REPORT

Internal exam is a critical component of the periodontology program, assessing students' knowledge skills and competencies in the field. Grievances do arise during exam process, affecting students' performance and overall experience. The grievance report highlights the importance of ensuring a fair and transparent evaluation process in periodontology. By addressing student grievances and implementing proposed solutions, we focus to improve the overall experience and provide students with a more positive and supportive learning environment

1 Classification of Dental Casting Alloys

→ Based on nobility

Category 1 - High noble alloy having > 65% of noble metals

Category 2 - noble alloy having > 25% noble metals

Category 3 - base metal alloy having < 25% of noble metals

→ Based on main metal composition

Classified based on the main metal present in the alloy

eg: Gold based, nickel based, titanium based

Based on strength

Type I : Soft - Soft strength

used in fabrication of inlays

Type II : Medium - intermediate strength

used in fabrication of inlays, onlays, crowns

Type III : High - High strength

used in fabrication of 1/3 crown, full crown, inlays

Type IV : very high - very high strength

used in fabrication of crown, clasps of

→ Based on three major metals present

eg: Au-Pd-Ag , Pd-Ag-Be

Introduction

- Tumors are abnormal mass of tissue, the growth of which is uncoordinated & continues to remain the same even after the removal of the stimuli.
- Tumors can be of odontogenic or non odontogenic origin & it can also be benign & malignant.

Classification

1. Benign

Tumors arising from odontogenic epithelium only

→ Ameloblastoma - solid/multicystic type.
→ Extraosseous/peripheral ameloblastoma.
→ Squamous odontogenic tumor.
→ Calcifying odontogenic tumor
→ Adenomatoid odontogenic tumor.

2] Ameloblastoma

- Odontogenic tumour

Definition :

- Robinson defined ameloblastoma as unicentric, non-functional, intermittent in growth, anatomically benign, clinically persistent.

Synonyms

- Adamantinoma

clinical features

- age : 20 to 40 years of age
- Sex : Male affected more than female.
- Mandible is more affected than maxilla
- Within mandible, molar and Ramus region affected more.
- Slow growing, gradually increase in size
- It initially involves the cancellous bone and spreads in anteroposterior dimension and then advances buccally or lingually
- At the time, visible symptoms had started to appear it already had spread a large region
- Then causes gross deformity of face.
- In the affected area, tooth movement and resorption of root observed.
- Thinning of cortical plate
- egg shell crackling.

The Grievance Cell plays a crucial role in creating a supportive and productive environment for students by addressing and resolving grievances related to academics, facilities, and overall student welfare. By fostering open communication, the Cell has contributed to improvements across academic, clinical, and administrative aspects of student life.

Objectives of the Grievance Cell

- The primary objectives of the Grievance Cell are to provide a formal mechanism for students to voice concerns or complaints.
- Ensure timely and fair resolution of grievances.
- Promote a respectful, inclusive, and positive environment across the institution.

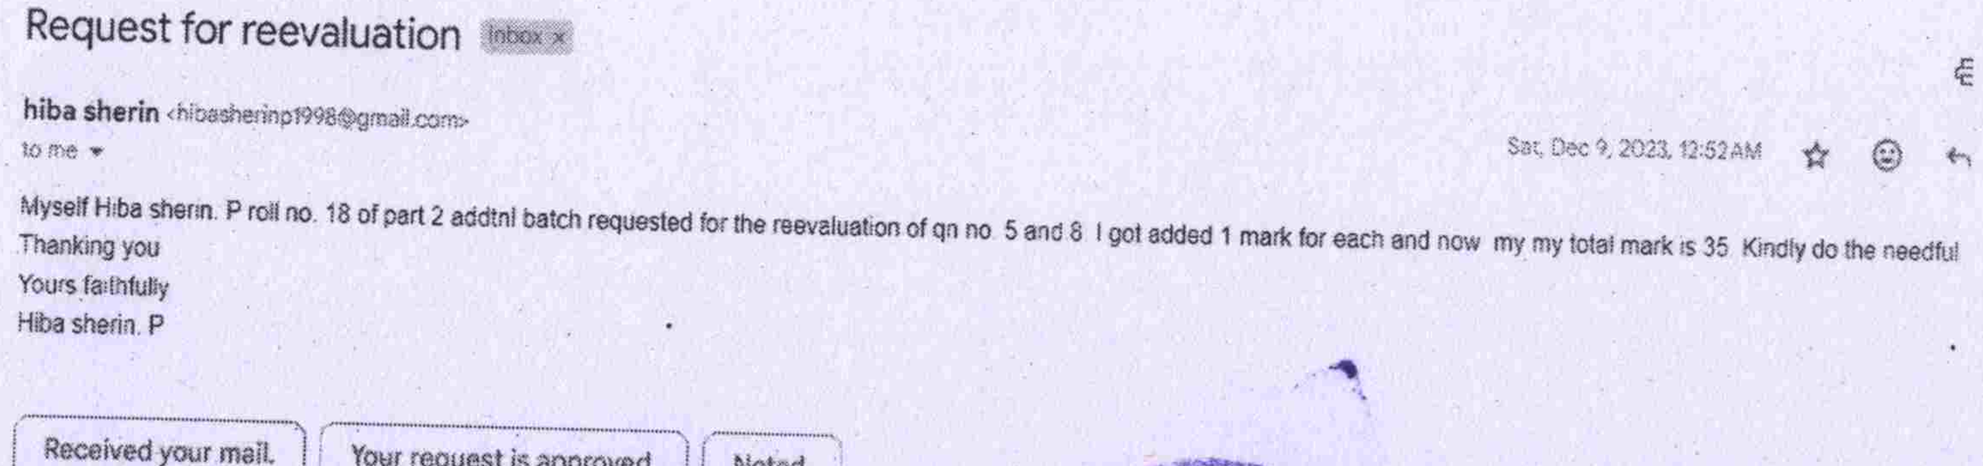

A mail id has been created in every department for the students to address their issues which is then evaluated by the staffs and actions taken to resolve their concerns.

Model Examination

Essay.

① Maxillomandibular jaw relationship — is the spatial relationship of maxilla to the mandible.

It is classified as :

- Orientation jaw relation
- Vertical jaw relation
  - at rest
  - at occlusion
- Horizontal jaw relation - It is the anteroposterior and side to side relation of mandible in horizontal plane.
  - Centric
  - Eccentric - protrusive
    - lateral

→ Centric Jaw Relation :

It is the maxillomandibular relationship of the condyle to the thinnest avascular portion of the articular disc in the complex superior anterior-superior portion.
There is no tooth contact in this relation.

DEPARTMENT OF PUBLIC HEALTH DENTISTRY

INTERNAL EXAM GRIEVANCES

It is a very formal process followed in the Department of Public Health Dentistry, through which the students can raise concerns or seek guidance regarding their academic performance in examinations. The students can submit a written request within 7-10 days from the date of paper declaration initially to the Head of the Department pertaining the nature of their grievances. The letter should specify the explanation of the issue for which the candidate seek concern from the respective faculty. Issues like insufficient marks secured, error in evaluation can be rectified through this procedure. Later the grievances will be reviewed by the Head of the Department and the respective faculty in charge on request by the candidate.

REPORT

Internal exams are a critical component of the Oral Medicine and Radiology program, assessing students' knowledge, skills, and competencies in diagnosing oral and maxillofacial conditions and interpreting radiographs. However, grievances may arise during the exam process, potentially affecting students' performance and overall experience.

This grievance report underscores the importance of maintaining a fair and transparent evaluation process in Oral Medicine and Radiology. By addressing student grievances and implementing proposed solutions, we aim to enhance the overall experience, fostering a more positive and supportive learning environment. This will ensure that students are better equipped to meet the rigorous standards of the discipline and excel in their professional roles.

FIRST INTERNAL EXAMINATION 26/10/2024

FINAL YEAR BDS – PART 1

Time: 3 hrs ORAL MEDICINE AND RADIOLOGY Max marks: 70

Answer all questions

Draw diagrams wherever necessary

Essays: (2x10=20)

1. Classify white lesions. Write in detail about etiopathogenesis, clinical features and management of OSMF.
2. Explain in detail the effects of radiation on oral and para oral tissues and add a note on its management.

Short essays: (4x5=20)

3. Differential diagnosis of cervical lymphadenopathy.
4. Compare and contrast the paralleling and bisecting angle techniques in intraoral radiography.
5. Factors controlling the X-ray beam.
6. Trigeminal Neuralgia.

Short notes: (10x3=30)

7. Oral considerations in asthmatic patients.
8. Composition of radiographic film.
9. Exfoliative cytology.
10. Grids.
11. Gingival enlargements.
12. Dental consideration in pregnant patients.
13. Developer solution.
14. Management of oral lichen planus.
15. Dental consideration in end stage renal disease.
16. Intensifying screens.
