners and bases
Type IV - Pit and fissure sealants
Type V - Orthodontic GIC
Type VI - Core build up material
Type VII - High fluoride releasing GIC
Type VIII - GIC for ART
Type IX - Pediatric GIC

Manassery, Mukkam

Single compositional alloy powder
- Ternary alloy in spherical form
  Silver - 60%
  Tin - 25%
  Copper - 5%.

- Ternary alloy is spheroidal form
  composition same as for ternary alloy in spherical form.

- Quaternary alloy in spherical form.
  Silver - 59%
  Copper - 13%
  Tin - 24%
  Indium - 4%.

→ Setting reaction

Low copper conventional amalgam alloys

Amalgamation occurs when silver alloy particles are triturated with mercury. During trituration, mercury diffuses into the γ phase of the alloy particles reacting mainly silver and tin.

Mercury has a ~~hundred~~ limited solubility for silver as compared to tin. Since the solubility of silver mercury is much lower than that of tin, the remains in solution longer than silver. When this solubility exceeds the wt%, the silver starts precipitating first and the γ_2 phase is then formed & γ_1 phase precipitates later.

UG RESEARCH REPORT

\To stimulate the scientific minds of undergraduate students and help them to understand the intricacies of conducting evidence based scientific research, a novel initiative by KMCT Dental College "Undergraduate short term research program" (UGRP) was introduced for the 2019 batch of interns. The Committee formed to coordinate the undergraduate research program comprised of Research Coordinator, Dr Auswaf Ahsan, H.O.D, Department of Oral Medicine, Dr Manoj Vengal, Professor, Department of Oral Medicine and Dr Dhanya Muralidharan, H.O.D, Department of Public Health Dentistry. A team of enthusiastic mentors from each department was designated to guide the allotted interns through their research work.

The first phase was Orientation on "Need for Undergraduate Research" by Dr Auswaf Ahsan, H.O.D, Department of Oral Medicine and on "How to conduct research" by Dr Manoj Vengal, Professor, Department of Oral Medicine and "Guidelines for UGRP Research proposal" by Dr Dhanya Muralidharan for students and Mentors on 5th April 2019. Following which the Research Committee on 13th May 2019 evaluated the progress of work done for UGRP and scheduled the date for scientific review of the research proposals. The second phase saw an enthusiastic team of KMCT students, steered by their mentors, presented their research synopses which focused on the various aspects of oral health, patient welfare, material science and technological innovations pertaining to different branches of dentistry on 19th July. The research synopsis presentation convened by Dr Auswaf Ahsan and Dr Dhanya Muralidharan, was inaugurated by Principal Dr Manoj Kumar KP. The Committee tasked with reviewing the students proposals for its scientific merit and ethical clearance was Vice Principal, Dr Nizarosiyo RK, Dr Prathyusha P, H.O.D, department of Pedodontics andDr Harish Kumar VV, H.O.D, department of Periodontics. The students also had a session on statistical soft wares used in research by Dr Arun Paul, faculty, department of Public Health Dentistry.

The students presently are in phase three of their research work, where in their proposals are modified according to the suggestions of the scientific committee and are ready to go for the execution phase of their proposals. Short term research work will improve the student's to develop critical and logical thinking skills and pave way for numerous paper presentations and scientific publications.

GUIDELINES FOR UNDERGRADUATE RESEARCH PROGRAM

- Hardcopy of the following documents to be submitted to review committee:
  1. Request letter to chairman for ethical clearance
  2. A brief Proposal of the research work in the format given
  3. Key article- a minimum of three articles
  4. Data recording proforma such as clinical examination recording sheet, questionnaire, consent forms etc., to be attached.
  5. For those requiring data collection outside KMCT Dental College- a request letter to Principal forwarded by the mentor and H.O.D of the concerned department needs to be attached
- Soft copy of the presentation along with hardcopy documents to be submitted to the committee three days in advance of date of presentation.
- The presentation should be limited to not more than 10 slides, with one slide for introduction and rest focusing on methodology

GUIDELINES FOR INTERNSHIP RESEARCH PROGRAM

1. The short term research project should be completed within a period of three months from the date of allotment.
2. A brief presentation of the research project should be ready within 2 weeks of commencement and will be reviewed by the scientific committee formed for approval of Short term Research Program.
3. The second review will be after one month and the final review at the end of three months.
4. Research topics can focus on patient care, material sciences, teaching methods, surveys etc.
5. All studies have to follow observational study designs- Experimental studies are not allowed as a part of this program.
6. When selecting the topics, Mentors have to keep in mind feasibility of the study and possibility of completing the study within the stipulated time.
7. Keeping in mind the current COVID-19 pandemic situation, it is advisable to go for online questionnaire survey type studies.
8. The research work should not be clubbed with any PG thesis or their short term research paper work.
9. A group of 4 interns will be guided by a mentor from each Department.
10. The mentor will decide which student is the principle investigator for the batch.
11. The student expense for the research should not exceed Rs 500/- per head.

12. If a student needs to leave the college premises for their research work, prior permission is to be taken through proper channel ie., mentor, H.O.D and Principal.
13. It is mandatory that the research work done should be published.
14. The research work once completed should be published in KMCT Dental college journal 'Dental Bites'.
15. For publication the students' names based on work contribution should be given priority- mentor will be second and corresponding author and other co-authors if present can be placed third in order.
16. There is a prize for best short-term research project for every batch of interns.

SUB: INTERNSHIP-SHORT TERM RESEARCH PROJECT

It has been decided to introduce short term research project as a part of internship programme. Two mentors from each department are to guide the group of allotted interns to take up and submit short term research projects in the respective departments. The submission of the project is mandatory for completion of internship programme from current fresh batch of interns onwards. An orientation lecture for mentors and interns is to be held on 05/04/19, Friday, between 9 to 9:45 am at 7th floor Lecture hall.

All H.O.D's to ensure attendance of Mentors and interns from their department.

GUIDELINES FOR UNDERGRADUATE RESEARCH PROGRAM

1. The short term research project should be completed within a period of three months from the date of allotment.
2. A brief presentation of the research project should be ready within 2 weeks of commencement and will be reviewed by the scientific committee formed for approval of Undergraduate Research Program.
3. The second review will be after one month and the final review at the end of three months.
4. It is mandatory that the research work done should be published.
5. The mentor will decide who the principle investigator is.
6. The students' names will be given priority in the research work publication followed by the mentors.
7. Research areas can focus on patient care, material sciences, teaching methods, surveys etc.
8. The student expense for the research should not exceed Rs 500/- per head.
9. The research work should not be clubbed with any PG thesis or their short term research paper work.
10. If a student needs to leave the college premises for their research work, prior permission is to be taken through proper channel ie., mentor, H.O.D and Principal.
11. There is a prize for best short term research project for every batch of interns.

SUB: INTERNSHIP- RESEARCH PROGRAMME

It has been decided to introduce short term research project as a part of internship programme. Two mentors from each department are to guide the group of allotted interns to take up and submit short term research projects in the respective departments. The submission of the project is mandatory for completion of internship programme for current batch of interns. An orientation lecture for interns is being organized by the scientific committee for Internship Research programme in two sessions on 02/12/20 & 03/12/20, Wednesday and Thursday, from 8:30 to 09:30 am at third floor Lecture hall 1.

All H.O.D's to ensure attendance of interns from their department as per the list attached.

PERCEIVED SOURCES OF STRESS AMONGST DENTAL STUDENTS IN DENTAL COLLEGE: A CROSS SECTIONAL STUDY

*Abhishek S Nair, *Aparna PM, **Dr.Arun Paul, ***Dr.Dhanya Muralidharan, *Namitha Padmakumar, *Reshma Prasad, *Aysha Suha MN

Abstract

Background: Stress is believed to cause detrimental effects on academic performance of students. Identification of the sources of stress is important in dental education program, as it gives opportunity to takevarious measures to prevent stress in the dental school environment. The rationale of the present study was to identify the various sources ofstress among dental school students in a private dental institution in Kerala, India. **Materials and Methods:** A questionnaire based crosssectional study was conducted among final year students and interns of the dental college. Questionnaire used in the study comprised themodified version of Dental Environmental Stressquestionnaire. A four pointlikert scale was used to record the responsesfrom the subjects. A total of 150 subjects participated in the study. Statistical analysis was done using SPSS package version 20.**Results:** Among the participants, 24.6% (37) were males and 75.4% (113) were females. Major stress factor was academic related (p=0.04), lack of confidence in clinical decision making (p=0.006) and insecurity regarding dental career (p=0.03). Mean stress scores were high for academic related 3.5±1.0, followed by career related 2.9±1.0 questions. **Conclusion:** It is evident that dental studentsencounter high levels of stress. Present study identified that the major stressors were academic related and career relatedrather than personal issues. Our study also focuses the importance of stress management programs to minimize the impact of stress on both academic and personal lives of the students.

Key Words: Dental students, stress, academic, interns

Corresponding Author: Dr. Arun Paul

**Intern, **Reader, ***Professor & Head,. Dept. of Public Health Dentistry, KMCT Dental College, Manassery, Kozhikode 673602*

Introduction

The term stress describes external demands (physical or mental) on an individual's physical and psychological well-being. It is normal for everybody to experience stress to some extent, but too much stress may be harmful. Attending a school, college or university is a rewarding experience but it is also a time of considerable anxiety and stress for students. Students are subjected to different kinds of experiences which makes them vulnerable to undergo a lot of stress.[1]

Stress in dental students may be multi-factorial, arising from both the academic and socio-cultural environment, and attributable to social support issues

Dr. MANOJ KUMAR Principal

(emotional and financial).[2] There is some evidence that interpersonal factors more importantly the continuous scrutiny of staffs and excessive demands on performance made by the faculty in the dental school is highly stressful for students.[3] There is a dearth of work regarding stress sources in Indian undergraduate dental students. Hence, this study was aimed to determine the potential sources of stress in undergraduate dental students. This knowledge could be used to institute requisite institutional changes, and encourage the healthy active strategies to combat stress and improve academic performance and psychological well-being of dental students. The aim of this study is to assess the factors associated with stress in dental students in a dental college.

Materials & Methods

An institution based cross-sectional study was conducted among final year students and interns of KMCT Dental College in Kozhikode, Kerala. Ethical clearance for conducting the study was obtained from the Institutional Ethics Committee. Informed consent was obtained from every subject prior to the start of the study.

The proforma was pilot tested on 10% of the population randomly selected. Study was done for a period of 2 months. Study population consisted of 4th (final year) and house surgeons of the dental college. A sample of 150 students were included in the study and participation in the study was voluntary.

Inclusion criteria: All the students from final year and Internship.

Exclusion criteria: Students not willing to participate, students absent during the day of study.

Sample size was calculate using the formula; total of 150 subjects will be selected.

$$N = \frac{Z^2_{\alpha/2} \times p \times (1-p) \times D}{E^2}$$

A self-administered questionnaire was distributed to the students in their classes prior to lectures. An opportunity to ask questions were provided and clarifications were made. Questionnaire used in the present study comprised the modified version of the questionnaire used in Dental Environmental Stress (DES) survey, which was validated and translated to suit the Indian dental environment. The responses to the items were based on a four-point Likert scale with response options of 1 = not stressful, 2 = slightly stressful, 3 = moderately stressful and 4 = very stressful.

Statistical analysis

The data will be analyzed using SPSS version 20. Descriptive statistics will be computed for all the independent and dependent variables. All the continuous variables will be subjected to test for normality and further independent t test will be performed. Level of significance kept at, $p<0.05$.

Results

A total of 150 subjects participated in the present study, 66.7% from final year and 33.3% were house surgeons (Table 1). The

Dr. MANOJ KUMAR.K.P

Table 1: Distribution based on year of study

Year of study	N	%
Final year	100	66.7
House surgeon	50	33.3

Table 2: Distribution of various stresses among dental students (mean score)

Academics performance	**Mean**	**SD**
Amount of assigned work	1.8	0.9
Competition with peers for grades /marks	2.7	1.0
Lack of time to do assigned work	2.2	1.0
Inapproachability of the teaching staff	3.5	1.0
Fear of failing a course or the year	2.4	0.9
Clinic/patient related stress		
Patient being late/not showing	1.3	0.9
Patient cooperation/compliance	2.3	1.0
Lack of confidence in making clinical decisions	2.9	0.9
Completion of clinical cases/quota	2.4	1.0
Personal issues related to stress		
Difficulty in making friends	1.4	1.0
Relation with opposite sex	2.1	0.8
Financial constraints	1.9	0.9
Health problems	1.3	0.9
Drinking/drug dependency	1.6	0.6
Professional/career related stress		
Insecurity concerning dental career	2.9	0.9
Unemployment fear	2.7	0.8
Possibility to pursue post graduation or Clinic Set Up	2.5	1.2
Lack of confidence in career decision	2.5	1.0

students were in the age group of 18–23 years, with mean age group 20.49. Among the 150 students, 24% (36) were males and 76% (114) were females. Female students were more when compared to the male students in both the years.

Table 2 shows that among academic stressors the inapproachability of the teaching staff was considered as highest stress factor with a mean score of 3.5±1.0, followed by competition from peers (2.7±1.0). Lack of confidence in making clinical decisions was considered stressful (2.9±0.9) inside the clinics when working on a patient. Among the personal issues it was found that relation with opposite sex was causing high stress (2.1±0.8) in students. Major stress factor in career related issues was the insecurity concerning the dental career (2.9±0.7).

Table 3: Comparison of major stressors between both years

Major stressors	Final year Mean±SD	House surgeon Mean±SD	P value
Academics performance (Inapproachability of the teaching staff	2.30±1.03	1.94±0.97	0.04*
Clinic/patient related stress Lack of confidence in making clinical decisions	2.47±1.00	2.02±0.76	0.006*
Personal issues related to stress Relation with opposite sex	1.90±0.13	1.88±0.12	0.94
Professional/career related stress Insecurity concerning dental career	1.59±0.53	2.80±1.13	0.03*

Dr. MANOJ KUMAR.K.P Principal KMCT Dental College Manassery, Mukkam

Table 3 depicts that the stress score was significantly higher in final year students in terms of academic performances (p=0.04*) and patient related stress (p=0.006*). Carrier related stress was significantly higher in house surgeons when compared to final year students (p=0.03*). It was found that personal issues related stress was almost same in both the groups and showed no differences.

Discussion

Among the medical profession dental education is considered to be very stressful for students. The findings are consistent across different countries, universities, and curriculums.[3,5] Dental training includes clinical postings in various departments, completion of specified number of patient procedures called as "quotas", attending lectures, seminars, preclinical works and studying for examinations add 'to the overall stress.

This may be because the students may feel humiliated when staffs don't approve their work which they expect to do irrespective

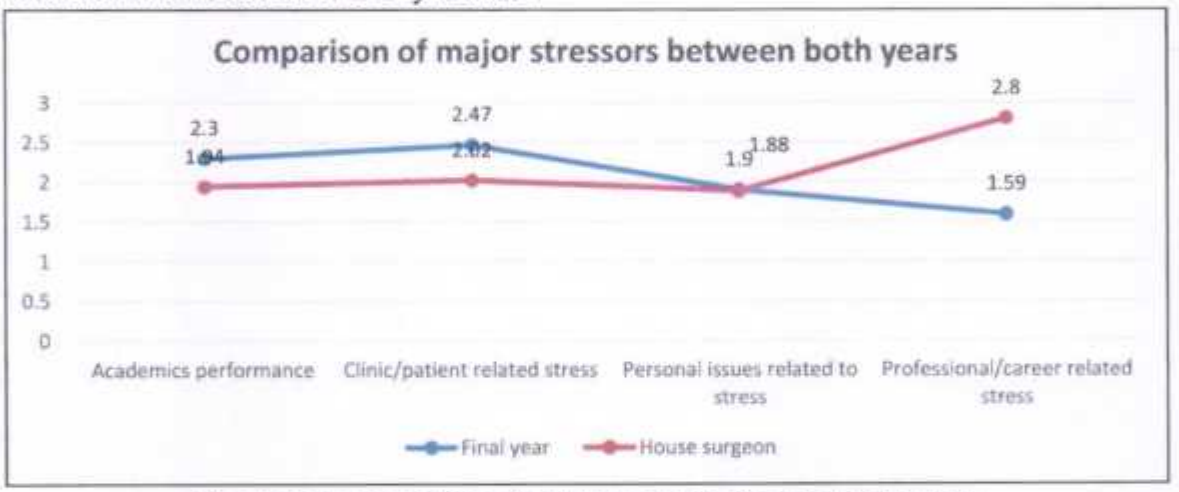

Figure 1: Comparision of major stressors between both years

of the nature of work, also when staff criticise them for their work. Unlike the other profession where the sole dependency on textbooks can cater students need in terms of knowledge but in clinics when it comes to treating a patient proper guidance from an experienced staff is mandatory to learn the skills.

During the clinical posting it's the difficulty in decision making regarding patient selection and treatments which put the students under the stress and also to cope up with the prescribed quotas by each university. Staff insisting to complete the quotas on time was reported to be a major stressor, as every speciality have there on regulation regarding quotas. It also depends on the general out patient in that particular college and also the number of students posted.

No significant difference was found in our studies in terms of student anxiety and stress related to the personal issues. Problems like drug dependency, financial

ASSESSMENT OF POST INSERTION PROBLEMS AMONG REMOVABLE DENTURE WEARERS IN THREE DENTAL INSTITUTIONS OF CENTRAL MALABAR

*Aswathi Mahesh,*Lubaiba Manat, **Dr.Abu Nazar N,**Dr. Monisha VS,
*Amal Ajith, *Fathima V.V, *Prajitha T, *Shahiya K.S

Abstract

Background: Removable partial dentures are an economic and easy treatment modality for edentulous patients, but some patients may encounter few complications during their adaptation period. If these complaints are not addressed properly it can lead to patient disappointment and ultimately removable dental prostheses failure. The present study intends in providing a structuro-functional assessment of complete denture complaints as reported by patients of three Dental Colleges in the Malabar region. **Aims and objectives:** To evaluate the incidence of common post insertion problems and to point out and minimize common post insertion complaints of removable dentures fabricated in dental institutions of central Malabar. **Materials and Methods:** A questionnaire based study was conducted in three dental institutions of Central Malabar. The study was carried out on 120 patients who had undergone prosthetic rehabilitation with removable dental prosthesis from these dental colleges and the post insertion complications were evaluated between them. The questionnaire consisted of questions based on various post insertion complications like pain on insertion and removal, ulceration, aesthetics, difficulty in speech, ill-fitting dentures, difficulty in mastication, reduced tongue space. **Results:** According to the study, 95% were satisfied with the denture and only 4.2% showed dissatisfaction. 48.3% complained about ill-fitting dentures, 42.5% about loss of retention, only 27.5% about pain and discomfort ,10% about cheek bite,2.6% about radiating pain .92.5% were satisfied with the denture esthetics, 87.5% were satisfied with teeth shape, 90% with teeth size and 100% with the lip support and 5.8% had a negative response about the sunken cheek appearance. **Conclusions:** Ill filling dentures were the most frequent complaint among denture wearers in the present study followed by lack of retention. Most of the patients were content with the aesthetic aspect of the denture. The most common reason why patients wanted rehabilitation of the lost dentition was for mastication. The quality of denture in the department can be assessed and further efforts can be made on improving the aspect of denture fabrication by undergraduates and postgraduates.

Key Words: Removable partial denture, Post insertion complaints, Denture wearers, Retention

Introduction

Removable Prosthodontics denotes the branch of Prosthodontics concerned with replacement of teeth and contiguous structures for edentulous or partially edentulous patients by artificial substitutes that are readily removable from mouth by the patient. Removable dental prostheses can be partial or complete dental prosthesis. Though removable partial dentures are an economic and easy treatment modality for edentulous patients, some patients may encounter few complications during their adaptation period. The major factors that cause post insertion complaints are thick or over extended denture flanges, lose or tight fitting dentures, occlusal interferences or frenal impingement, overextended borders, impingement of clasp and entrapment of movable tissues causing pain and loose dentures due to poor seal or over extension. If these complaints are not addressed properly it can lead to patient disappointment and ultimately removable dental prostheses failure.

Determining the chief cause of a complaint is important not only for its redressal but also to avoid similar mistakes in future. No single factor appears to determine the patient's satisfaction with his complete denture; rather, a concerted action of psychological, biological, anatomical, and technical factors is decisive.

The present study intends in providing a structuro-functional assessment of complete denture complaints as reported by patients of three dental colleges in the Malabar region.

Aims and objectives

- To determine the frequent post insertion complaints associated with removable denture prostheses.
- To evaluate the incidence of common post insertion problems.
- To point out and minimize common post insertion complaints of removable dentures fabricated in dental institutions of central Malabar.

Materials and methods

Systematic random sampling was done. Patients who had worn removable dentures for at least 6 months were the minimum criterion for selection. A verbal and written consent was obtained from each patient.

The general information regarding name, age, gender, occupation address, education and socioeconomic status were collected from the patient.

A questionnaire form was designed to determine the most common problems associated with complete and removable partial dentures.

Result

Descriptive statistical analysis were done. Out of the 120 patients studied, 53 were males and 67 were females. The majority of

Dr. MANOJ KUMAR.K.P
Principal
KMCT Dental College
Manassery, Mukkam

patients were 50 years or above. 68.3% preferred to replace the denture for improve function,11.7% for esthetics and 20% for phonetics. 93.3 % had used denture previously.

Table 1: The questionnaire and the response obtained

Questions asked	Response as "Yes" (%)	Response as "No" (%)
Ill-fitting denture	48.3	51.7
Retention	42.5	57.5
Pain	27.5	72.5
Cheek bite	10.0	90.0
Radiating pain	2.6	97.4
Denture esthetics	92.5	7.5
Satisfactory teeth shape	87.5	12.5
Satisfactory Teeth size	90	10
Sunken cheek appearance	5.8	94.2
Lip support	100	0
Teeth clattering	3.3	96.7
Restricted mouth closure	7.5	92.5
Food lodgment	10.8	89.2
Lisping	10.8	89.2
Whistling	1.7	98.3
Gagging	0.8	99.2

According to the study, 95% were satisfied with the denture and only 4.2% showed dissatisfaction. Assessing the most common complains; 48.3% complained about ill fitting dentures, 42.5% about loss of retention, only 27.5% about pain anddiscomfort ,10% about cheek bite,2.6% about radiating pain.

92.5% were satisfied with the denture esthetics, 87.5% were satisfied with teeth shape, 90% with teeth size and 100% with the lip support and 5.8% had a negative response about the sunken cheek appearance.

Assessing the functional problems while using complete denture; food lodgment was given by 10.8%, lisping by 10.8%, restricted mouth closure by 7.5% ,teeth clattering by 3.3% , whistling by 1.7% and gagging by 0.8%.

Discussion

Post insertion complications arises due to poor diagnosis, incorrect treatment planning and denture design. Therefore emphasis should be given for careful designing of the denture, improved impression technique with adequate border molding, good occlusal records, and careful denture trial and insertion followed by scheduled post insertion reviews. Patient's acceptance and motivation to use the removable dental

Dr MANOJ KUMAR.K.P
Principal
KMCT Dental College
Manassery, Mukkam

prosthesis also play a significant role in success.

Thus it is important that patients are rigorously counseled during the fabrication process that they will have to come and get the post insertion complaints resolved.

Conclusions

Ill filling dentures were the most frequent complaint among denture wearers in the present study followed by lack of retention. Most of the patients were content with the aesthetic aspect of the denture. The most common reason why patients wanted rehabilitation of the lost dentition was for mastication. The quality of denture in the department can be assessed and further efforts can be made on improving the aspect of denture fabrication by undergraduates and postgraduates.

INVITRO COMPARISON OF WORKING LENGTH DETERMINATION BY FIFTH GENERATION APEX LOCATOR AND BY RADIOGRAPHIC METHOD IN PERMANENT TOOTH

*Dr.Nejiya P K , **Dr.M Ramesh Kumar, ***Dr.Elsy P Simon, ****Dr.Ravi S V

Abstract

Background: The use of radiography has become a widespread method for determining working length in endodontics, although it is widely recognized that radiography has its own limitations. In order to render the assessment of working length increasingly accurate different electronic apex locators have been developed. The objective of this study is to compare in vitro working length determination by fifth generation apex locator and by radiographic method in permanent tooth. **Methodology:** Ten single rooted human teeth were used for the study. Access cavity was prepared to gain access to the root canal. For each tooth, the reference (or control) length, corresponding to the actual length, was determined, after which all the teeth were measured independently. Working length was measured by radiographic method and also by a fifth generation apex locator. The results were compared with the actual length. **Results:** The results showed 94.12% accuracy in readings of apex locator and 88.2% accuracy with radiographic readings. **Conclusion:** The use of apex locators was superior to the radiographic method.

Key Words: Apical constriction; working length; electronic apex locator.

Introduction

Determining the correct working length is the main factor that leads to success in root canal treatments. Recent studies have shown that histologic results after endodontic treatment are superior when instrumentation and obturation are limited to the apical narrowing.

Effective disinfection of the root canal consists of complete removal of the necrotic pulp, microorganisms and debris, without affecting the periapical tissues. Therefore, correct measurement of the root canal length is essential.The technique commonly used to determine the working length is the radiographic technique.

However, it is a method that has limitations and disadvantages, since it presents two dimensional images of three-dimensional objects, is sensitive to the technique, and exposes the patient to ionizing radiation. But the main difficulty relates to the inability of radiographic imaging to determine variability in apical anatomy. This may inadvertently result in apical

Dr. MANOJ KUMAR.K.P Principal KMCT Dental College Manassery, Mukkam

perforations, over instrumentation, overfilling, postoperative pain, as well as deficient and incomplete instrumentation and obturation. Such events can evidently lead to unsuccessful endodontic therapy. However, this method is widely used because radiography is routinely present in dental surgeries dentist, assisting him in the diagnoses for example.

In 1962, Sunada demonstrated that the electrical resistance between the periodontal ligament and the oral mucosa is a measurable constant. Different generations of electronic devices (apex locators) have been developed to measure root canal length.[1]

Material and Methods

The study was done on 10 single-rooted human anterior teeth without caries, which had been extracted for periodontal reasons. The teeth were kept in 0.2% Chlorhexidine solution until use. Complete examination to discard the existence of root fractures was done and complete apex formation was confirmed in all the cases. Adequate access opening in the crown portion of the teeth were made, so as to have a straight line access to the root canal. The canal was irrigated with 5 ml of 2.5% sodium hypochlorite,[8] after which canal permeability was evaluated using a number 10 K-Flexofile (Mallifer). No obstruction was observed; therefore, all the teeth were included in the study and randomly numbered from 1 to 10.

Before electronically measuring the root canal length, a number 15 K-Flexofile was inserted into each canal, until the tip became visible through the foramen.The file was then withdrawn until a magnifying glass[10] (X 2.5) showed its tip to lie tangential to the apical foramen The silicone stop was adjusted to the level chosen as reference for root canal measurement and an endoblock (Dentsply) was used to measure the distance from the silicone stop to the file]. This measurement was recorded as the reference (or control) length, corresponding to actual length.

Figure 1:(a) file inserted in the canal (b) file veiwed from apical end with the help of magnifi cation (c) silicon stopper adjusted upto the established working length

An adequate amount of alginate was condensed within the molds, and upon setting, the corresponding tooth was embedded within the alginate, leaving approximately 5 mm of the root surface exposed. The tooth was kept in that position until the alginate had set completely. All measurements were made in intervals of two hours, with the alginate kept sufficiently humid for this period of time. During electronic measurement, the circuit was closed in invitro environment by inserting the labial clip of the corresponding locater into the alginate (in a cut made with the help of B. P. blade while the alginate was setting), stabilizing it with transparent adhesive tape and attaching the file holder to the file. Working length of each samples were determined radiographically.

constraints or relationship issues are not significantly causing any stress in the students. Similar findings were observed in study conducted in Bangalore, India.

Worries regarding the future after BDS is the main concern for stress among the students and this is alarmingly high inhouse surgeons, majority of them are insecure about the future whether to practise dentistry after the course or to do a postgraduation. Unemployment is also one of the major factors for stress among the students but this was in contrary to the study done in Malaysia.[6]

An introspection and reconsideration of the existing curriculum in the dental education system is essential to foster a regime which is more student-centred and help in coping stress amongst students. Accordingto Schwartz et al, the establishment of student advisorsand counsellors within a dental school, combined with afaculty advising system and student-oriented programmes, havecontributed to an improved educational environment.[7]

Conclusion

Our study shows that the prevalence of perceived stress is high among dental students. In the present study it was found that students are worried about their academic performances, they are highly stressed in their clinical postings and academics. Insecurity regarding career was the major source of stress reported by the house surgeons. Students should be taught positive coping strategies and various stress managing techniques to improve the ability to cope with the stress in this demanding profession.

Manassery, Calicut.

To,
The Chairman
Scientific Review Committee

SUBJECT: Submission of under graduate research synopsis to the scientific review committee for approval
(Through proper channel)

Sir,
We, Interns of KMCT Dental College , Manassery, Calicut , hereby submit our UG Research entitled **"Importance of communication in orthodontic practice"** to the Scientific Review Committee for review and approval.

Thanking You,

Yours sincerely,

Shijna.S.....
Aparna.A.Santhosh.....

KERALA UNIVERSITY OF HEALTH SCIENCES

Admission year :2016

College Name:KMCT Dental College, Kozhikode

Sl No.	Title	Course Name	College
1	CONE BEAM COMPUTED TOMOGRAPHIC EVALUATION OF EFFICACY OF CONVENTIONAL AND ROTARY RE-TREATMENT INSTRUMENTS TO REMOVE GUTTA PERCHA WITH AND WITHOUT SOLVENTâ€•- AN IN VITRO STUDY	MDS Conservative Dentistry and Endodontics	KMCT Dental College, Kozhikode
2	TREATMENT EFFICACY USING OCCLUSAL SPLINT FOR ANTERIOR DISC DISPLACEMENT WITHOUT REDUCTION OF TEMPOROMANDIBULAR JOINT	MDS Oral Medicine and Radiology	KMCT Dental College, Kozhikode
3	IN VITRO EVALUATION OF SMEAR LAYER REMOVAL WITH 10 PERCENT CITRIC ACID, 3 PERCENT SODIUM HYPOCHLORITE AND SMEAR CLEAR, WITH AND WITH OUT USING ENDOVAC IRRIGATING SYSTEM: A SCANNING ELECTRON MICROSCOPIC STUDY	MDS Conservative Dentistry and Endodontics	KMCT Dental College, Kozhikode
4	COMPARATIVE EVALUATION OF ANTIFUNGAL ACTIVITY OF FLUCONAZOLE AND COCONUT OIL ON VARIOUS ORAL CANDIDAL SPECIES- AN IN VITRO STUDY	MDS Oral Pathology and Microbiology	KMCT Dental College, Kozhikode
5	INFLUENCE OF SOCIO-DEMOGRAPHIC FACTORS ON THE PATIENTS PERCEPTION OF BENEFITS AND RISKS OF COMPLETE DENTURE THERAPY-AN INSTITUTION BASED STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
6	MAXILLARY SINUS PNEUMATISATION FOLLOWING EXTRACTIONS : A PROSPECTIVE CROSS SECTIONAL PANORAMIC RADIOGRAPHIC STUDY	MDS Oral Medicine and Radiology	KMCT Dental College, Kozhikode
7	STUDY ON PREVALENCE OF VARIOUS DELETERIOUS ORAL HABITS AND RELATED MALOCCLUSION AMONG SCHOOL CHILDREN IN MUKKAM,CALICUT DISTRICT, KERALA - A CORRELATIONAL STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
8	EVALUATION OF VARIATION IN ROOT CANAL CIRCUMFERENCE, AFTER USING THREE DIFFERENT NICKEL-TITANIUM ROTARY SYSTEMS AND CONVENTIONAL K FILES BY CONE-BEAM COMPUTED TOMOGRAPHY: AN IN VITRO STUDY	MDS Conservative Dentistry and Endodontics	KMCT Dental College, Kozhikode
9	ASSESSMENT OF POSITION OF MANDIBULAR CANAL IN RELATION TO MANDIBULAR PLANE IN DIFFERENT SKELETAL MALOCCLUSION GROUPS	MDS Orthodontics and Dentofacial Orthopaedics	KMCT Dental College, Kozhikode
10	EFFICACY OF NON SURGICAL PERIODONTAL THERAPY ON BLOOD PARAMETERS AND C-REACTIVE PROTEIN LEVELS OF PATIENTS WITH CHRONIC PERIODONTITIS HAVING ANEMIA OF CHRONIC DISEASE	MDS Periodontology	KMCT Dental College, Kozhikode

Dr. MANOJ KUMAR.K.P
Principal
KMCT Dental College
Manassery, Mukkam

11	PREVALENCE, ETIOLOGY AND ASSESSMENT OF THE KNOWLEDGE ON EMERGENCY MANAGEMENT OF TRAUMATIC DENTAL INJURIES IN URBAN AND RURAL SCHOOL CHILDREN IN CALICUT DISTRICT- A CROSS SECTIONAL STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
12	MAXILLARY SINUS PNEUMATISATION FOLLOWING EXTRACTIONS-A CROSS SECTIONAL PANORAMIC RADIOGRAPHIC STUDY	MDS Oral Medicine and Radiology	KMCT Dental College, Kozhikode
13	COMPARATIVE IN VITRO EVALUATION OF COLOR STABILITY OF HEAT CURE ACRYLIC RESIN AND THERMOPLASTIC NYLON DENTURE BASE MATERIAL AFTER EXPOSURE TO COMMONLY CONSUMED BEVERAGES	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
14	EVALUATION OF MICRONUTRIENTS (ZINC,IRON,MAGNESIUM,CALCIUM) LEVELS IN CHRONIC GENERALISED PERIODONTITIS PATIENTS: BEFORE AND AFTER NON-SURGICAL PERIODONTAL THERAPY.A QUASI EXPERIMENTAL STUDY	MDS Periodontology	KMCT Dental College, Kozhikode
15	EFFECT OF CONVENTIONAL AND ACCELERATED CASTING TECHNIQUES ON THE MARGINAL ACCURACY OF THE CASTINGS FABRICATED WITH RINGLESS AND METAL RING INVESTMENT SYSTEMS: A COMPARATIVE IN VITRO STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
16	CEPHALOMETRIC ANALYSIS OF SKELETAL STABILITY AFTER 3-D PLATE FIXATION IN BILATERAL SAGITTAL SPLIT OSTEOTOMY IN MANDIBULAR SETBACK SURGERY	MDS Oral and Maxillofacial Surgery	KMCT Dental College, Kozhikode
17	EVALUATION OF SALIVARY FLOW RATE AND SALIVARY PH IN LONG TERM TOBACCO USERS- AN INSTITUTION BASED COMPARATIVE STUDY	MDS Oral Pathology and Microbiology	KMCT Dental College, Kozhikode
18	CLINICAL AND CEPHALOMETRIC EVALUATION OF NASOLABIAL CHANGES IN LEFORT- 1 IMPACTION WITH ANTERIOR MAXILLARY OSTEOTOMY - A PROSPECTIVE STUDY	MDS Oral and Maxillofacial Surgery	KMCT Dental College, Kozhikode
19	MRI EVALUATION OF TEMPOROMANDIBULAR JOINT INTERNAL DERANGEMENT BEFORE AND AFTER ARTHROCENTESIS - A PROSPECTIVE STUDY	MDS Oral and Maxillofacial Surgery	KMCT Dental College, Kozhikode
20	STUDY ON PREVALENCE OF VARIOUS DELETERIOUS ORAL HABITS AND RELATED MALOCCLUSION AMONG SCHOOL CHILDREN IN MUKKAM,CALICUT DISTRICT, KERALA - A CORRELATIONAL STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
21	COMPARATIVE ANALYSIS OF SERUM AND SALIVARY TOTAL CHOLESTEROL LEVELS IN DYSLIPIDAEMICS AND HEALTHY INDIVIDUALS - A CASE CONTROL STUDY	MDS Oral Pathology and Microbiology	KMCT Dental College, Kozhikode

DR.MANOJ KUMAR.K.P
Principal
KMCT Dental College
Manassery, Mukkam

22	A STUDY ON THE COMPARATIVE ACCURACY OF THREE APEX LOCATORS IN MEASURING THE ROOT LENGTH OF PREMOLARS AND PRIMARY MOLARS -AN IN VITRO STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
23	CONE BEAM COMPUTED TOMOGRAPHIC EVALUATION OF EFFICACY OF CONVENTIONAL AND ROTARY RE-TREATMENT INSTRUMENTS TO REMOVE GUTTA PERCHA WITH AND WITHOUT SOLVENT: AN IN VITRO STUDY	MDS Conservative Dentistry and Endodontics	KMCT Dental College, Kozhikode
24	COMPARISON OF EFFICACY OF FLUCONAZOLE AND CLOTRIMAZOLE MOUTHRINSES IN THE TREATMENT OF ORAL CANDIDIASIS	MDS Oral Medicine and Radiology	KMCT Dental College, Kozhikode
25	EVALUATION OF PHOSPHOLIPASE A2 AND SERUM LIPID LEVELS IN CHRONIC PERIODONTITIS PATIENTS WITH HYPERLIPIDEMIA AFTER NON SURGICAL PERIODONTAL THERAPY	MDS Periodontology	KMCT Dental College, Kozhikode
26	ASSESSMENT OF LIP PRINTS IN DIFFERENT GROWTH PATTERNS- AN INSTITUTION BASED STUDY.	MDS Orthodontics and Dentofacial Orthopaedics	KMCT Dental College, Kozhikode
27	EVALUVATION OF PERIORAL SOFT TISSUE IN SKELETAL CLASS II DIVISION I:A COMPARATIVE CEPHALOMETRIC STUDY AMONG MALABAR POPULATION.	MDS Orthodontics and Dentofacial Orthopaedics	KMCT Dental College, Kozhikode

KERALA UNIVERSITY OF HEALTH SCIENCES

Admission year :2017

College Name:KMCT Dental College, Kozhikode

Sl No.	Title	Course Name	College
1	RELATIONSHIP BETWEEN BODY MASS INDEX AND PERIODONTITIS AMONG POST MENOPAUSAL WOMEN- A CROSS SECTIONAL STUDY.	MDS Periodontology	KMCT Dental College, Kozhikode
2	EVALUATION OF ANATOMIC VARIATIONS IN MAXILLARY SINUS USING CBCT	MDS Oral Medicine and Radiology	KMCT Dental College, Kozhikode
3	CEPHALOMETRIC EVALUATION OF FRONTAL SINUS DIMENSION IN VARIOUS SKELETAL MALOCCLUSIONS:A CROSS-SECTIONAL STUDY	MDS Orthodontics and Dentofacial Orthopaedics	KMCT Dental College, Kozhikode
4	SOFT AND HARD TISSUE HEALING AFTER IMMEDIATE IMPLANT PLACEMENT WITH AND WITHOUT USE OF PLATELET RICH FIBRIN: A COMPARATIVE STUDY	MDS Oral and Maxillofacial Surgery	KMCT Dental College, Kozhikode
5	THE EFFECT OF POSTPOURING TIME ON TENSILE STRENGTH, SURFACE ROUGHNESS AND COMPRESSIVE STRENGTH OF TYPE IV DENTAL STONE- AN IN VITRO STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
6	PREVALENCE OF GINGIVAL OVERGROWTH IN PATIENTS TAKING NEWER ANTI-HYPERTENSIVE DRUGS: A HOSPITAL BASED CROSS- SECTIONAL STUDY	MDS Periodontology	KMCT Dental College, Kozhikode
7	EVALUATION OF NEUROSENSORY DEFICITS AND RECOVERY FOLLOWING BILATERAL SAGITTAL SPLIT OSTEOTOMY	MDS Oral and Maxillofacial Surgery	KMCT Dental College, Kozhikode
8	PREVALENCE OF GINGIVAL OVERGROWTH IN PATIENTS TAKING NEWER ANTI-HYPERTENSIVE DRUGS: A CROSS- SECTIONAL STUDY	MDS Periodontology	KMCT Dental College, Kozhikode
9	COMPARATIVE EVALUATION OF ANTIBACTERIAL EFFICACY OF TWO HERBAL ROOT CANAL IRRIGANTS (PROPOLIS, CURCUMA LONGA) WITH 2% CHLORHEXIDINE GLUCONATE AGAINST ENTEROCOCCUS FAECALIS- AN IN VITRO STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
10	COMPARATIVE EVALUATION OF ANTIBACTERIAL EFFICACY OF 0.1%OCTENIDINE HYDROCHLORIDE AND 2% CHLORHEXIDINE GLUCONATE AGAINST ENTEROCOCCUS FAECALIS - AN IN VITRO STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode

Dr. MANOJ KUMAR.K.P
Principal
KMCT Dental College
Manassery, Mukkam

11	COMPARATIVE ANALYSIS OF ANTIOXIDANT ACTIVITY OF MISWAK (SALVODARA PERSICA), GUAVA LEAF (PSIDIUM GUAJAVA) AND MANGO LEAF (MANGIFERA INDICA) WITH VITAMIN C â€"AN IN VITRO STUDY	MDS Oral Pathology and Microbiology	KMCT Dental College, Kozhikode
12	FRACTAL DIMENSION AND LACUNARITY ANALYSIS OF DENTATE AND EDENTULOUS AREAS IN THE MANDIBLE USING PANORAMIC RADIOGRAPHS: A CROSS-SECTIONAL COMPARATIVE STUDY	MDS Oral Medicine and Radiology	KMCT Dental College, Kozhikode
13	EVALUATION OF ANATOMIC VARIATIONS IN THE MAXILLARY SINUS USING CONE BEAM COMPUTED TOMOGRAPHY(CBCT)	MDS Oral Medicine and Radiology	KMCT Dental College, Kozhikode
14	SORPTION AND SOLUBILITY OF HEAT ACTIVATED AND CHEMICALLY ACTIVATED DENTURE BASE ACRYLIC RESINS IN DIFFERENT SOLUTIONS -AN IN VITRO STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
15	RELATIONSHIP BETWEEN BODY MASS INDEX AND PERIODONTITIS AMONG POST MENOPAUSAL WOMEN- A CROSS SECTIONAL STUDY.	MDS Periodontology	KMCT Dental College, Kozhikode
16	SORPTION AND SOLUBILITY OF HEAT ACTIVATED AND CHEMICALLY ACTIVATED DENTURE BASE ACRYLIC RESINS IN DIFFERENT SOLUTIONS -AN IN VITRO STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
17	COMPARATIVE ANALYSIS OF TWO BIOACTIVE SEALERS AND AH PLUS ON THE MICROHARDNESS AND FRACTURE RESISTANCE OF RADICULAR DENTIN OVER TIME - AN IN VITRO STUDY	MDS Conservative Dentistry and Endodontics	KMCT Dental College, Kozhikode
18	CEPHALOMETRIC EVALUATION OF GLENOID FOSSA AND PHARYNGEAL AIRWAY PASSAGE IN RESPONSE TO TWINBLOCK FUNCTIONAL APPLIANCE.	MDS Orthodontics and Dentofacial Orthopaedics	KMCT Dental College, Kozhikode
19	EVALUATION OF ANTIBACTERIAL EFFICACY OF 0.1%OCTENIDINE HYDROCHLORIDE AND 2% CHLORHEXIDINE GLUCONATE AGAINST ENTEROCOCCUS FAECALIS - AN IN VITRO STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
20	PREVALENCE OF CLINICAL COMORBIDITIES INTEMPEROMANDIBULAR JOINT DISORDERS	MDS Oral Medicine and Radiology	KMCT Dental College, Kozhikode
21	ACCURACY OF RADIOVISIOGRAPHY, CONE BEAM COMPUTED TOMOGRAPHY AND ELECTRONIC APEX LOCATOR IN ESTIMATING THE ENDODONTIC WORKING LENGTH- AN IN VITRO STUDY	MDS Conservative Dentistry and Endodontics	KMCT Dental College, Kozhikode

Dr. MANOJ KUMAR.K.P
Principal
KMCT Dental College
Manassery, Mukkam

22	CEPHALOMETRIC EVALUATION OF GLENOID FOSSA AND PHARYNGEAL AIRWAY PASSAGE IN RESPONSE TO TWINBLOCK FUNCTIONAL APPLIANCE-A RETROSPECTIVE STUDY	MDS Orthodontics and Dentofacial Orthopaedics	KMCT Dental College, Kozhikode
23	THE EFFECT OF POSTPOURING TIME ON TENSILE STRENGTH, SURFACE ROUGHNESS AND COMPRESSIVE STRENGTH OF TYPE IV DENTAL STONE: AN IN VITRO STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
24	EVALUATION OF ANTIBACTERIAL EFFICACY OF TWO HERBAL ROOT CANAL IRRIGANTS (PROPOLIS, CURCUMA LONGA) WITH 2% CHLORHEXIDINE GLUCONATE AGAINST ENTEROCOCCUS FAECALIS- AN IN VITRO STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
25	CEPHALOMETRIC EVALUATION OF FRONTAL SINUS WIDTH IN VARIOUS SKELETAL MALOCCLUSION : A CROSS-SECTIONAL STUDY.	MDS Orthodontics and Dentofacial Orthopaedics	KMCT Dental College, Kozhikode
26	AN ORTHOPANTAMOGRAPHIC EVALUATION OF MESIO-ANGULARLY TILTED MANDIBULAR THIRD MOLAR IN EXTRACTION AND NON EXTRACTION CASES.	MDS Orthodontics and Dentofacial Orthopaedics	KMCT Dental College, Kozhikode
27	A COMPARATIVE EVALUATION OF CORONALLY DISPLACED FLAP ALONE AND CORONALLY DISPLACED FLAP WITH PLATELET RICH FIBRIN IN PATIENTS WITH MILLERâ€™S CLASS I & CLASS II GINGIVAL RECESSION A SPLIT MOUTH RANDOMISED CONTROLLED TRIAL.	MDS Periodontology	KMCT Dental College, Kozhikode
28	EVALUATING THE RELIABILITY OF INTERALAR WIDTH AND INTERHAMULAR NOTCH DISTANCE IN THE SELECTION OF MAXILLARY ANTERIOR TEETH	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
29	COMPARATIVE ANALYSIS OF TWO BIOACTIVE SEALERS AND AH PLUS ON THE MICROHARDNESS AND FRACTURE RESISTANCE OF RADICULAR DENTIN AT FOUR TIME INTERVALS - A ONE YEAR IN VITRO STUDY	MDS Conservative Dentistry and Endodontics	KMCT Dental College, Kozhikode
30	ASSESSMENT OF CONDYLAR POSITION BEFORE AND AFTER BILATERAL SAGITTAL SPLIT OSTEOTOMY USING CEPHALOMETRIC ANALYSIS: A QUASI EXPERIMENTAL STUDY	MDS Oral and Maxillofacial Surgery	KMCT Dental College, Kozhikode
31	COMPARATIVE ANALYSIS OF ANTIOXIDANT ACTIVITY OF MISWAK (SALVODARA PERSICA), GUAVA LEAF (PSIDIUM GUAJAVA) AND MANGO LEAF (MANGIFERA INDICA) WITH NATURAL ANTIOXIDANT VITAMIN C â€“AN IN VITRO STUDY	MDS Oral Pathology and Microbiology	KMCT Dental College, Kozhikode

DR.BIJU KUMAR.K.P
Principal
KMCT Dental College
Manassery, Mukkam

32	COMPARATIVE ANALYSIS OF ANTIOXIDANT ACTIVITY OF MISWAK (SALVODARA PERSICA), GUAVA LEAF (PSIDIUM GUAJAVA) AND MANGO LEAF (MANGIFERA INDICA) WITH NATURAL ANTIOXIDANT VITAMIN C â€"AN IN VITRO STUDY	MDS Oral Pathology and Microbiology	KMCT Dental College, Kozhikode
33	PREVALANCE OF CLINICAL COMORBIDITIES IN TEMPEROMANDIBULAR JOINT DISORDERS- A CROSS SECTIONAL STUDY	MDS Oral Medicine and Radiology	KMCT Dental College, Kozhikode
34	COMPARATIVE EVALUATION OF VOIDS IN DIFFERENT OBTURATION TECHNIQUES USING CONE BEAM COMPUTED TOMOGRAPHY â€" AN IN VITRO STUDY	MDS Conservative Dentistry and Endodontics	KMCT Dental College, Kozhikode
35	COMPARATIVE ANALYSIS OF TWO BIOACTIVE SEALERS AND AH PLUS ON THE MICROHARDNESS AND FRACTURE RESISTANCE OF RADICULAR DENTIN AT FOUR TIME INTERVALS - A ONE YEAR IN VITRO STUDY	MDS Conservative Dentistry and Endodontics	KMCT Dental College, Kozhikode
36	ASSESSMENT OF SOCIAL,DEMOGRAPHIC DETERMINANTS AND ORAL HYGIENE PRACTICES IN RELATION TO DENTAL CARIES AND ITâ€™S PREVALENCE AMONG THE CHILDREN ATTENDING ANGANWADIS OF KUTTYATTOOR,KANNUR DISTRICT-A CROSS-SECTIONAL STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
37	PREVALENCE OF DENTAL CARIES AND ITS RELATIONSHIP TO SOCIAL,DEMOGRAPHIC DETERMINANTS AND ORAL HYGIENE PRACTICES AMONG THE CHILDREN ATTENDING ANGANWADIS OF KUTTYATTOOR,KANNUR DISTRICT-A CROSS-SECTIONAL STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
38	EVALUATION OF NEUROSENSORY DEFICITS AND RECOVERY FOLLOWING BILATERAL SAGITTAL SPLIT OSTEOTOMY	MDS Oral and Maxillofacial Surgery	KMCT Dental College, Kozhikode

KERALA UNIVERSITY OF HEALTH SCIENCES

Admission year :2018

College Name:KMCT Dental College, Kozhikode

Sl No.	Title	Course Name	College
1	COMPARISON OF THE TREATMENT EFFICACY OF INTRALESIONAL AND SHORT COURSE ORAL BETAMETHASONE IN THE MANAGEMENT OF ORAL LICHEN PLANUS	MDS Oral Medicine and Radiology	KMCT Dental College, Kozhikode
2	A COMPARATIVE EVALUATION OF THREE STORAGE MEDIA EMBLICA OFFICINALIS, VIT C SYRUP, EFFERVESCENT ASCORBIC ACID TABLETS ON THE VIABILITY OF PERIODONTAL LIGAMENT CELLS ON EXARTICULATED TEETH- AN INVITRO STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
3	COMPARATIVE EVALUATION OF MECHANICAL PROPERTIES OF HEAT CURE POLYMETHYL METHACRYLATE RESINS BY INCORPORATING VARIOUS ESTHETIC FIBRES - AN IN-VITRO STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
4	COMPARATIVE EVALUATION OF SHEAR BOND STRENGTH OF RESIN CEMENT TO LITHIUM DISILICATE BY VARIOUS SURFACE TREATMENTS-AN INVITRO STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
5	EVALUATION OF HYOID BONE POSITION FOLLOWING BILATERAL SAGITTAL SPLIT OSTEOTOMY IN MANDIBULAR PROGNATHISM - A LONGITUDINAL STUDY	MDS Oral and Maxillofacial Surgery	KMCT Dental College, Kozhikode
6	A COMPARITIVE ANALYSIS OF TWO DIFFERENT TECHNIQUES OF ALAR BASE CINCH SUTURING IN LEFORT - 1 MAXILLARY OSTEOTOMY - A RANDOMIZED CONTROL STUDY	MDS Oral and Maxillofacial Surgery	KMCT Dental College, Kozhikode
7	COMPARATIVE EVALUATION OF SHEAR BOND STRENGTH OF RESIN CEMENT TO LITHIUM DISILICATE BY VARIOUS SURFACE TREATMENTS - AN IN-VITRO STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode

17	COMPARATIVE EVALUATION OF THE RHEOLOGICAL PROPERTY OF DIFFERENT COMMERCIALLY AVAILABLE EUGENOL AND NON EUGENOL METALLIC IMPRESSION PASTES: AN INVITRO STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
18	ASSOCIATION BETWEEN MAXILLARY DENTAL ARCH TRANSVERSE DIMENSIONS, PALATAL DEPTH AND PALATAL LENGTH IN UNILATERALLY AND BILATERALLY IMPACTED CANINES: A CBCT STUDY	MDS Orthodontics and Dentofacial Orthopaedics	KMCT Dental College, Kozhikode
19	EVALUATION OF SALIVARY RESISTIN LEVEL IN DIABETIC AND NON DIABETIC PATIENTS WITH CHRONIC PERIODONTITIS BEFORE AND AFTER NON SURGICAL PERIODONTAL THERAPY	MDS Periodontology	KMCT Dental College, Kozhikode
20	EFFECT OF VITAMIN D3 SUPPLEMENTATION ON PERIODONTAL DISEASE OF PATIENTS UNDERGOING NON-SURGICAL PERIODONTAL THERAPY â€" A COMPARATIVE EVALUATION	MDS Periodontology	KMCT Dental College, Kozhikode

21	A COMPARATIVE EVALUATION OF DIFFERENT ESTHETIC FIBER REINFORCEMENTS ON THE FRACTURE STRENGTH OF PROVISIONAL FIXED PARTIAL DENTURE MADE OF AUTOPOLYMERIZING POLYMETHYLMETHACRYLATE: AN INVITRO STUDY.	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode

KERALA UNIVERSITY OF HEALTH SCIENCES

Admission year :2020

College Name:KMCT Dental College, Kozhikode

Sl No.	Title	Course Name	College
1	A COMPARATIVE EVALUATION OF QUANTITATIVE CHANGES IN THE ORAL STREPTOCOCCAL COLONIES DURING FIXED ORTHODONTIC TREATMENT AND IN RETENTION.	MDS Oral Pathology and Microbiology	KMCT Dental College, Kozhikode
2	COMPARISON OF TOPICAL AMLEXANOX 5% AND TRIAMCINOLONE ACETONIDE 0.1% IN THE TREATMENT OF ORAL LICHEN PLANUS A RANDOMIZED CONTROL TRIAL	MDS Oral Medicine and Radiology	KMCT Dental College, Kozhikode
3	COMPARATIVE EVALUATION OF BOND STRENGTH ON REATTACHMENT OF FRACTURED TOOTH FRAGMENT WITH DIFFERENT REHYDRATION TECHNIQUES-AN INVITRO STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
4	A COMPARATIVE EVALUATION OF QUANTITATIVE CHANGES IN THE ORAL CANDIDA COLONIES DURING FIXED ORTHODONTIC TREATMENT AND IN RETENTION	MDS Oral Pathology and Microbiology	KMCT Dental College, Kozhikode
5	QUANTITATIVE AND QUALITATIVE BACTERIAL ANALYSIS OF AEROSOL GENERATED BETWEEN ELECTRIC AND AIR TURBINE DENTAL HANDPIECE-A COMPARATIVE STUDY	MDS Conservative Dentistry and Endodontics	KMCT Dental College, Kozhikode
6	COMPARISION OF TEMPOROMANDIBULAR JOINT MORPHOLOGY IN PATIENTS WITH AND WITHOUT TEMPOROMANDIBULAR JOINT DYSFUNCTION; A CBCT STUDY	MDS Oral and Maxillofacial Surgery	KMCT Dental College, Kozhikode
7	PREVALENCE OF BIFID MANDIBULAR CANAL USING CBCT - A CROSS SECTIONAL STUDY	MDS Oral and Maxillofacial Surgery	KMCT Dental College, Kozhikode
8	COMPARATIVE EVALUATION OF ROOT SURFACE CONDITIONING EFFICACY OF SODIUM BICARBONATE, METFORMIN AND DOXYCYCLINE:AN IN VITRO STUDY	MDS Periodontology	KMCT Dental College, Kozhikode
9	EVALUATION OF SURFACE MORPHOLOGY AND STRESS DISTRIBUTION OF ORTHODONTIC MINI-IMPLANTS IN MAXILLA USING FINITE ELEMENT ANALYSIS	MDS Orthodontics and Dentofacial Orthopaedics	KMCT Dental College, Kozhikode
10	COMPARATIVE EVALUATION OF ROOT SURFACE CONDITIONING EFFICACY OF SODIUM BICARBONATE, METFORMIN AND DOXYCYCLINE: AN IN VITRO STUDY	MDS Periodontology	KMCT Dental College, Kozhikode

Dr. ANOJ KUMAR K.P
Principal
KMCT Dental College
Manassery, Mukkam

11	ASSESSMENT OF FAILURE LOAD AND SHEAR STRESS OF STAINLESS-STEEL MINI-IMPLANTS WITH DIFFERENT DIAMETERS:AN INVITRO STUDY	MDS Orthodontics and Dentofacial Orthopaedics	KMCT Dental College, Kozhikode
12	COMPARATIVE EVALUATION OF FRICTIONAL RESISTANCE IN VARIOUS BRACKET-ARCHWIRE COMBINATIONS	MDS Orthodontics and Dentofacial Orthopaedics	KMCT Dental College, Kozhikode
13	A COMPARATIVE EVALUATION OF THE EFFECT OF DIFFERENT PREPARATION DESIGNS ON THE MARGINAL ADAPTATION, FRACTURE RESISTANCE AND FRACTURE PATTERN OF PORCELAIN LAMINATE VENEERS â€" AN INVITRO STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
14	COMPARATIVE EVALUATION OF FLEXURAL STRENGTH AND SOLUBILITY OF GLASS IONOMER LUTING CEMENT BY INCORPORATING VARIOUS NANOPARTICLES- AN INVIRO STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
15	COMPARATIVE EVALUATION OF BOND STRENGTH OF BIODENTINE TO COMPOSITE USING A TWO STEP SELF- ETCH ADHESIVE AND A UNIVERSAL ADHESIVE SYSTEM- AN IN- VITRO STUDY	MDS Conservative Dentistry and Endodontics	KMCT Dental College, Kozhikode
16	COMPARING THE SURFACE OCCLUDING CAPACITY OF TWO COMMERCIALLY AVAILABLE DESENSITISING AGENTS CONTAINING POTASSIUM NITRATE AND STANNOUS FLOURIDE - AN IN VITRO STUDY	MDS Periodontology	KMCT Dental College, Kozhikode
17	PREVALENCE OF PONTICULUS POSTICUS AND ITS ASSOCIATION WITH COMORBIDITIES - A LATERAL CEPHALOMETRIC STUDY	MDS Oral Medicine and Radiology	KMCT Dental College, Kozhikode
18	ASSESSMENT OF BIODENTINE PULPOTOMY AS AN ALTERNATIVE TO CONVENTIONAL ROOTCANAL TREATMENT FOR PERMANENT TEETH IN CHILDREN-AN INVIVO STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
19	COMPARATIVE EVALUATION OF SHEAR BOND STRENGTH BETWEEN DENTURE BASE MATERIALS AND ACRYLIC TEETH HAVING DIFFERENT SURFACE TREATMENTS -AN IN-VITRO STUDY	MDS Prosthodontics and Crown and Bridge	KMCT Dental College, Kozhikode
20	EFFECT OF PROBIOTIC COCONUT YOGURT AND LACTOSE FREE YOGURT CONSUMPTION ON SALIVARY PH AND BUFFER CAPACITY IN CHILDREN-AN IN VIVO STUDY	MDS Pedodontics and Preventive Dentistry	KMCT Dental College, Kozhikode
21	PREVALENCE OF DENTAL CARIES AND ITS ASSOCIATION WITH AGE, GENDER, DIET AND ORAL HYGIENE PRACTICE AMONG ADULTS-A HOSPITAL BASED CROSSSECTIONAL STUDY	MDS Conservative Dentistry and Endodontics	KMCT Dental College, Kozhikode

Dr. MANOJ KUMAR.K.P
Principal
KMCT Dental College
Manassery, Mukkam

22	COMPARATIVE EVALUATION ON THE EFFICACY OF DENTINAL TUBULAR OCCLUDING CAPACITY OF BIODENTINE,DIODE LASER AND BIODENTINE IN COMBINATION WITH DIODE LASER:AN IN VITRO STUDY	MDS Periodontology	KMCT Dental College, Kozhikode
23	BACTERIAL COLONIZATION ON DIFFERENT INTRAORAL SUTURE MATERIALS FOLLOWING ORAL SURGICAL PROCEDURES	MDS Oral and Maxillofacial Surgery	KMCT Dental College, Kozhikode
